

THEODORE ALEXANDER

Amethyst Lens 1

D2774S55473-4726

Amethyst Lens 1 is a captivating work that explores the style of hyper abstraction. Through ingenious manipulation of light reflections and refractions, this work on canvas manifests transformative energy, evoking both kinetic motion and profound depth. Cut into the middle of the dreamlike motif is a sharp triangle that inserts structure. A blue color field in ultramarine and dark denim coexist with hints of amethyst. The clever addition of an organic bright white shape hiding a coral orb in the center provides the composition with an illusionary dimension. An engaging addition to ART by TA, Amethyst Lens 1 is a masterful study of color, light, and technique.

► Canvas, Top Coat Semi Gloss, F1332 - Silver Floater Frame - Width: 0.375

W 26 x D 2 x H 22 inches
