

ASSEMBLY INSTRUCTIONS

7.5 Foot Pre-lit Aspen Tree

(For Indoor Use Only)

1. Assemble the product near a 120-volt AC electrical outlet
2. Place the Tree Stand (D) on a flat, level, stable surface.
Open legs so they are perpendicular to each other.
3. Insert the Lower Branch Section (C) into the Tree Stand (see Fig. 1) and tighten the Thumb Screws evenly into the holes in the Tree Stand.
4. Insert the Middle Branch Section (B) into the Lower Branch Section (C).
Insert the Tree Top Branch Section (A) to the Middle Branch Section (B)
and connect the the lighting plugs from Section (A) to Section (B)

5. Lower, spread open, and arrange the branches in the Tree Top Branch Section (A), the Middle Branch Section (B), and the Lower Branch Section (C).
6. Insert both Section (B) and Section (C) power cord's plug into the 120-volt AC electrical outlet to light the tree.
