

Self-irrigating Planters for Balconies

A self-irrigating planter with built-in water reservoir for hanging on a balcony rail.

Self-irrigating Planters for Balconies

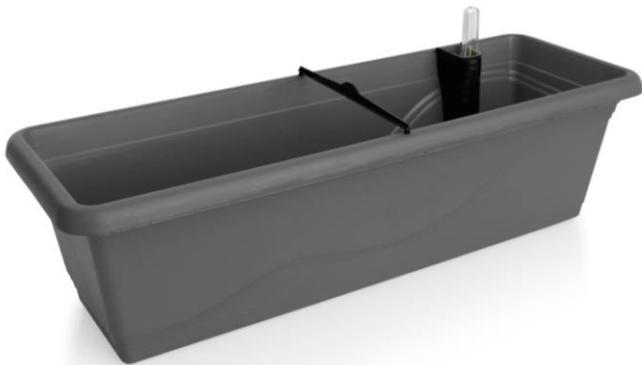

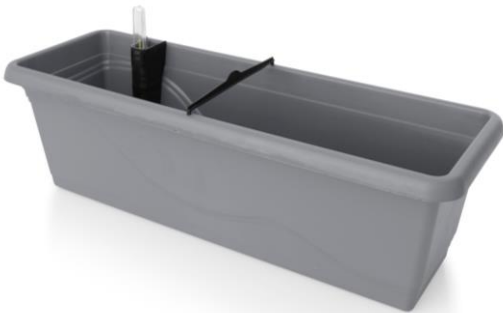

Take the guess work out of watering your plants by using the self-irrigating system built into these attractive planters.

To avoid damaging the roots of plants by over-watering, these innovative planters have a 'next generation' feature in the form of a water reservoir built into the base.

The water in the reservoir is 'wicked' upwards into the soil around the plant roots with the bag of Vermiculite included with each planter helping this process.

The water reservoir is fed by a filler tube which also houses a water level gauge so you can see at a glance when the water needs topping up.

Adjustable mounting brackets are included so the planters can be hung from a balcony rail.

Three sizes -
400mm
600mm
800mm

Two colours -
Anthracite
Stone Grey
