

Product Details:

- Maximum Wattage: 24V*1.25A=30W
- Reinforced Glass
- Made of MDF Wood
- Non-toxic UV Coating
- Patent Designed Pole

* Important Safety Instructions:

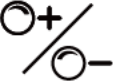

Do NOT use another direct current adapter other than the DC adapter in the package.

Assembly Instructions

See other side of this insert for written assembly instructions.

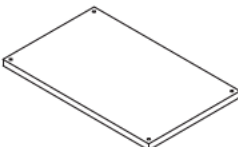

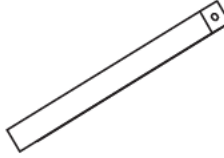

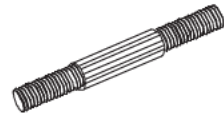

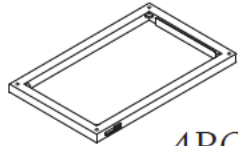

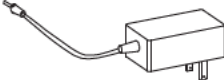

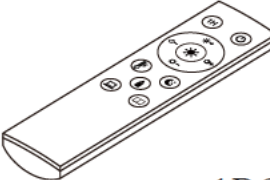

• Basic Controls:

-  Power On/Off
-  Turn off after 1hour
-  Temperature Tone Control.
Warm (+) /Cool (-)
-  Brightness Control.
Bright (+) /Dim (-)

• Specialty Presets:

-  **Neutral:**
Neutral, standard lighting for everyday.
-  **Temp Control:**
Cycle by temperature hue, keep brightness
-  **Night:**
Soft, warm light. Aids in sleep.
-  **Nursery:**
Bright, warm light. Cozy & Gentle.
-  **Study:**
Very bright, cool light. Awake & Energizing.
-  **Work:**
Very bright, warm light. Productivity

Control up to **6 devices** at once. Smart lighting automation & scheduling available on app.

A Bolts  8PCS	B Bottom Board  1PC	C Poles  16PCS	D Two-Sided Bolts  12PCS	E LED Module and Glass Shelves  4PCS	F Power Cord  1PC	G Power Adapter  1PC	H Remote  1PC	I Cushions  4PCS
---	---	--	--	--	---	--	---	--

01

Screw the bolts (A) into the four poles (C) through the bottom board (B). Then place the four cushions (I) on top of the screw holes for added stability.

02

Attach one level of the LED module with glass shelving (E) into the poles from Step 1 using four two-sided bolts (D), and then add another level of poles (C) onto the other side of the bolts.

03

Add another layer of the LED module and glass shelf (E) and another layer of poles (C) by using the two-sided bolts (D).

04

Repeat step 3.

05

When adding the final LED module and glass shelf (E), screw in four regular bolts this time (A).

06

Using the power cord section (F) connect one by one all four plugs into all four led glass modules. Ensure that all are secured in place.

07

Connect the power cord and foot switch (F) with the power adapter (G). Insert the male connector into the empty space within the female side and turn clockwise to secure.

08

Our display shelves are now enhanced with Correlated Color Temperature (CCT) technology. You can now effortlessly transition between warm and cool toned lighting (2700K to 6000K). With our user-friendly app and remote control, you now have the power to tailor the lighting tone of your product.
