

# ASSEMBLY AND INSTALLATION INSTRUCTIONS

**WARNING:** TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

- Before You Begin:**
- Ensure power is turned off at the circuit breaker before installation.
  - Read all instructions carefully.
  - Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

- Step-by-Step Installation:**
1. Screw the connecting rod onto the fixture's threaded nipple.
  2. Attach the fixture body to the swivel connector.
  3. Insert the two curved tubes into the holes on the upper and lower metal boxes. Slide a washer onto each tube, and secure with a nut.
  4. Slide the flat cover onto the threaded nipple of the lower metal box, and secure with a lock nut.
  5. Slide the flat cover onto the threaded nipple of the upper metal box, and then attach the suspension ring onto the cover.
  6. Insert the glass panel into the retainer clip on the curved tube. Align the holes and support the glass.
  7. Slide a silicone washer onto a threaded stud. Insert the stud from inside through the glass and retainer clip hole on the curved tube. And secure it from the outside with a lock nut.
  8. Loosen the quick link to set the desired length of the suspension chain and wires.
  9. Secure the mounting plate to the U.S.-standard junction box using provided screws.
  10. Wiring Connection
    - Use wire connectors to connect the black (hot) wire to the black wire, the white (neutral) wire to the white wire, and the ground wire to the grounding terminal.
    - Ensure no exposed conductors remain outside wire connectors or outside the junction box.
  11. Secure the canopy to the mounting plate using the screw collar loop.
  12. Slide the socket sleeve over the socket, and then install the bulb. (Bulbs Not Included)
  13. Restore the power, and verify the light operates correctly.

## Safety Instructions:

- To avoid fire, shock, and serious personal injury, follow all instructions carefully.**
1. Do not install or use the light fixture if any part is missing or damaged.
  2. To avoid possible electrical shock be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
  3. Make certain no bare wires are exposed outside the wire connectors.
  4. All wiring must conform to national and local electrical codes.
  5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
