

ASSEMBLY AND INSTALLATION INSTRUCTIONS

CA2299-L

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER WHILE INSTALLING OR SERVICING THIS FIXTURE

- NOTES: 1. Before installing, consult local electrical codes for wiring and grounding requirements.
2. READ AND SAVE THESE INSTRUCTIONS.

To work properly, you should install this fixture NOT confront any jets of air conditions or strong airflow

1. Fix the joint tube in the corresponding connecting tube and ground through the inner tooth segment, and tighten it.
2. Unplug the wire from the socket box. Wire connections are made using wire nuts as follows:-connect the wire (usually black insulated) from the fixture to the black wire of the power supply. A white wire that connects a neutral (usually white-insulated) wire from a fixture to a power supply.

Turn on the power at fuse or circuit box.
