

Dining Table Installation Instructions

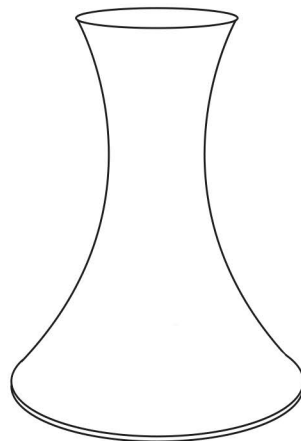

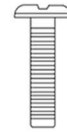

1. Inspect the Package

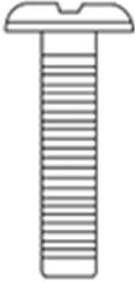

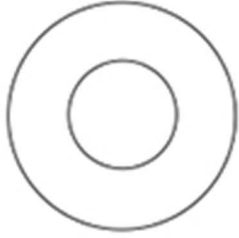

Tabletop

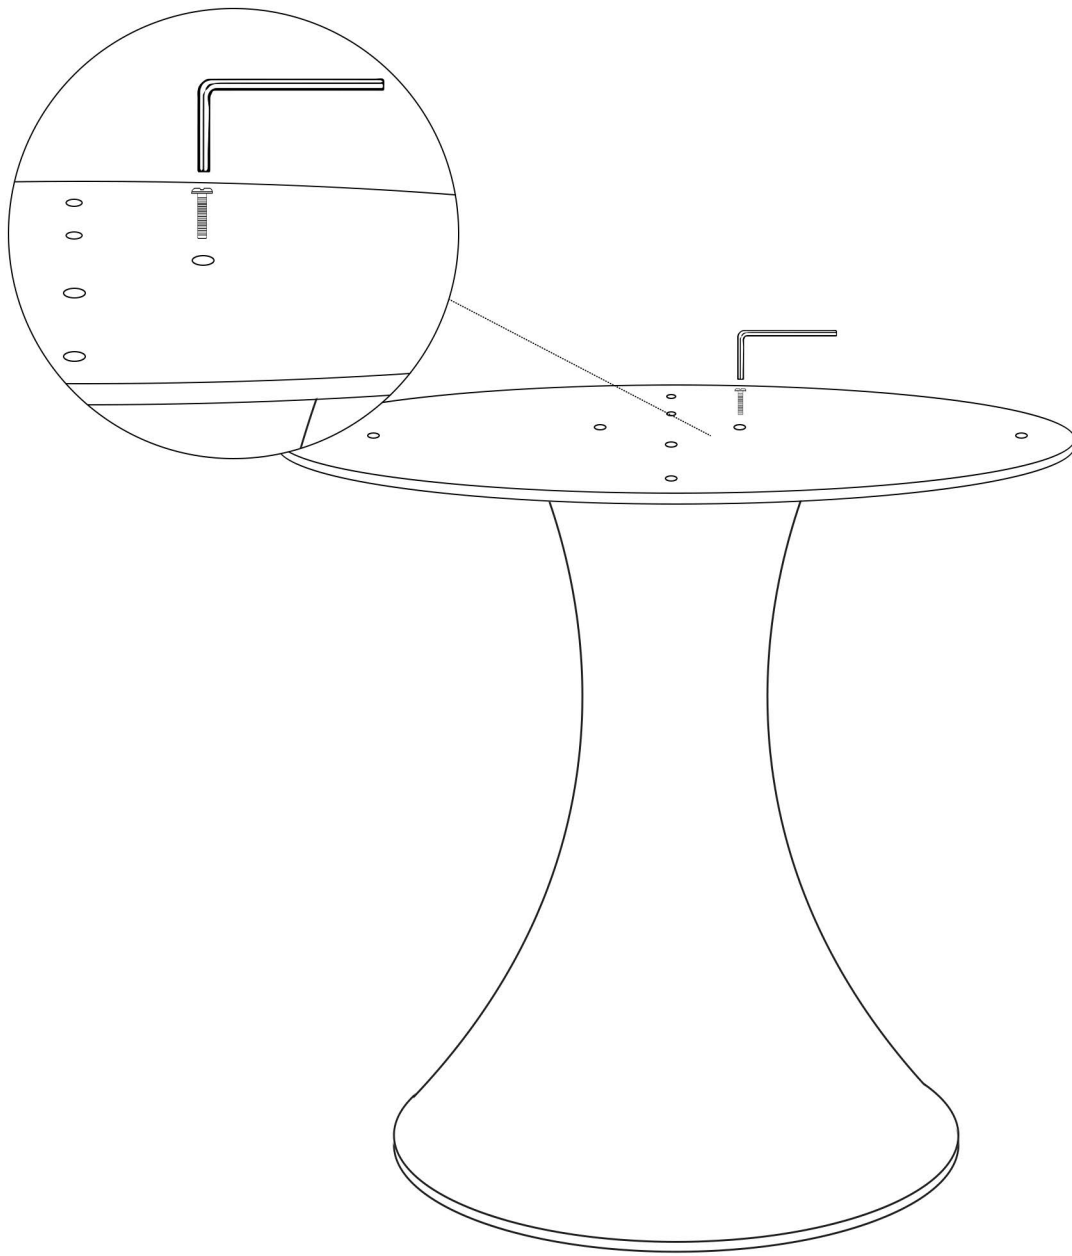

connecting plate

base

			
× 1	× 20	× 18	× 20
③ screwdriver	⑤ screws	⑥ adjusting screws	⑦ screw washers

Upon receipt, first check whether the outer carton is seriously damaged. If there is no major damage, open the box and confirm that the tabletop, legs, and screw pack are complete and undamaged.

Step 2: Attach Connecting Plates to Bases

Take out the two connecting plates.

Align each connecting plate with the 4 screw holes on the top of one pedestal base.

Insert screws from above and finger-tighten only.

Important: All 4 screws must be inserted first before final tightening to avoid misalignment.

Tighten the 4 screws evenly in a cross pattern using an Allen key.

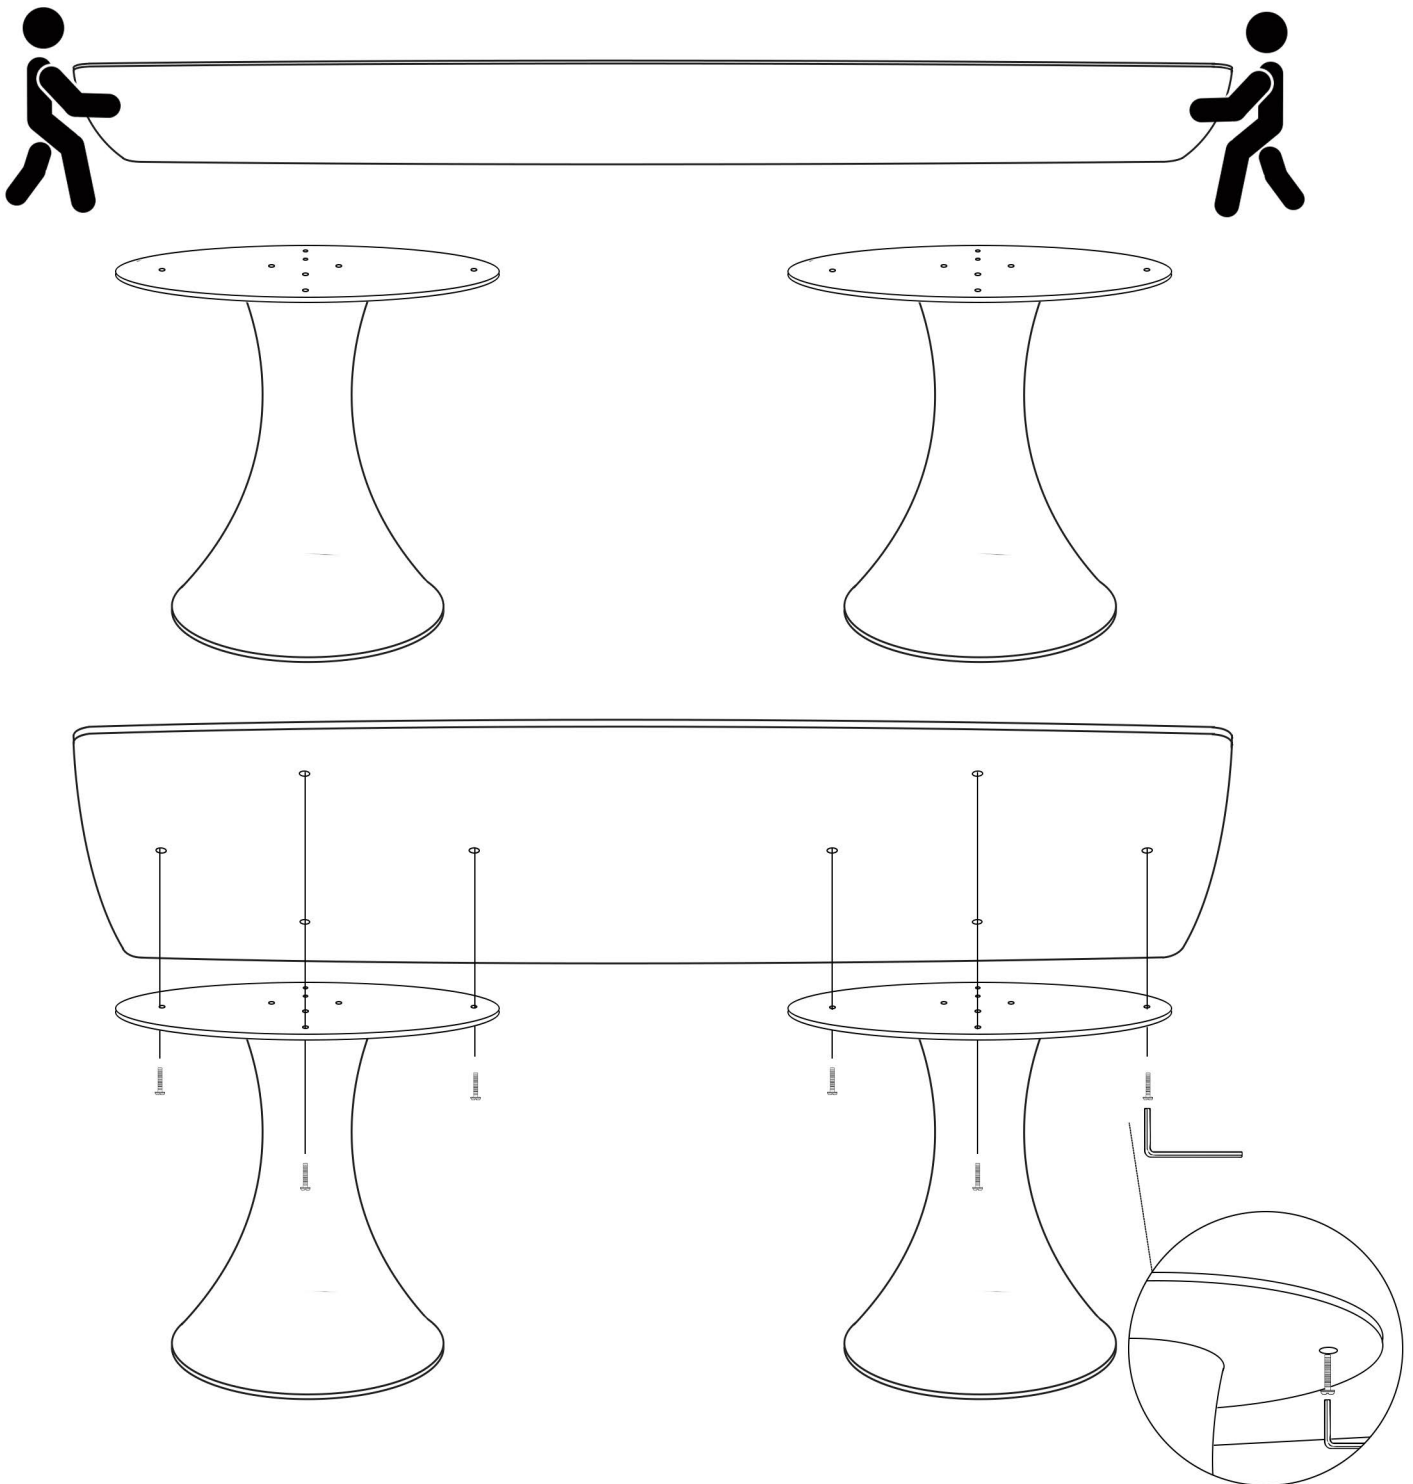

Repeat for the second connecting plate and second base.

Step 3: Attach Tabletop to Bases

With two people, carefully lift the tabletop and align the connecting plate with the pre-installed inserts on the underside of the tabletop. (Use a phone flashlight if lighting is poor.)

Insert 8pcs screws through the connecting plate into the tabletop inserts. Finger-tighten all 8 screws first, then tighten firmly.

Repeat for the second base assembly.

Important Safety Notes

- 1.The tabletop is extremely heavy. The entire process **MUST** be carried out by 2-3 people. Never attempt to lift it alone.**
- 2.It is strongly recommended to move the tabletop to its final dining room position **BEFORE** assembly. Once fully assembled, the table is very difficult to move again.**
- 3.When tightening screws, always do it gradually in several stages. Do not overtighten in one go, as this may crack the wood.**
