

New Cat Condos

Assembly Instructions

Package contents:

1-Base

1-Roped Post

1-Box

1-Hardware Pack

Follow these easy steps:

1

In a large, open area, open the box and remove all contents. Take the sisal rope post and screw it into the middle hole in the base, rotating in a clockwise direction. Turn post slowly to avoid damaging, twist until tight. (See figure 1)

2

Take the rectangular perch and set it onto the top of the post. Take the provided bolt and washer and twist onto the sisal post, tighten with the allen wrench provided. Using the top perch, you can turn in a clockwise manner to ensure the roped post is tightened securely onto the base. Re-tighten bolt on top perch with allen wrench after perch is in its desired position. (See figure 2)

*** Keep allen wrench to re-tighten the perch as needed. Place against a wall for added stability.
