G Type-C charging port

Name: Table ambient light mini	English name: Fila Night-mini
Rated input: 5V=1A	Brightness: 55lm
Power Consumption: 0.9W	Color Temperature: 2700K
Charging time: 3 hours	Battery capacity: 1500mAh
Size: 70*70*145mm	Charging interface: Type-C
Material: PC+ABS	Weight: 170g+/ -10g

The Table ambient light-mini is controlled by a touch switch, which is easy to operate.

The brightness of the first touch is 10%, the brightness of the second touch is 100%, and the third touch is in a breathing state—the brightness gradually changes from dark to bright to dark, with a cycle of 4 seconds, and the fourth touch is off.

 **Touch 1 time:** 10% brightness

- ☀️ **Touch 2 times:** 100% brightness

 Touch 3 times: Breathing

- **Touch 4 times:** power off

A diagram of a beaker containing a liquid. A thermometer is inserted into the liquid. A small circle is drawn at the bottom of the beaker, with a line pointing to it from the text 'The small circle at the bottom of the beaker is a thermometer bulb'.

Power indicator light

Charging in progress: Indicator light is orange

Battery fully charged: Indicator light is green

Low battery: Indicator light is orange and slowly breathes for 5 seconds.

When turned off, this product automatically enters into a sleep standby state, and the program automatically cuts off the power supply with standby power consumption almost zero. The light will automatically restart when someone touches the switch. This maximizes energy saving and power consumption reduction."

This product is powered by a polymer lithium battery with a built-in 1500mAh large capacity battery that can be fully charged in 3 hours. It can work continuously for 16Hours.

When using our product for the first time, it is recommended to charge 2-3Hours.

A diagram of a cylinder. A vertical line runs from the top center to the bottom center. At the top of this line is a small square. At the bottom of this line is a small circle.

1 Normal connected

2 Disconnected

3 Reset

This product is a new type of LED filament lamp with a magnetic bead. The detachment of the magnetic beads and magnet during transportation (as shown in Figure 1) is a normal phenomenon. If the filament is twisted (as shown in Figure 1), it can be manually reset by holding the lamp in your hand and shaking it left and right. Using the strong magnet at the bottom, the filament can be straightened and reset successfully (as shown in Figure 2).
