

# Arch

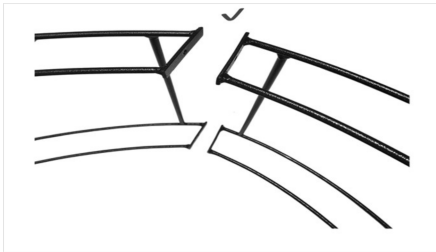

## Contents

2 x Side panels  
2 x Curve panels  
6 x Nuts and Bolts

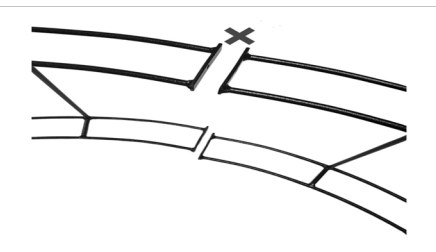

When attaching the top curves please ensure the end of the curve which has a cross bar 12" from the end plate is attached to the side panel.

The other end of the curve which has a cross bar 2" from the end plate meets at the top giving the gothic shape.

### CORRECT ASSEMBLY

### INCORRECT ASSEMBLY

**Please note** if the curves are assembled incorrectly the shape of the arch will be a very flat curve not a gothic shape.

## Soft ground mount

Ground spikes (Additional extra) attach ground spikes onto plates at the bottom of each side panel.

## Hard ground mount

We recommend raw bolts which can be found in any good DIY store.

# PRODUCT CARE

Thank You for choosing this garden product.  
With simple and sensible care this product should give many years of pleasure.

## Maintenance

If you accidentally knock or chip the arch, these can be touched up with black hammered effect metal paint such as hammerite.

All nuts and bolts should be painted with hammerite or good quality paint after assembly.
