Strokes of Viridian 2

D2808S56155-4705

Strokes of Viridian 2 is a remarkable landscape painted in an abstract style. Outlined in darker tones of cool grey, slate, and steel, the central focus is given to a narrow strip of light that brilliantly illuminates the sky. Textural brushstrokes in a palette of white smoke and light grey give the painting a serene outlook against a stormy framing. Along the horizon, a gently tilting onyx line creates a perception of moving waters. At the forefront, a swooping rounded form draws the eye. Near the middle, a small abstracted shape in charcoal grey adds a splash of color. Part of the carefully curated ART by TA collection, Strokes of Viridian 2 invites the viewer into a moment of peaceful contemplation. A beautiful companion piece to Strokes of Viridian 1.
