

GIGALUMI Solar pathway lights

Item Model Number: 6827

FEATURES

- High Quality Solar Panel.
- 1 Warm White SMD LED.
- High Lumen Light Output.
- Lights up Automatically at Night.
- Metal and Glass Construction.
- 1 Year Limited Warranty.

IMPORTANT

Fully charge the battery before first use. Charge under direct sunlight in the ON position for a whole day.

Do not place the solar light near other outdoor lighting sources such as street lights. Choose an outdoor location with full, direct sunlight where the solar light is able to receive at least 8 hours of sunlight each day.

- Remove any dirt and debris from the solar panels especially during summer, and snow during winter months. Please clean solar panels gently with a soft cloth periodically. Do not use abrasives or chemicals to clean the solar panel.
- Use 1.2V 800 / 1000 mah Ni-MH AA rechargeable batteries for your solar lights. Replace with a new battery of the same size each year for optimum performance.
- **CAUTION: Do not dispose of batteries in fire. Batteries may explode or leak.**

BATTERY REPLACEMENT

STEP 1: While holding the head unit, turn the solar housing in a counter clockwise direction to remove (Fig. 3).

STEP 2: Turn the switch to the OFF position.

STEP 3: Remove the battery compartment cover (Fig. 4).

STEP 4: Replace the battery with an equivalent new solar rechargeable battery, ensuring the correct polarity is observed (Fig. 4).

STEP 5: Reassemble the unit by reversing the above procedure.

STEP 6: Allow the unit to charge for up to 1 day in the ON position. Your solar light will automatically turn on once it gets dark.

CAUTION: Rechargeable batteries contain Nickel-Cadmium or Nickel-Metal Hydride and must be recycled or disposed of properly. Do not mix old and new batteries. Do not mix alkaline, standard (carbon-zinc), or rechargeable batteries. Do not dispose of batteries in fire. Batteries may explode or leak.

TROUBLE SHOOTING

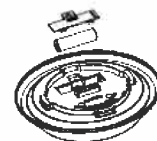

If your solar light does not come on at dusk despite following all instructions please try the following steps:

1. Ensure the solar light is not affected by any other light source.
 2. Ensure the solar light does not stand in the shade all day.
 3. Ensure the battery has been charged under direct sunlight.
 4. Make sure the solar panel is clear from dirt, debris, or snow which would prevent the battery from charging.
 5. Make sure the battery connection is tight.
 6. Make sure the switch is placed in the ON position.
- Battery may need to be replaced. Replace with a new solar rechargeable battery of the same size and rating.

Fig. 4

ASSEMBLY & INSTALLATION (Fig. 1)

STEP 1:

While holding the head unit (B), connect the solar housing (A) by turning in a clockwise direction until secure.

STEP 2:

Connect pole (C) to base of head unit (B) by pressing on until secure.

STEP 3:

Insert round end of ground stake (D) into bottom of pole until secure.

STEP 4:

Insert spiked end of the ground stake (D) into the ground until secure.

CAUTION: In compacted, clay, or hard soils, moisten the ground with water before inserting the stake to avoid breakage.

OPERATION

For First Time Use:

STEP 1:

Fully charge the battery before first use. Charge under direct sunlight in the ON position for a whole day.

STEP 2:

While holding the head unit (B), turn the solar housing in a counter clockwise direction to remove (Fig. 3).

STEP 3:

For daily operation, place the ON/OFF switch in the ON position under the solar housing (Fig. 2). Your solar light will automatically turn on once it gets dark.
