

Specification

Material: Glass, Metal

Voltage: 110V

Color: Yellow

Style: Baroque

Mounting Type: Ceiling

Shape: Hemispherical

EU Energy Label Efficiency Labeling Class: A+++to E

Efficiency: E

Process: Polishing, Manual Welding, Painting

Number of Lampheads: 2

Bulb Requirements: Use E26 Bulbs, Maximum 60watts, Pptions Include Incandescent, Fluorescent, LED, Halogen, etc. (Bulbs Are NotIncluded)

Irradiated Area: 10-15m² /107.6-161.5ft²

Lampshade Size: 40*40*25cm/16*16*9.84in

Chain Adjustable Length: 0.8-1.2m/2.6-3.9ft

Base Diameter: 15cm/5.9in

Package Included

1*Pendant Light

1*English User Manual

All Accessories Needed for Installation

Notes

1. The sound of the lamp does not sound like glass because the lampshade is cut into small pieces and is surrounded by copper foil and soldered with solder. This may lose the original crisp sound of the glass, but it does not mean that the lamp is not made of glass.
2. Please use a dry cloth to wipe the lamp directly after it has been **dusted**. Do not use water or detergent to clean the lampshade. After an interval of two to three months, the luminaire will lose its luster or the surface weld will turn white due to the pollution of water and **dust** in the air. In this case, if you wipe the surface of the lampshade and base with a dry cloth and a little oil, your lamp will immediately regain its original luster and color.
3. The weld lines are handmade and therefore cannot be perfectly uniform.
4. Because the glass is flat and now has to be made into a curved lampshade, there will be occasional unevenness in the spliced section of the glass. For each piece of glass on the lampshade, there is a very small color difference or there is a natural glass crack, which is a normal phenomenon instead of a product quality problem.
