

## Typical Wire Shelving Units

**4 Tier Starter Unit** (as shown): comes with four shelves and four posts

**3 Tier Starter Unit** (not shown): comes with three shelves and four posts

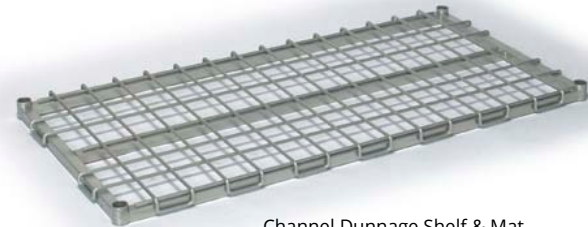

## Finishes Available

- Chrome for dry storage
- Polyseal for coolers/freezers
- Black Epoxy for merchandising
- Stainless Steel for clean rooms

## Assembly Instructions

1. Determine desired distance of bottom shelf from floor
2. Install 2 plastic clips above the number on posts
3. Stand shelf on end and put top of post through the shelf collar until plastic clip locks in place
4. Repeat steps 2 & 3 for remaining shelf collars
5. Stand 4 posts and one shelf upright
6. repeat step 4 on all posts. Fit shelf collars through top of post and slide shelf down into place for remaining shelves
7. For straight line or 90° add-on unit use S-hooks supplied.

Channel Dunnage Shelf & Mat for storage of heavy items on bottom 1 or 2 shelves
