

## Specific operation

①

### Measure and cut

Get rid of foreign substances or dust from the surface where the peel and stick wallpaper will be attached. Adjust the paper to the surface and cut it 10-15mm larger than the actual size of the surface.

②

### Peel and stick

To separate the peel and stick wallpaper, attached cello tape on both edges of the sheet and pull the tape on both directions.

③

### Scratch

To attach the peel and stick wallpaper to the surface, press this product beginning from the center part towards the outer part while eliminating the remaining backing paper little by little.

④

### Smooth

If there exist air bubbles after attaching the peel and stick wallpaper, get rid of them with the use of a needle or the point of the knife (Except Paper Weave Products).
