Green Trace 3

D2206S44104-3572

Green Trace III is a fine art print of a Calathea Zebrina leaf that evokes the charm of a vintage accademia gallery wall of botanical illustrations. The plant is native to the tropical regions of Brazil and this print highlights the unique beauty of the leaf with its distinctive zebra-like stripes in varying shades of forest and sage green. The exotic texture is brought forward by the two symmetrical halves as smaller veins branch off the midrib of the leaf. The distinctive appearance and intriguing patterns make the Calathea Zebrina a popular choice among botanical art collectors.

An exquisite display of color and depth in a famous botanical form, Green Trace 3 is part of the carefully curated ART by TA Collection.
