All Accessories for Assembly

How to Use

12. Add enough nutrient water (not included) to the bucket.
13. Put into clay pebbles.
14. Carefully transplant seedlings whose roots are below the irrigation ring.
15. Plug in the air pump power supply.

Application

It is suitable for growing flowers, vegetables, fruits, and more. It can be used in growing tents, indoors, gardens, balconies, greenhouses, etc. You can grow tomatoes, strawberries, lettuce, chilies, mint, peppers, rosemary, and more.

Notes

1. Please check the product size carefully before purchasing.
2. Please note that if you feel that the air pump is not strong enough, the following conditions may be the cause. The air valve is not open. The check valve is installed in the wrong direction.
3. Please note that this product does not contain soil, plants, fruits, vegetables, etc.
4. Please read the English manual carefully before use and pay particular attention to the safety instructions contained therein.
5. Please allow the slight color difference caused by the shooting light and 1-3cm error due to manual measurement and make sure you do not mind before ordering.
