STEP2

Screw the legs (H) into each hole on seat frame (A) and back frame (B) as shown, make sure they are tightented.

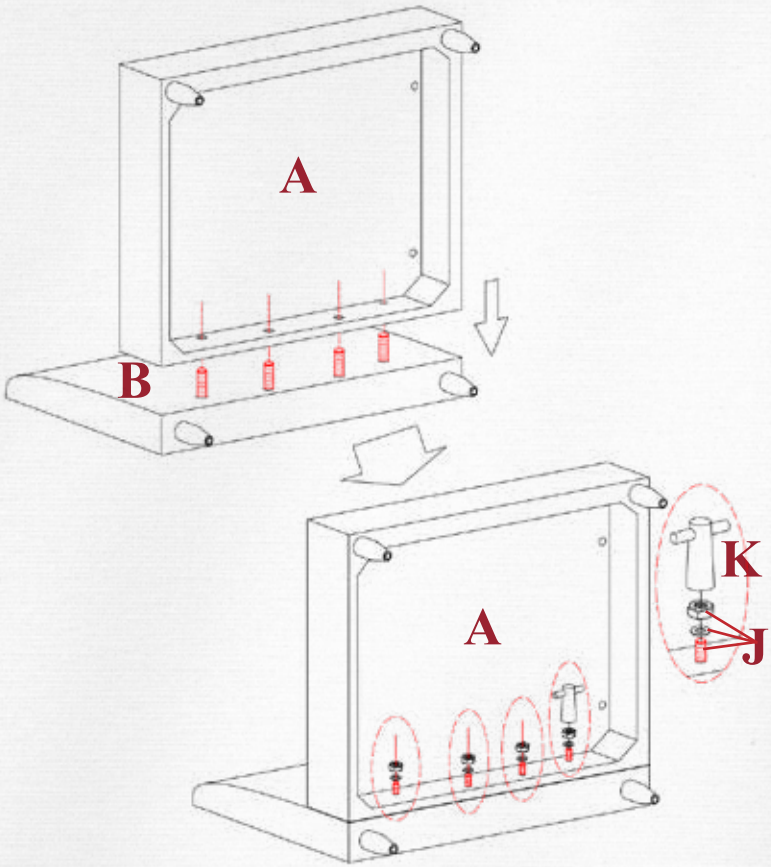

STEP3

Align the screws into the pre-drilled holes on the backrest (B), then use hand to twist the screws (J) for 1/3 of their length as shown.

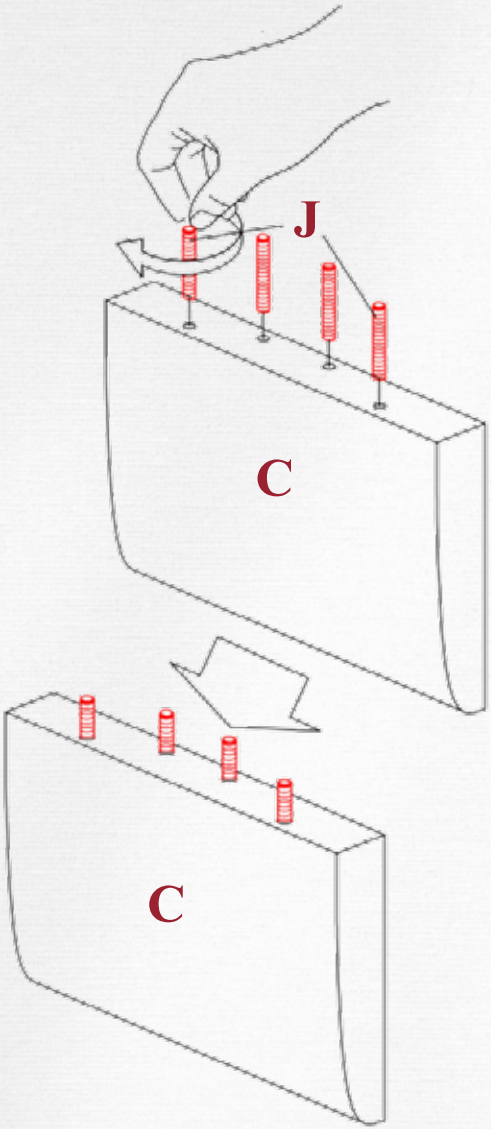

STEP4

First, align the designated holes on the seat frame (A) with the screws on the backrest (B) from the last step as shown. Then place one hex nut (J) onto each screw (J), use the hexagon socket wrench (K) provided to tighten both nuts.

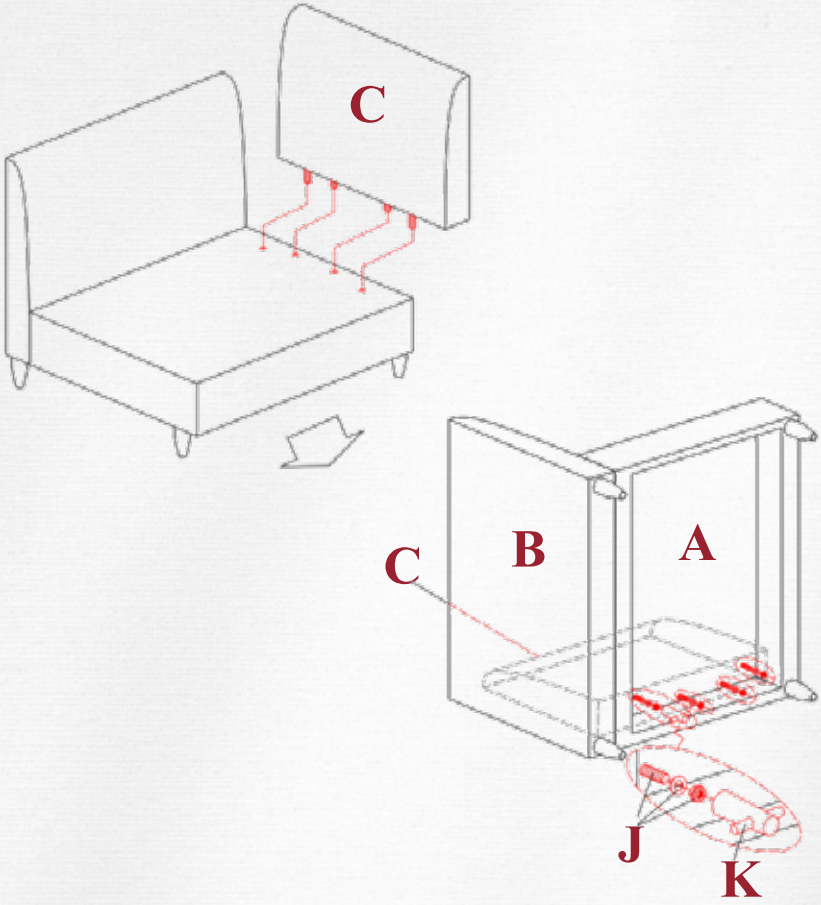

STEP5

Align the screws into the pre-drilled holes on the armrest (C),

Before all screws are tightened, keep the side of the backrest flat where it meets the surface of the armrest before tightening all screws.
