Solar Lantern
User Manua

Note

1: Please make sure you have turned on the light before using, and charge the metal solar. lantern in direct sunshine at least 8 hours for the first time.
2: In cloudy weather or winter, charging time may be longer and working time may be shorter. which is normal for solar lamps and should not be considered as quality problem.
3: This light will turn on in dark environment. Please keep it away from other light source or eliminate the other light sources around the location.
4. In order to verify that the switch is in the"ON"position, cover the solar panel with your hand and the lamp should light up automatically.
5: The LED indicator(near the USB charging port) lights up Red when it is not fully charged, and it will turn to Green after it is fully charged.
