

Oversized Red Umbrella Rotating Tower Installation Instructions

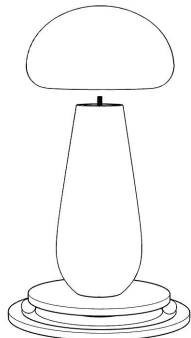

Step 1

Gather Board 1, Board 2, Board 3, and the two wooden balls. Stack the parts in the following order from bottom to top: Board 1 → Board 2 → Board 3 → Wooden Balls. Insert the M8*80 inner hex screw through the holes of the three boards and secure tightly.

Step 2

Take the vertical column and, as shown in the diagram, align and secure it to the board assembly using the M8*80 inner hex screw.

Step 3

Take the umbrella top and attach it to the top of the vertical column as shown. Finally, stick the 4 non-slip pads to the bottom of Board 1.

Installation complete!
