

# 5pc NON-STICK STOCKPOT SET

## About the Range

Change the way you cook, with the Una Non-Stick Range! Hosting exceptional non-stick performance, the Una range can help you to embrace healthy eating, by cooking professional quality meals with considerably less fat. Designed with you in mind, the collection caters to many practical culinary needs, and with the reinforced riveted handles you can comfortably control and cook any dish to perfection.

With this classic, five-piece Stockpot Set, from the Una Range, you can easily and efficiently prepare a variety of healthy dishes, and with its wide range of sizes, it makes a fantastic set for family meals too.

## Practical, yet Stylish

Constructed from high-quality aluminium, these stockpots bring outstanding cooking performance with incredible durability to your kitchen. The aluminium body is not just renowned for its resilience, but also its superb qualities for delivering uniform heat distribution. With the ability to spread heat evenly throughout the body of the pots, this prevents hotspots and provides excellently efficient cooking results. Added to this, the lightly textured effect forms a stylish exterior for the pots while maintaining tough and scratch resistant properties.

### Non-Stick Performance

The impressive performance of the stockpots' non-stick coating delivers professional culinary results, effortlessly. Thanks to its outstanding non-stick talents, you can easily create healthier meals - simply by using little to no oils when cooking - delivering a richer and more authentic taste. What's more, the washing up becomes a quick and effortless job for anyone, even the dishwasher, as the food runs smoothly off the non-stick coated surface.

### Induction Ready

You'll find yourself constantly reaching for these stockpots, as their compatibility with a wide range of cooking outlets make it well suited to a variety of recipes. The stainless steel plates bonded to their bases, allow them to be used for cooking with any stove type, including induction hobs (Ares model only).

### Riveted Handles

Incorporated into the stockpots' robust body are hard-wearing riveted handles, designed allow safe and comfortable manoeuvring of the pots around the kitchen. Complementary to these, is a matching knob attached to the glass lids for the pots, enabling you to easily and quickly remove the lightweight lids whenever you need to check on or stir your meals.

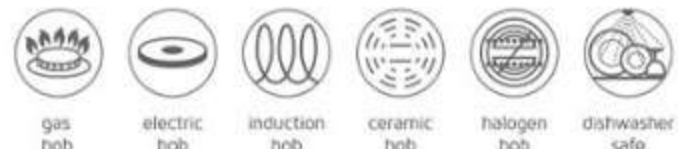

### Vented Glass Lids

Get expertly cooked results every time, with the help of the close-fitted tempered glass lids, included with each of the stockpots. These lids are great for retaining the necessary heat, moisture and nutrients that make your meals so tasty; plus, the clarity of the lids enable you to easily check on your dishes to prevent them from burning or boiling over while cooking. Added to this, the built-in steam vents in the lids allow excess steam to escape, which helps ensure your meals are always cooked in prime conditions.

NON-STICK

## Family friendly cookware

Cook like a Pro

Offering unparalleled resilience, the classic design and versatile qualities of these stockpots make them a kitchen must-have. We believe you'll come appreciate your stockpots on a daily basis, as you constantly find yourself saving time and effort when using them.

Within the Una Range, these five-piece stockpot sets are available in three different options - Apis, Athena and Ares (induction ready) - each with five different sized stockpots included.

You may be spoilt for choice here but you're sure to find the perfect set to suit your kitchen needs.
