

INSTRUCTIONS FOR YOUR PRODUCT

Thank you for your recent purchase of this hand-crafted garden fountain. We have taken great care to create this piece especially for you. Please review these instructions and assemble this piece with care.

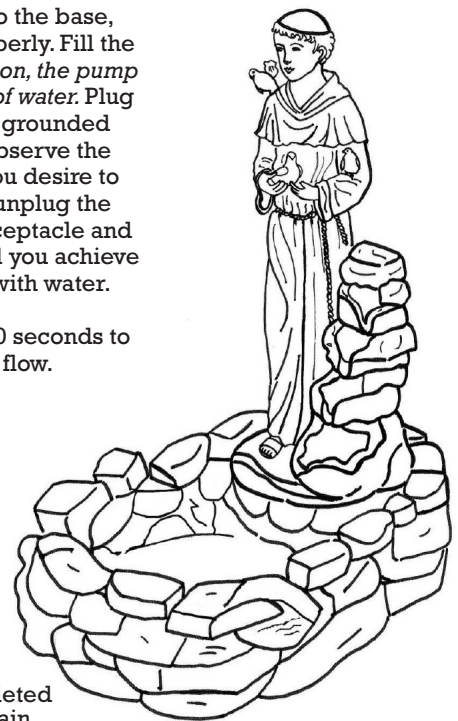

Step 1

Place the base on a stable, level surface. Set the supplied pump's flow control to max (+). Attach the fountain feature's tubing to the discharge of the pump. Lower the fountain feature onto the base, so the pump will rest inside the pump reservoir.

Step 2

Position the fountain feature onto the base, making sure all the tabs align properly. Fill the base with water. *For proper operation, the pump requires a minimum of two inches of water.* Plug the pump's cord into a properly grounded (grounding-type) receptacle. Observe the fountain feature's water flow. If you desire to adjust your fountain's flow rate, unplug the pump's electrical cord from its receptacle and adjust the pump's flow control until you achieve the desired flow, refill the base with water.

Note: Water flow may take up to 30 seconds to completely come up to set flow.

YOUR THANK YOU FOR
PURCHASE
