How to Assemble The Fire Pit Wind Guard Glass

05

SPECIFICATIONS

Installation Precaution

The glass needs to be fully snapped into the grooves of the fixed connector

- 1) Once you have installed all the fixed connectors on the windshield cover and it has formed a circle, adjust the distance between the four pieces of glass and the fixed connector, so that the edges of the glass are fully snapped into the fixed connector grooves.
- 2) To tighten the screws, you need to use a screwdriver gently, and when you feel that you can't screw it in, rotate it half a turn to a turn.

How To Assemble the Glass Wind Guard

Step1:Insert the glass(L013) into the top connector(M1) and screw the screws in until the glass is snapped.

Note: Do not tighten the screws.Make sure the connector doesn't fall off the glass.

L013		x2	M1		x1	N		x2
------	---	----	----	---	----	---	---	----

Step2:Insert the bottom connector(M2) between the two pieces of glass and lock the screws.

Note: Do not tighten the screws.Make sure the connector doesn't fall off the glass.

M2		x1	N		x2
----	---	----	---	---	----

Installation steps

Step3:Insert the glass(L013) into the top connector(M1) and screw the screws in until the glass is snapped.

Note: Do not tighten the screws.Make sure the connector doesn't fall off the glass.

L013		x1	M1		x1	N		x2
------	---	----	----	---	----	---	---	----

Step4:Insert the bottom connector(M2) between the two pieces of glass and lock the screws.

Note: Do not tighten the screws.Make sure the connector doesn't fall off the glass.

M2		x1	N		x2
----	---	----	---	---	----

Installation steps

Step5:Secure the last piece of glass(L013) to the previously fixed glass with the top connector(M1).

Note: Do not tighten the screws.Make sure the connector doesn't fall off the glass.

Installation steps

Step7:Secure the entire glass with top and bottom connectors(M1,M2).

Note: Tighten the screws.(The screws need to be tightened gently to prevent the glass from breaking.)

Warning:When installing the top and bottom connectors of the last piece of glass, you need to use a little force to form the glass into a circle, and be careful of glass breakage when installing.
