Application

This product is widely used in DIY handmade chocolate shops, hotels, restaurants, bakeries, coffee shops, etc. to heat cream, milk, butter, jam, etc., and melt chocolates.

Notes

1. Please read the operating manual completely before use. And pay particular attention to the safety instructions included.
2. Please note that the machine is dry-heating, and it is forbidden to add water and other liquids to the heater. To prevent damage to the heater, please do not put any objects in the heater.
3. Please wipe the machine shell with a wet towel and do not flush it directly with water.
4. Please allow the slight color difference caused by the shooting light and 1-3cm error due to manual measurement, and make sure you do not mind before ordering.
