1
Take out the trunks and branches from the package.

2
Plug the branch into the trunk with corresponding number label. For example: "4-4". Tips: If it becomes necessary to remove the label, you may gently heat it with a hairdryer before carefully peeling it off. However, we do not recommend removing the label.

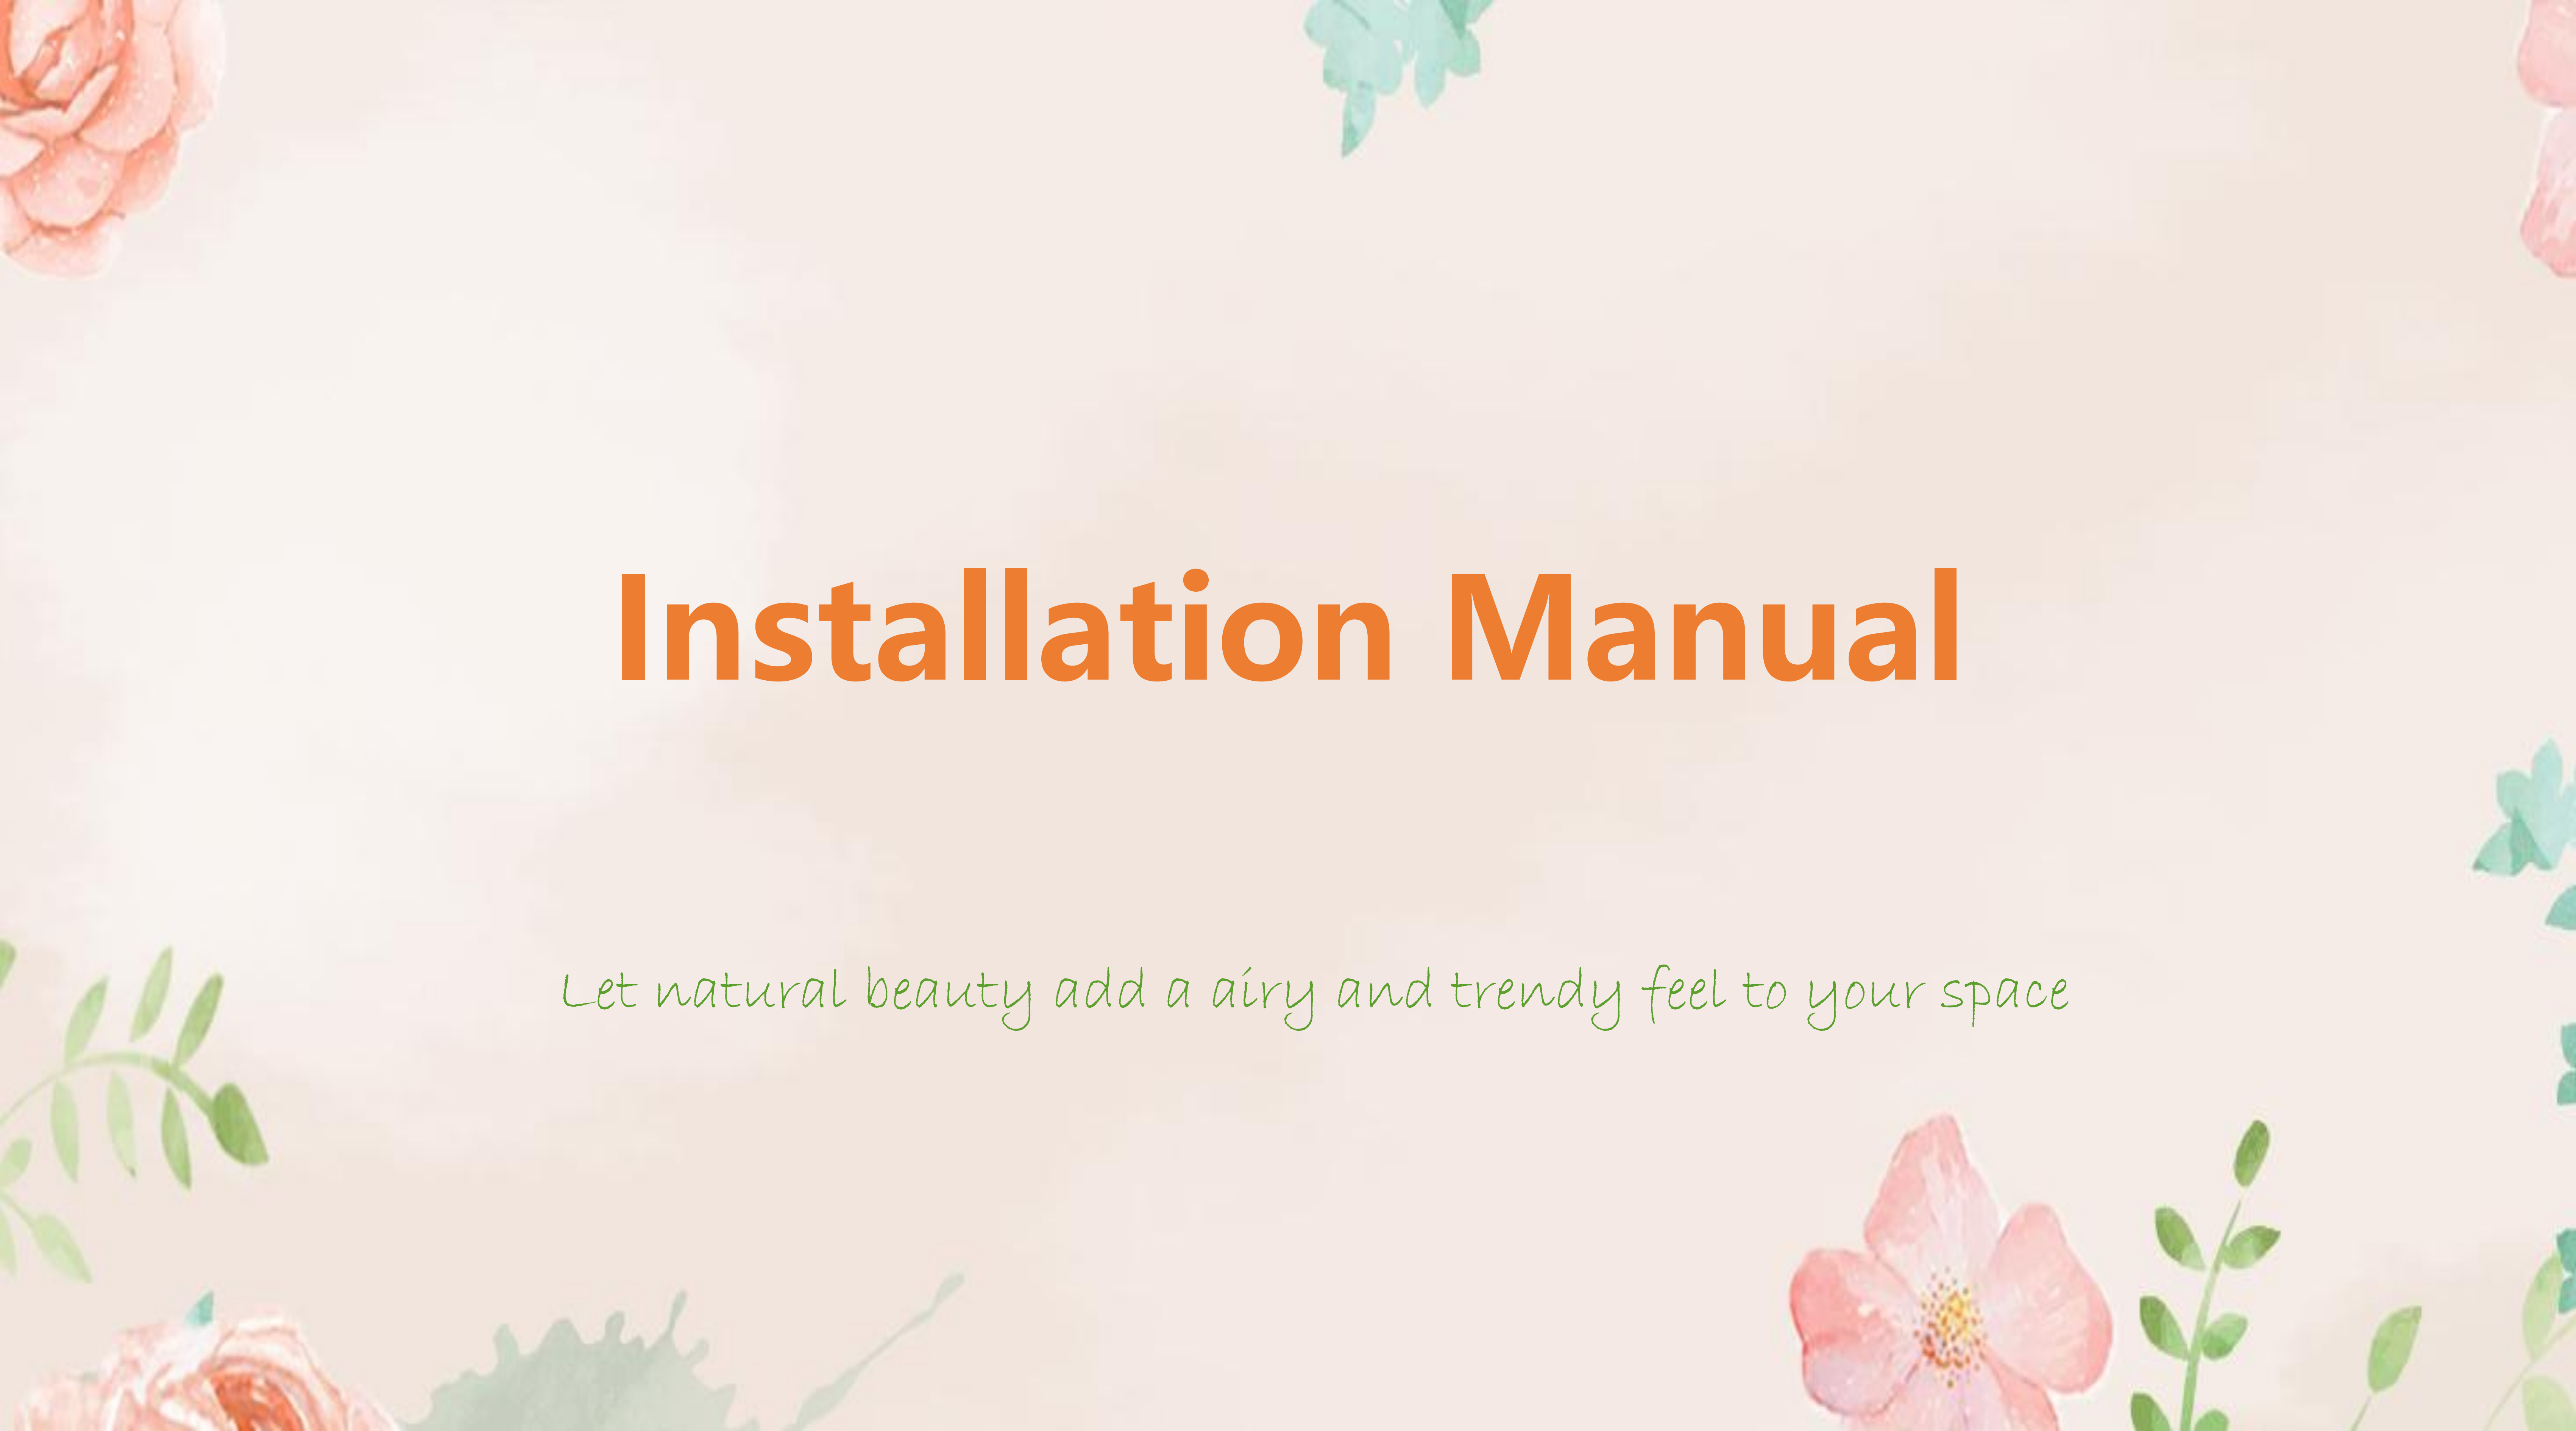

3
Bend branches and leaves gently to shape a full tree. Correct tilts or unevenness by adjusting angles and distribution. Packaging may press leaves, spread out gently or let unfold naturally. Tip: Adjust trunk as per main image for a lush photo look.

4
Since the tree is relatively tall, please place it in a larger planter and add stones to make it more stable.

TIP: Labels are random and may differ from the manual. Actual product prevails
The steps for this manual can be applied to all products that need to assemble.
