Installation steps

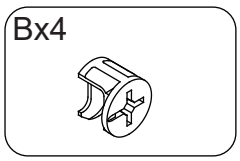

STEP 1

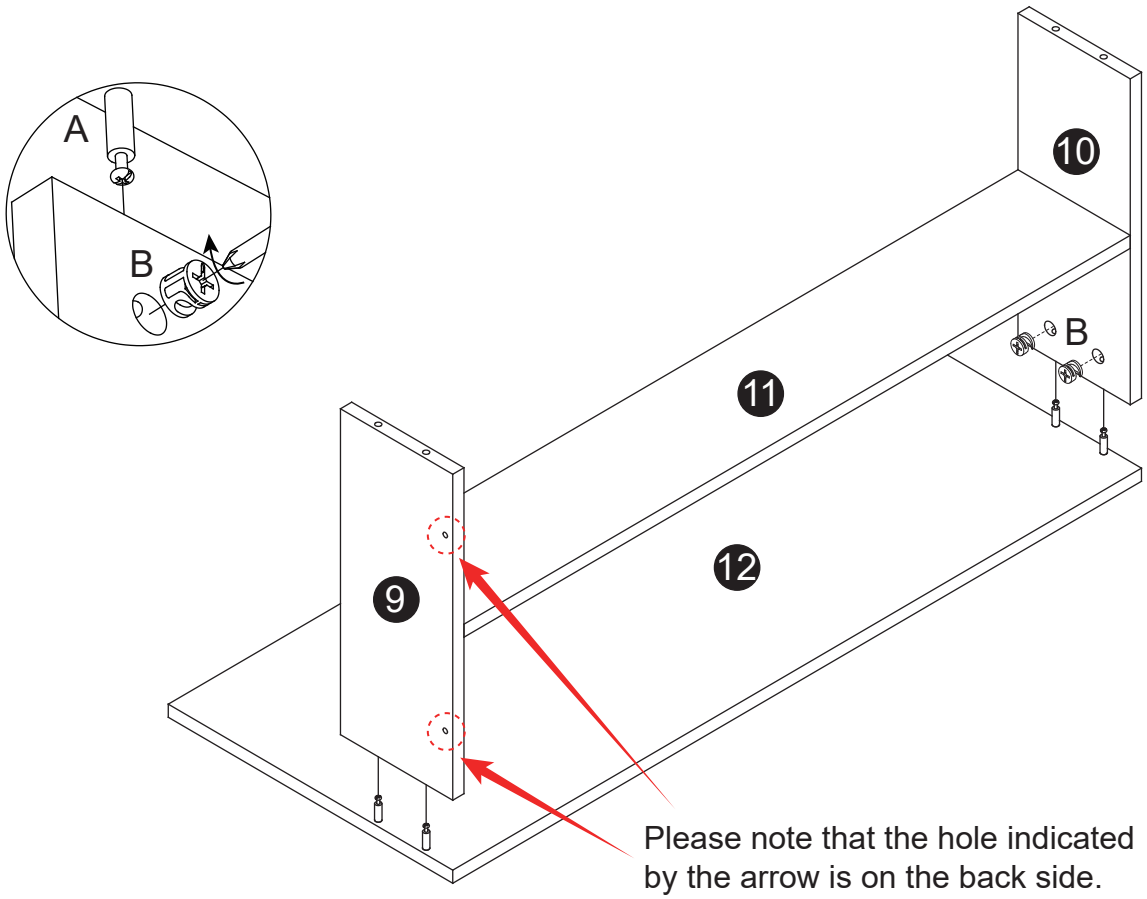

STEP 2

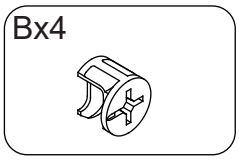

Note: The screws indicated by the arrows on Panel 11 and Panel 10 should be on the same side, as illustrated.

STEP 3

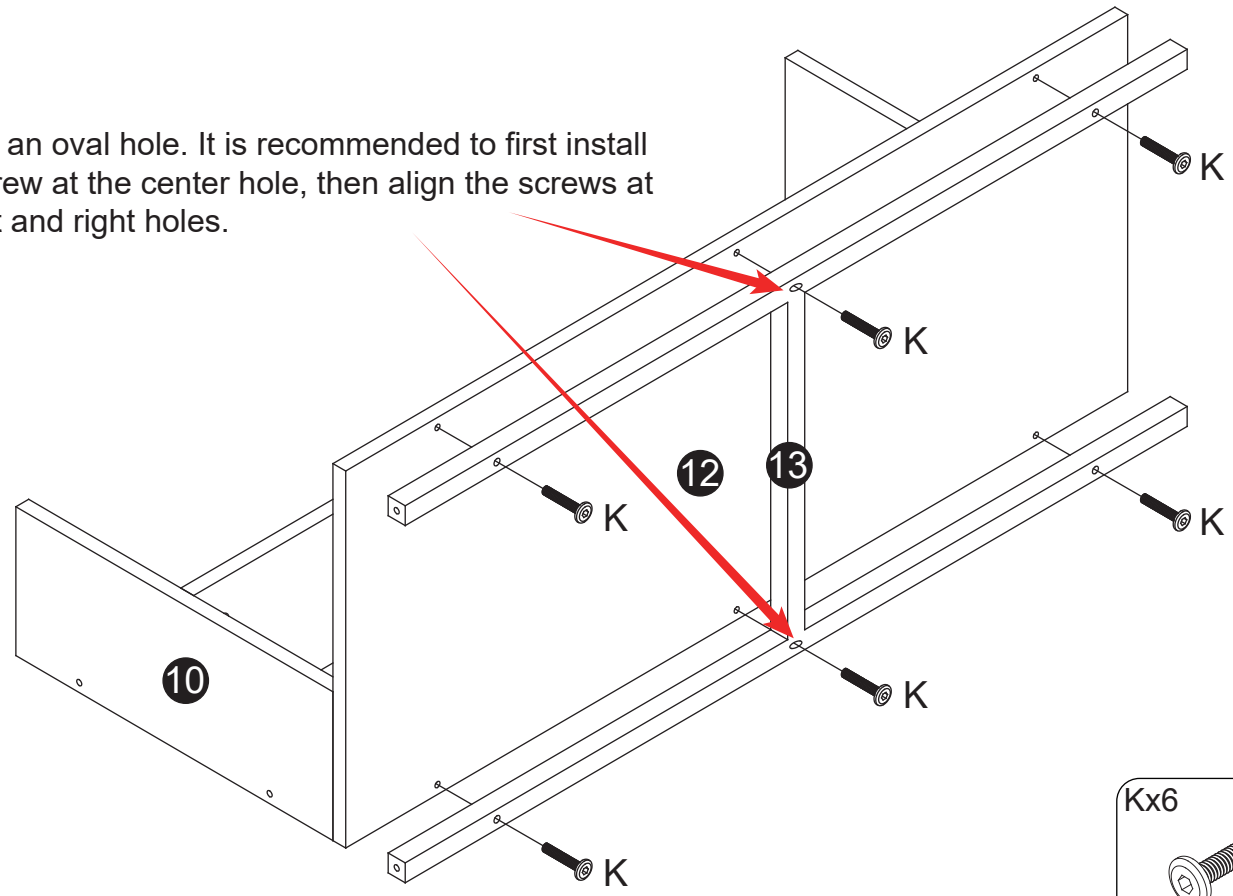

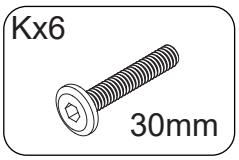

Please note that the hole indicated by the arrow is on the back side.

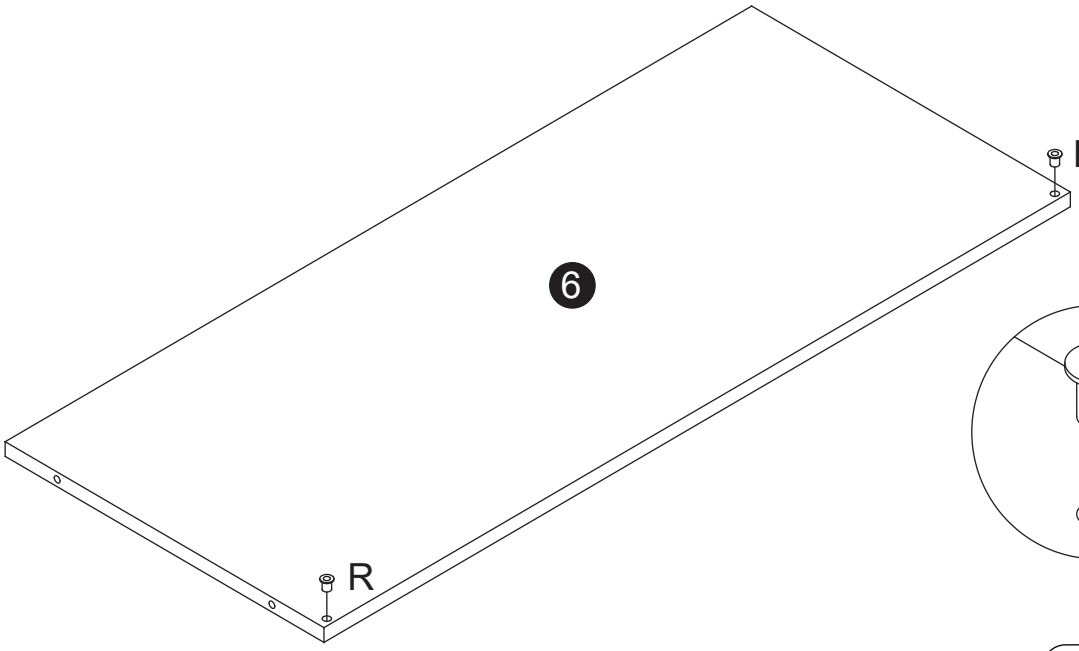

STEP 4

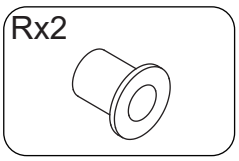

This is an oval hole. It is recommended to first install the screw at the center hole, then align the screws at the left and right holes.

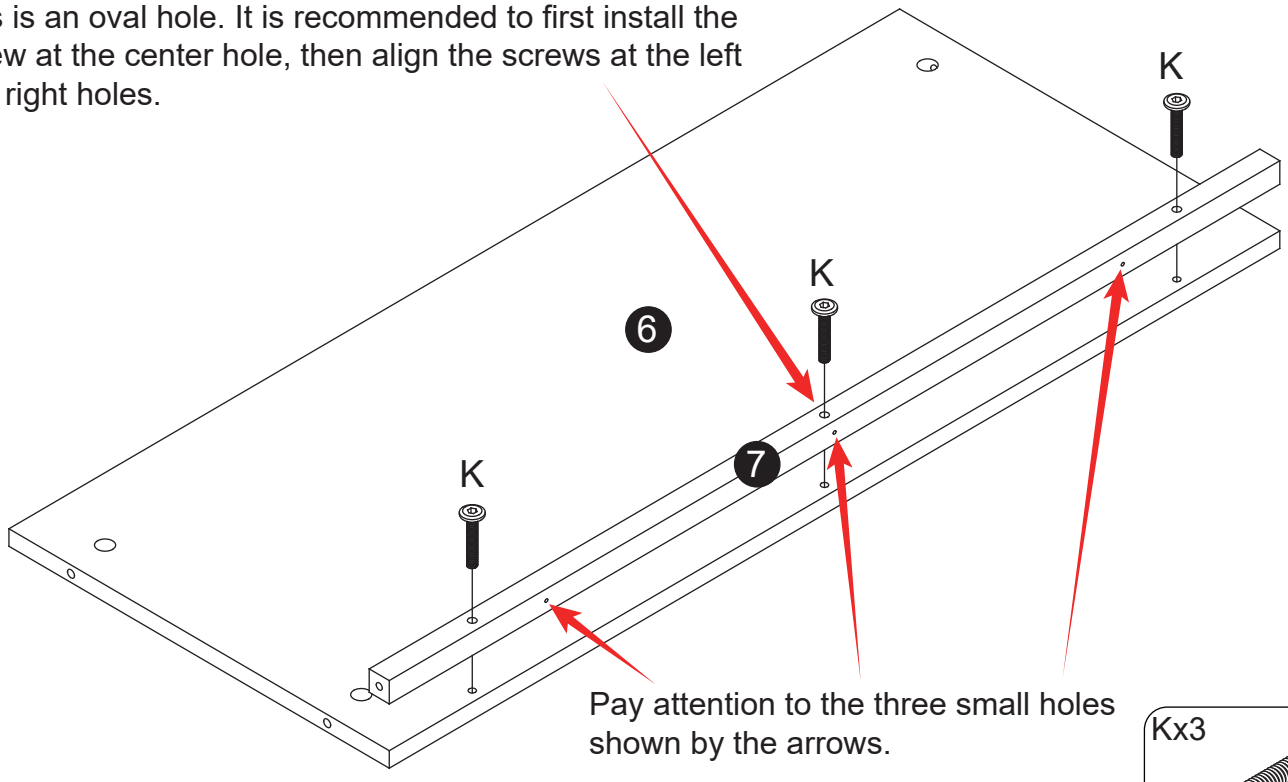

STEP 5

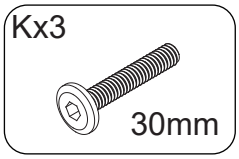

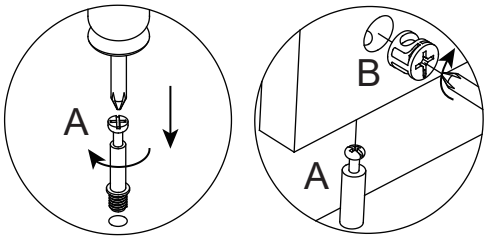

STEP 6

This is an oval hole. It is recommended to first install the screw at the center hole, then align the screws at the left and right holes.

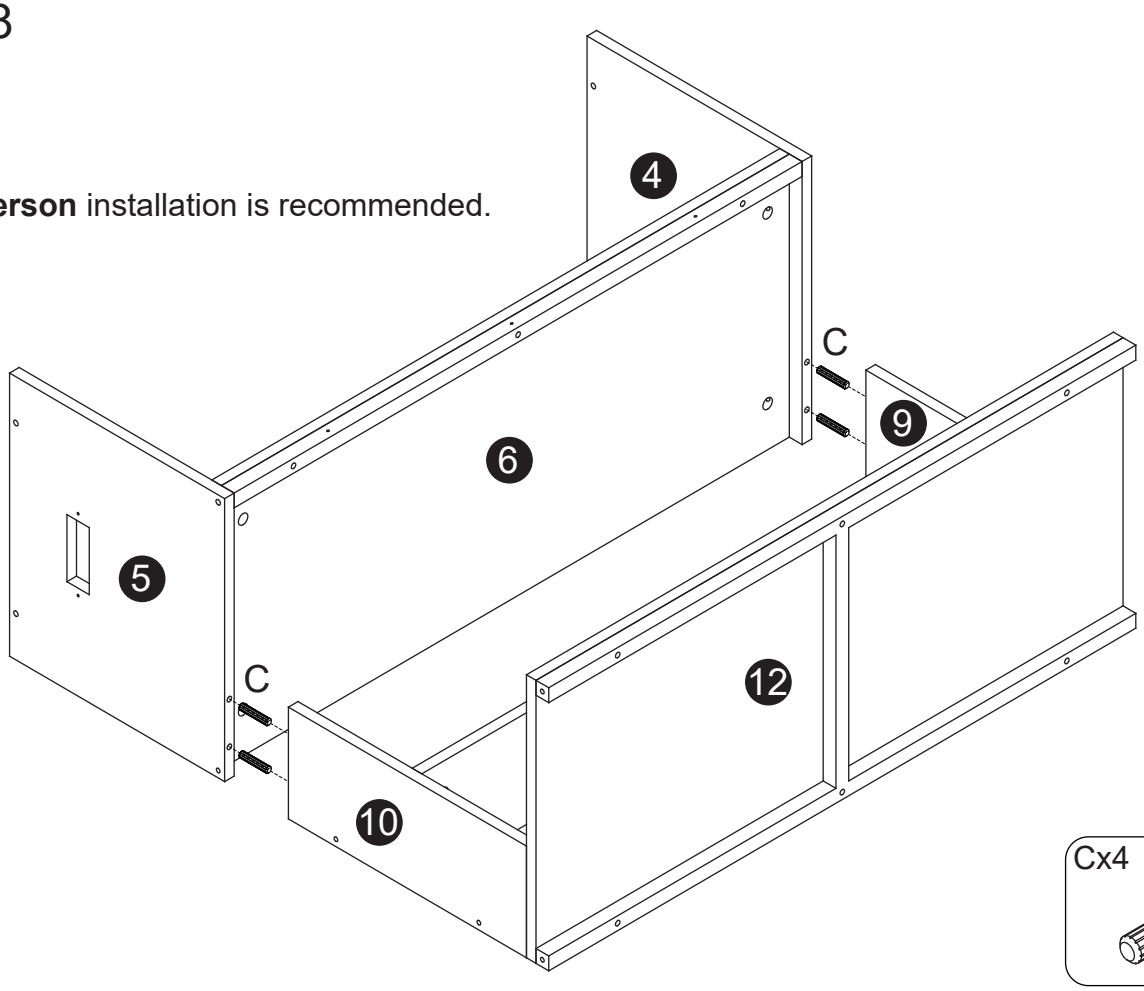

STEP 7

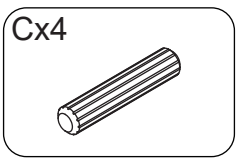

Please note that the two holes here should be at the top.

STEP 8

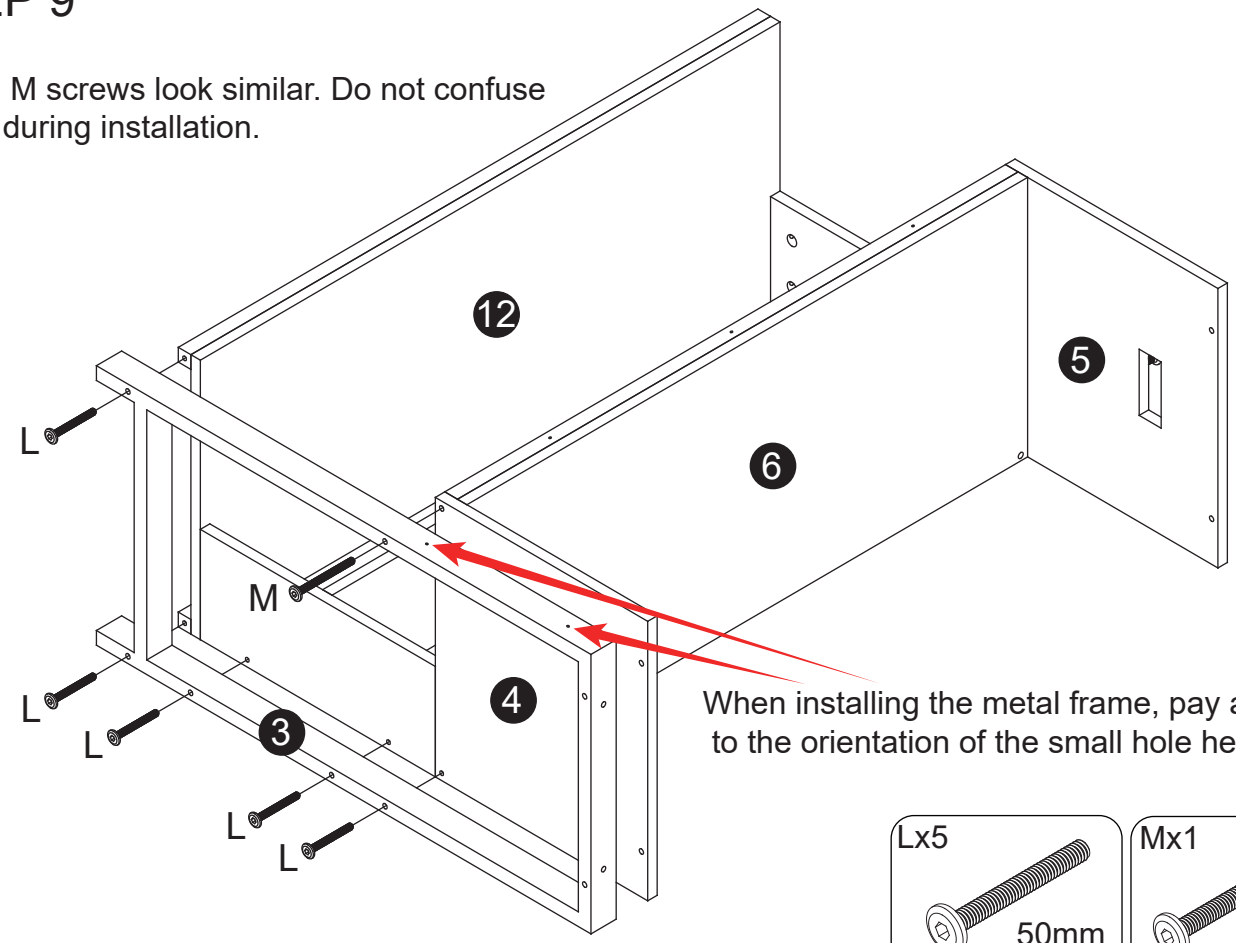

Two-person installation is recommended.

STEP 9

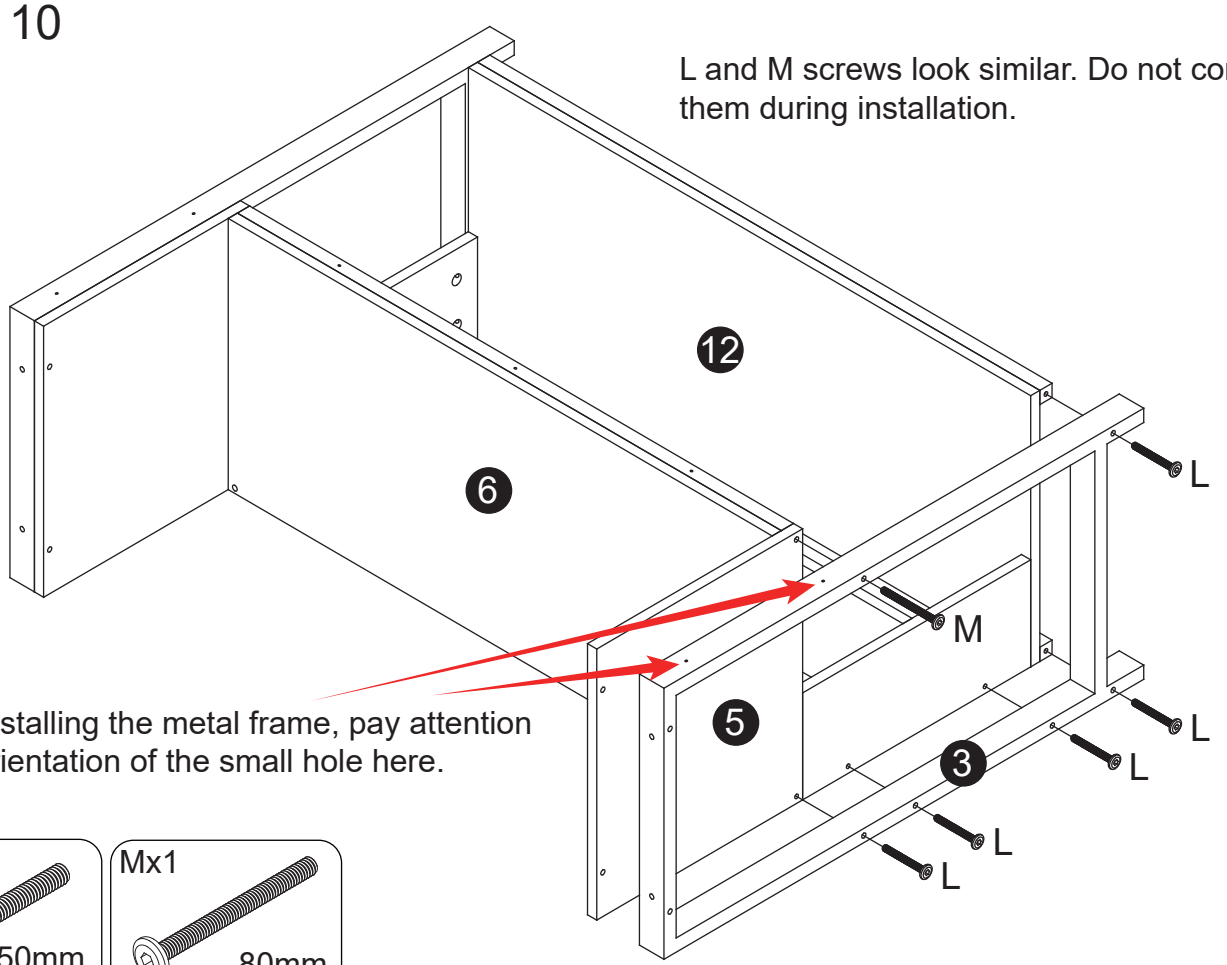

L and M screws look similar. Do not confuse them during installation.

When installing the metal frame, pay attention to the orientation of the small hole here.

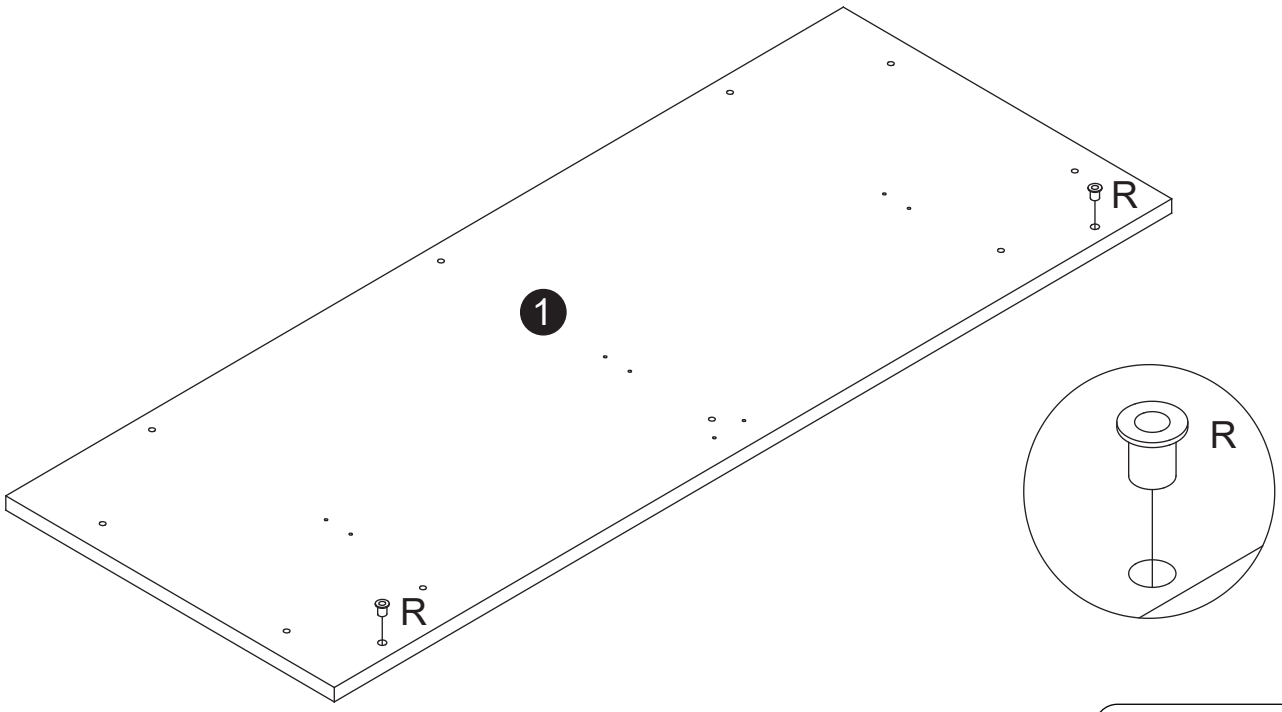

STEP 10

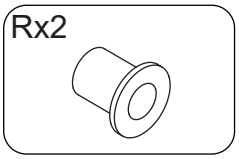

L and M screws look similar. Do not confuse them during installation.

When installing the metal frame, pay attention to the orientation of the small hole here.

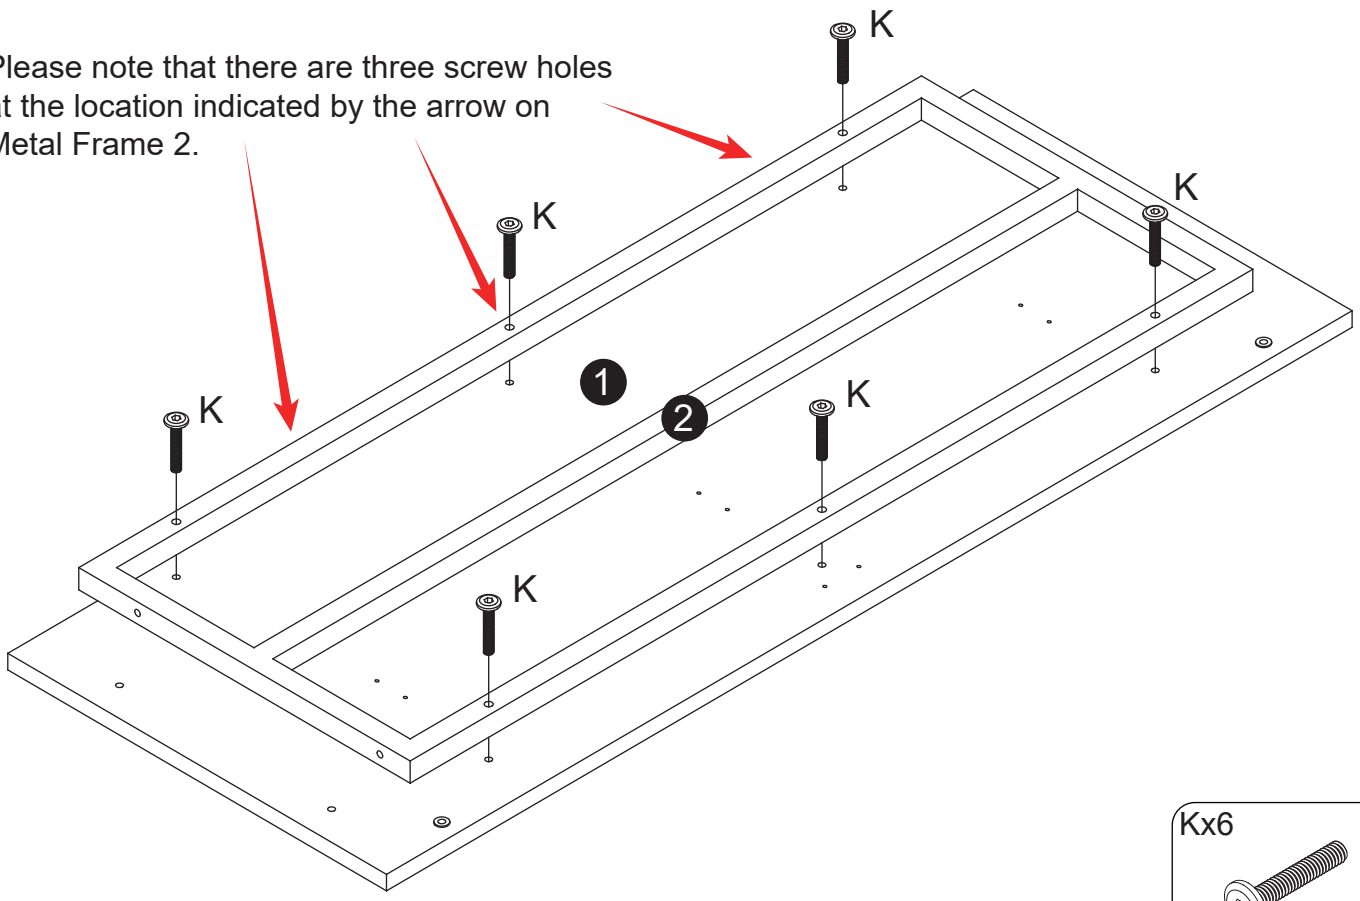

STEP 11

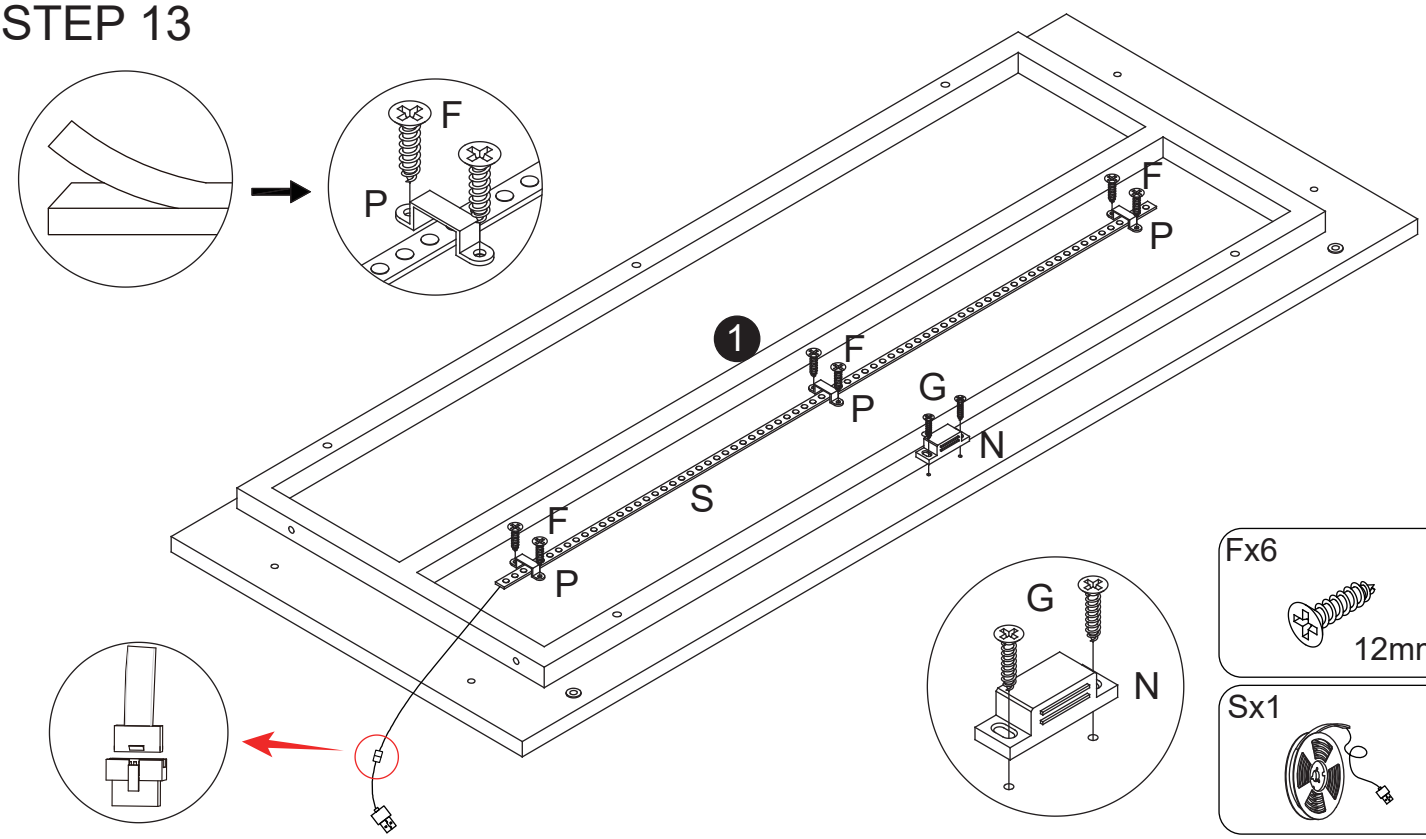

STEP 12

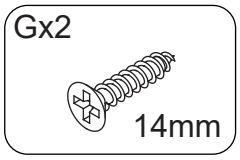

Please note that there are three screw holes at the location indicated by the arrow on Metal Frame 2.

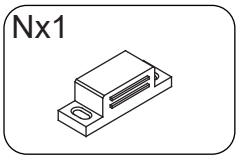

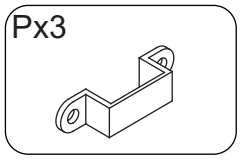

STEP 13

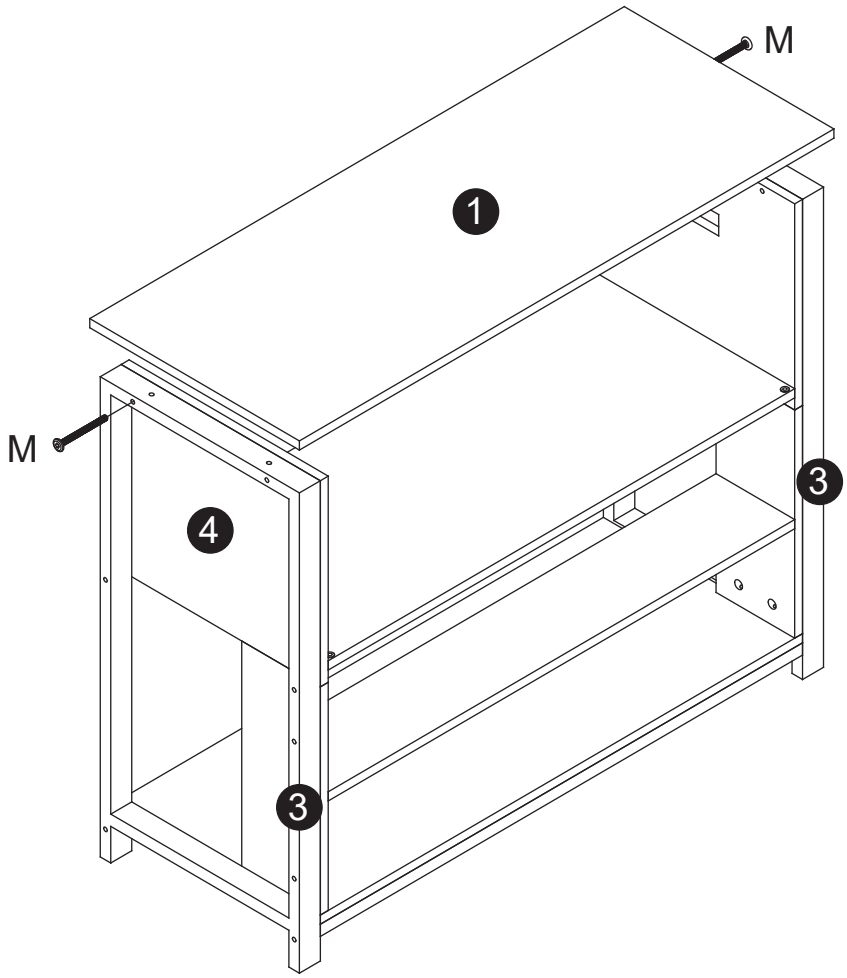

When connecting the light strip and the connector, please align them according to the detail drawing. The clips should face each other.

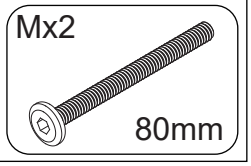

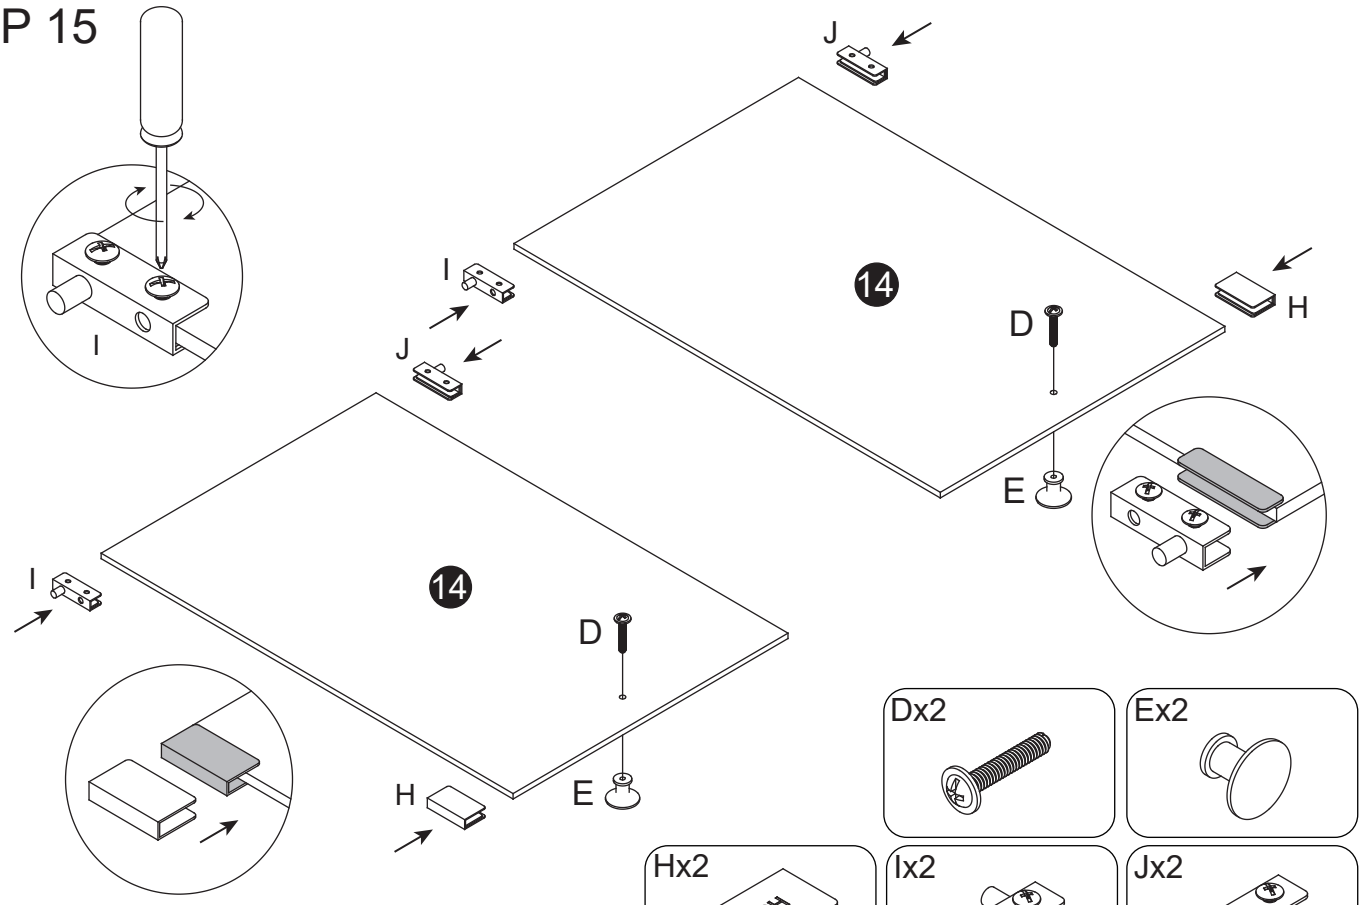

STEP 14

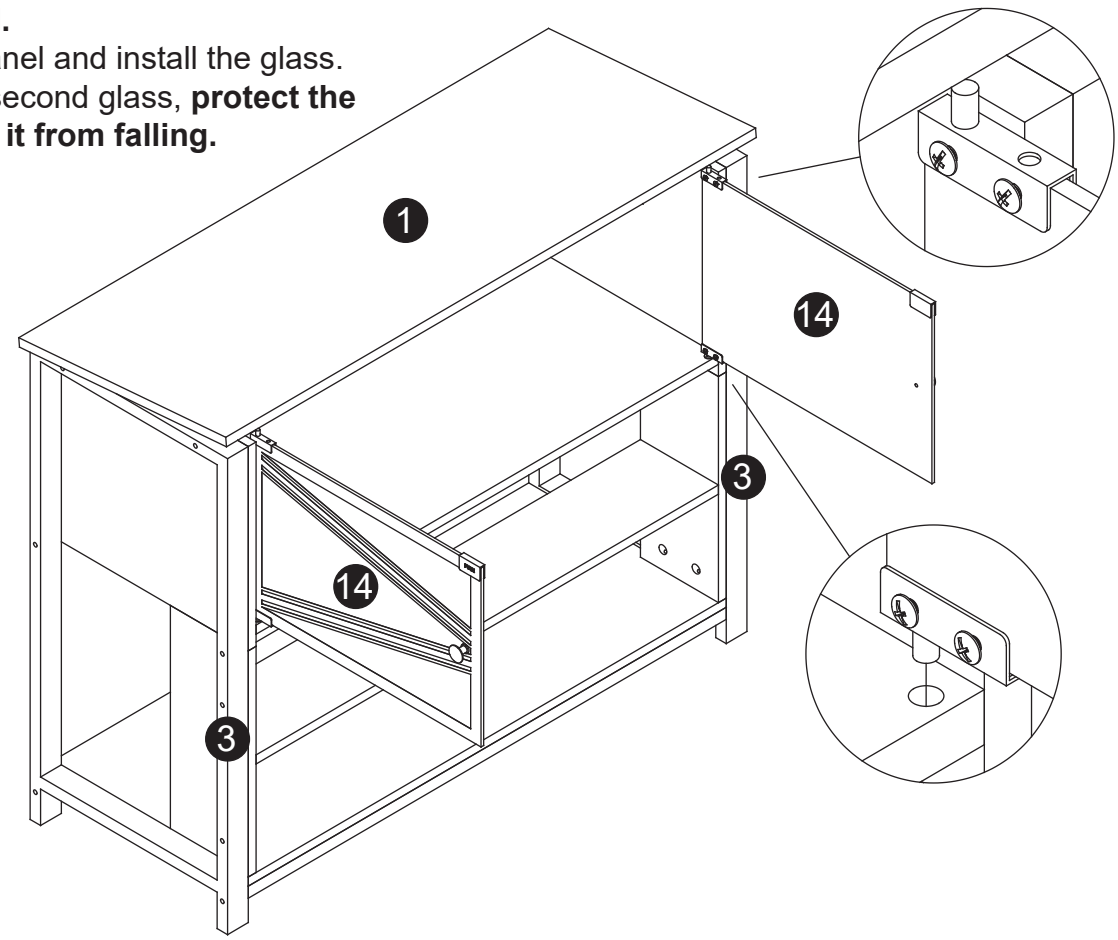

STEP 15

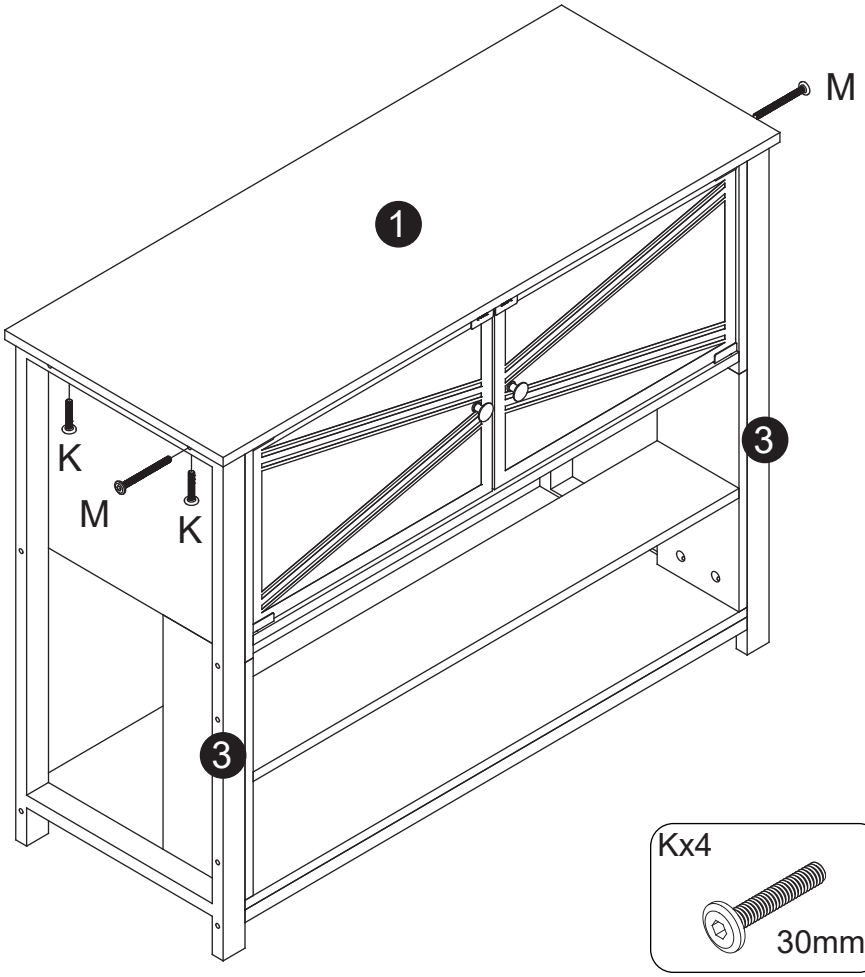

Install the anti-slip pad to the glass before the metal fixing plate.

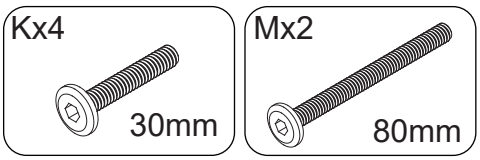

STEP 16

Two people needed.
Slightly lift the top panel and install the glass.
When installing the second glass, **protect the first one to prevent it from falling.**

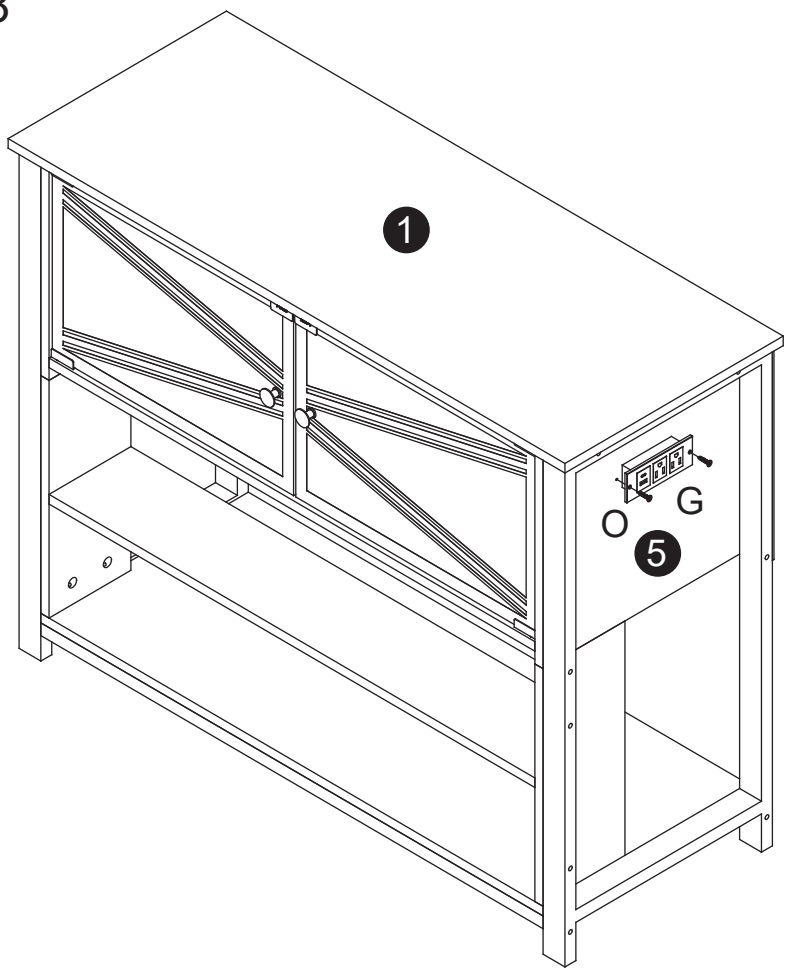

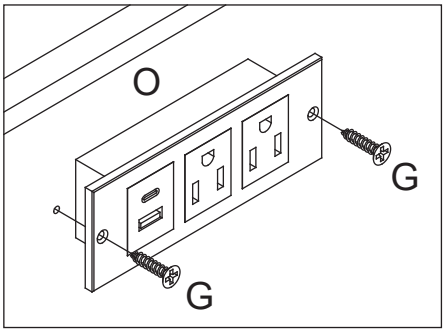

STEP 17

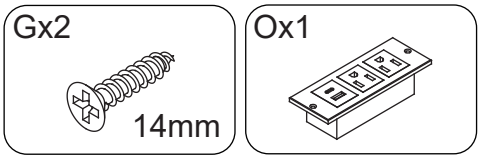

STEP 18

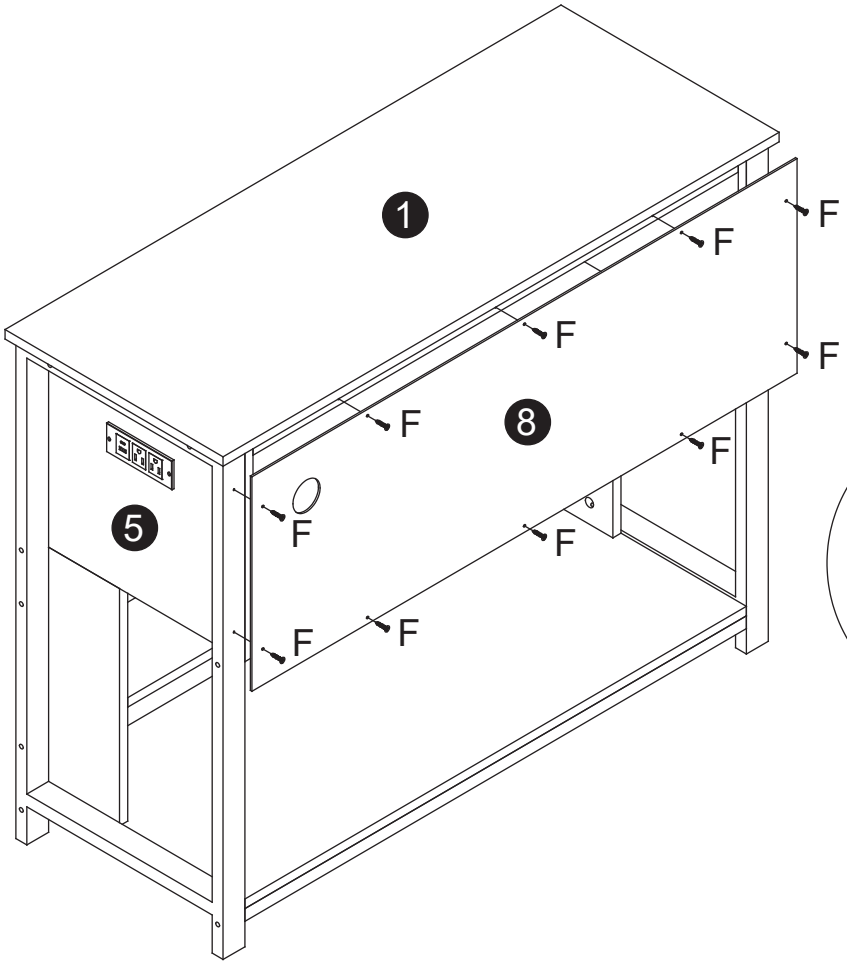

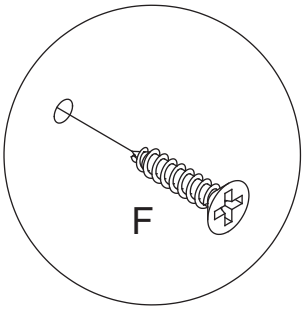

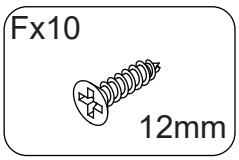

No hole provided. Drill directly.

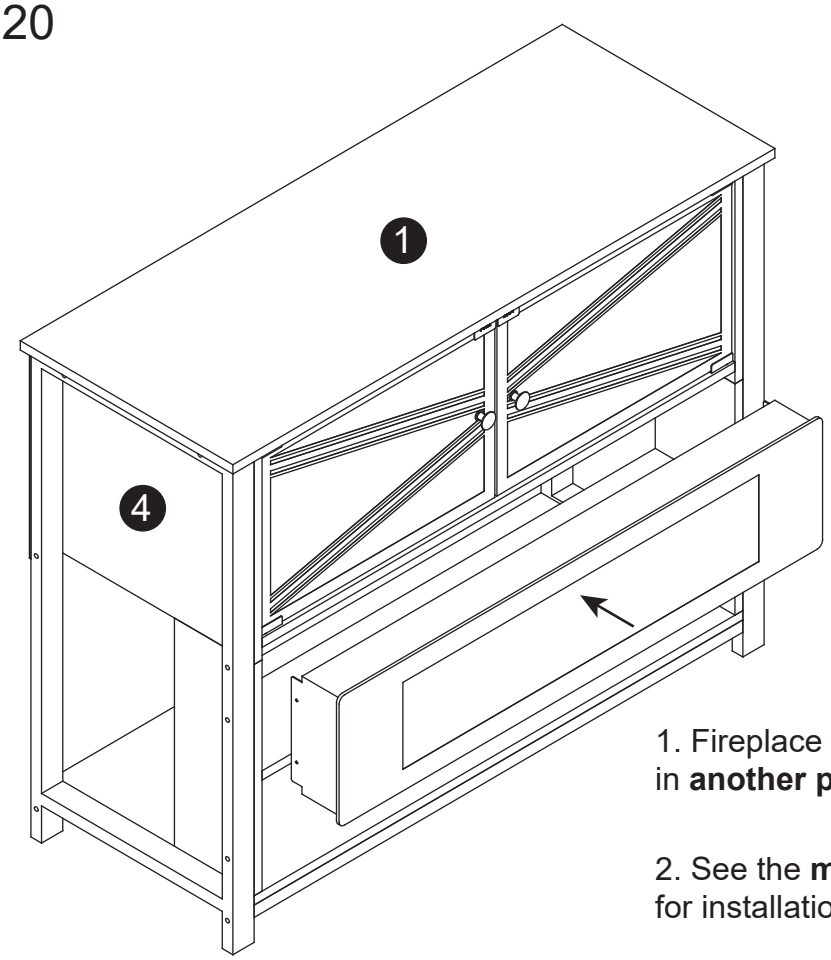

STEP 19

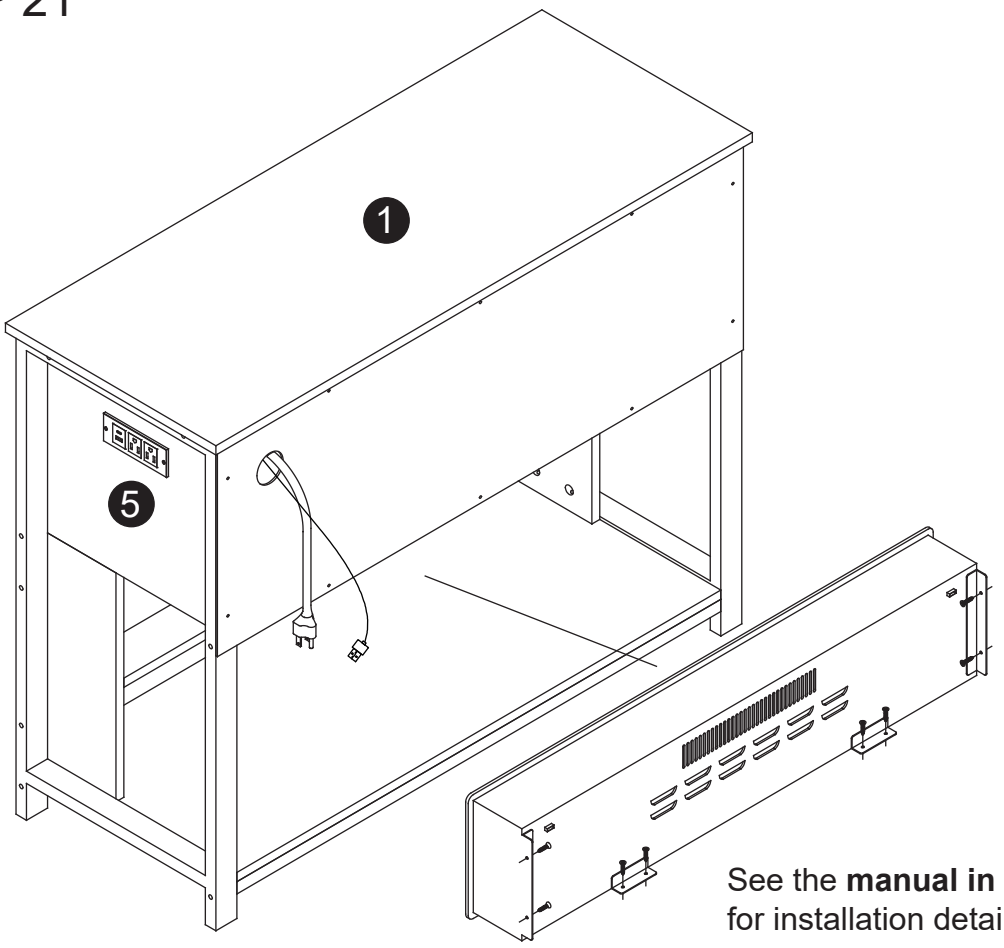

STEP 20

1. Fireplace and accessories will come in **another package**.

2. See the **manual in the fireplace package** for installation details.

STEP 21

See the **manual in the fireplace package** for installation details.

STEP 22
