

Precautions:

1. Please install by a professional with an electrician certificate.
2. The power must be turned off before installation.
3. Wear gloves before installing the luminaire, away from flammable materials.
4. Do not put conductive objects into the lamp body to avoid short circuit and unnecessary damage.
5. If the luminaire is not working properly, turn off the power and check if the power is connected. If you still have problems, please consult a professional.
6. Clean the lamp with a non-corrosive cleaner.

Installation steps:

- 1: Install the suction cup pendant into the ceiling.
- 2: Use screws to secure the hanging plate to the ceiling.
- 3: Connect the chain to the lamp body.
- 4: Connect the chain of the lamp cover to the iron bracket.
- 5: Fix the lamp cover bracket to the wooden post.
- 6: Reinforce the lamp cover bracket with screws.
- 7: Connect the power supply safely according to the positive and negative terminals of the power supply.
- 8: Use the lifting ring to fix the three orientations of the wooden column.
- 9: The light wire is connected to the terminal block through the lamp body, pay attention to distinguish the positive and negative poles and dock with the ground wire.
- 10: Hang the hanging ring inside the hook.
- 11: Move the chandelier close to the ceiling and tighten the screws on the side of the chandelier.
- 12: Install a 220V bulb for brightness test.
- 13: The installation is complete.
