Maintenance

Care of Your Fan

Here are some suggestions to help you maintain you fan.

1. Because of the fan's natural movement, some connections may become loose. Check the support connections, brackets, and blade attachments twice a year. Make sure they are secure.
2. Clean your fan periodically to maintain its new appearance over the years. Do not use water when cleaning, this could damage the motor or possibly cause an electrical shock. Use soft brush or lint-free cloth to avoid scratching the finishing. The plating is sealed with a lacquer to minimize discoloration or tarnishing.
Warning : Make sure the power is off before cleaning your fan.
3. There is no need to oil your fan. The motor has permanently lubricated sealed ball bearings.
