Make a visual and artisanal statement with our Kanbina Apple Green 5x18 Glossy Ceramic Mosaic, a versatile mosaic featuring six slender tiles stacked to form a classic subway format. A smooth, glossy surface shines in varying tones of mint green. This mesh-backed mosaic lends itself to versatile installations and works beautifully on flat as well as curved walls.

### An elevated basic with artisanal appeal

The Kanbina collection of mosaic wall tiles is a TileBar “elevated basic,” perfectly sized to fit a standard backsplash area. The Spanish-made elongated subway tile is crafted with a combination of high-tech machinery and artisanal craftsmanship. This ceramic tile is machine-cast in an intentionally imperfect mold, and hand-glazed and multi-fired to achieve the rich, deep colors that give it an on-trend handmade look. Kanbina is available in an array of polished jewel tones.

### Not every wall is flat

This collection features color variation, an exaggerated long appearance, and a “semi-handmade” production technique. Machine-cast strips of tile are hand-glazed, multi-fired, and mounted onto mesh backing, making them easy to install either vertically or horizontally—even on curved walls. The unique construction of the Kanbina collection lends itself to versatile applications; it is as flexible as it is striking.
