LED light jumping function in music mode

LOGO built-in LED light can emit light

1. When turned on and in pickup or music mode, the LED light will start jumping up and down according to the sound level.

2. The remote control can adjust the sensitivity of LED light jumping, with a total of 10 settings. The default sensitivity for the first use is 7 settings.

3. The left button on the remote control can lower the sensitivity by a minimum of 1 level, while the right button can increase the sensitivity by a maximum of 10 levels. Adjust the sensitivity according to the tone of the song.

4. The higher the sensitivity level, the closer the LED light will be to the top of the seat back.

5. To prevent insufficient power supply from affecting the experience, it is recommended to connect the USB cable to a 5V2A power adapter.
