

Product Structure

Specification

Solar Panel	2V/0.3W Monocrystalline Silicon
Battery	1.2V Ni-MH AA Battery (built-in)
Power Source	100% Solar Powered
Charging Time	6-8 Hours
Waterproof Grade	IP65

Note

- Although this product has waterproof function, do not soak it in water or put it in a place with water.
- If not use the product for more than one week after receiving please put it under the sunlight for charging before using.
- The switch on the solar panel should be turned on before charging or it won't be charged.

First Time Use

- Please make sure you have turned on the switch before using, and charge the solar light under direct sunshine at least 8 hours for the first time.
- In cloudy weather or winter, charging time maybe longer and working time maybe shorter, which is normal for solar lamps and should not be considered as quality problem.

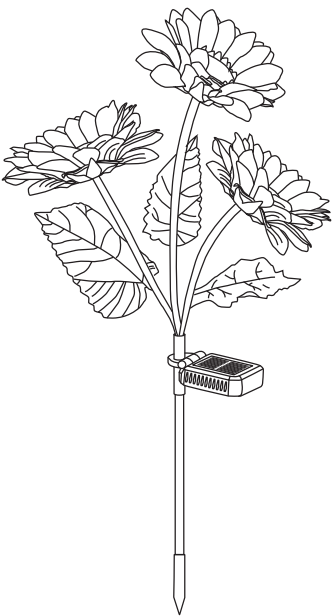

Product Features

- Light control mode, the lamp will light up at night and turn off at sunrise automatically.
- Solar energy is automatically charged during the day, and it will be converted into electricity at night.
- The lighting time is more than 10 hours with fully charged.
- Place of use: garden, lawn, walkway, courtyard, yard, park, ect.

Operation Instructions

- ON/OFF Setting: Press the ON/OFF button to turn on the power before using.
- Testing method: There is the switch ON/OFF on the back of solar panel, please cover the solar panel from sunlight and turn on the switch to check if it works.
- Working environment: Please place it at a location with good direct sunlight.
