

## Manual

The LED candles made of real wax, with a remote control & timer. These are battery-operated candles designed to illuminate and accent any room of your home or provide lighting during evening parties outdoors. Each candle operates on 3x 1.5V AAA Batteries (not included) and because they do not have a real flame, they are safe to use almost anywhere, even near fabric and curtains.

**Please note:** Do not leave in hot sunlight, use outdoors if it is raining or keep outside permanently (They are NOT completely weatherproof)

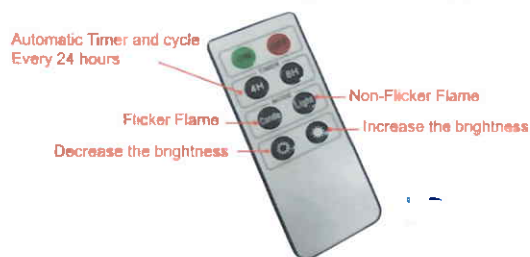

### Battery instructions:

- Open the compartment on the bottom of each candle.
- Insert 3x AAA 1.5V batteries into each candle. Do not mix different battery types. If candles do not operate, check battery polarity or replace old batteries with new.
- Replace the compartment covers and press the small switch to the "on" position.
- The Remote uses battery: 1x CR2025 (included). To replace it slide open the battery compartment on the remote control taking note of the battery's polarity and replace it with a new battery.
- Alkaline batteries will give the best performance and last longer.
- Do not use with rechargeable batteries.
- Please ensure that you use new batteries of the same brand and type. If one of the candles is not changing colours as it should then please change the batteries as describes above.

### Using The Remote control:

Each candle can only be individually controlled using the remote control if they are not placed in a cluster. Simply point the remote control at the candle and choose your setting

(please note that the remote control has a wide range and therefore may control other candles when pointed at a single candle)

The remote control functions are explained below:

To turn on your candle move the on/off switch on the base of the candle to the "on" position

**Power:** turn on the power switch. Press "ON/OFF" button to turn the candle ON/OFF

**Timer:** this is for setting the "burning" time to 4 or 8 hours. The candles will automatically turn off after the set time has elapsed.

**Mode Button:** There are 2 light modes for the mood light-flickering light and steady light. Press this button to switch between these 2 modes.

**Brightness:** You can control the brightness of each candle.
