

Product Specification – Fabric

Fabric products are made exclusively from our fabric, making them perfect for a long outdoor life. Unlike most cloth, our fabric is made from fibres that are dyed before they are woven – this gives a deeper colour, with every yarn coloured to the core. The resultant fabric can be left outdoors for many years without suffering fading and abrasions, that plague other fabrics.

All foam and cushions used in our fabric range is custom designed with a wide-cell structure to maximise airflow, allowing the furniture to dry quickly, without trapping pockets of water. The antimicrobial treatment that every piece undergoes, prevents the build-up of bacteria that can cause nasty smells.

Our products can be left outside year-round and cleaned using mild bleach and warm water.

Cleaning Kits are available to purchase separately, our kits are Vegan approved
