THE CLEANING SPONGE HOLDER

START CLEAN • STAY CLEAN

SpongeBath is a sponge holder that stores and cleans your sponges – out of sight and in style. Your sponge will be fresh and clean every time you reach for it.

Our powerful Concentrated Cleaning Solution is designed specifically to work with SpongeBath to clean sponges. Our formula is derived from all natural, eco-friendly ingredients with you and your family in mind.

When you first start using SpongeBath, start with a new, clean sponge. Then, SpongeBath will continuously clean your sponge while it's being stored.

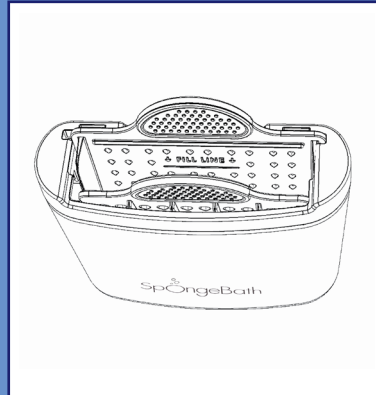

EASY SET-UP

1. POUR in 1 ounce (30 mL) of the Concentrated Cleaning Solution into the tub.

- * Use three capfuls, or use the helpful 1 ounce markings on the bottle label for easy measuring!

2. FILL the tub with water to the fill line on the back paddle.

- * Depending on the size of your sponge, you may need to add more water so the sponge is fully covered by the cleaning solution.

WHEN TO ADD MORE CONCENTRATED CLEANING SOLUTION?

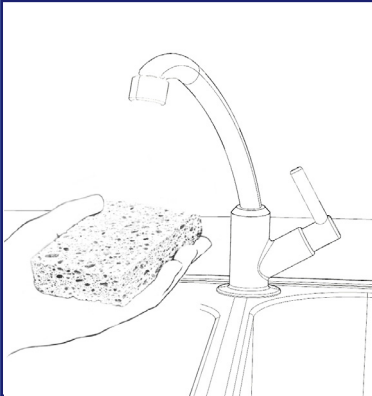

Add 1 ounce (30 mL) of the Concentrated Cleaning Solution once per week to replenish the cleaning solution.

- The cleaning solution will be effective for up to one week with normal use of your sponge.
- With heavier sponge use, replenish the cleaning solution more frequently.
- If you empty the tub for any reason, simply repeat the set-up process.

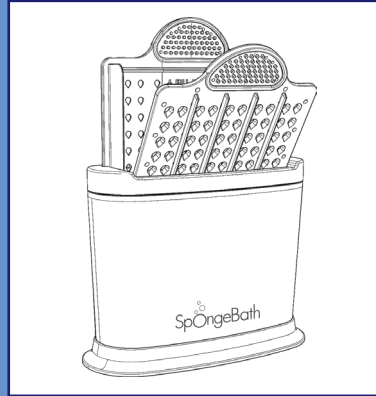

DIRECTIONS FOR USE

1. RINSE the sponge to remove all soap residue and any solid matter.

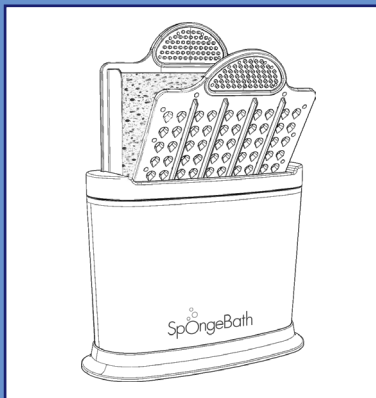

✱ For best results, rinse the sponge thoroughly!

2. From the closed position, SQUEEZE paddles and then RAISE paddles.

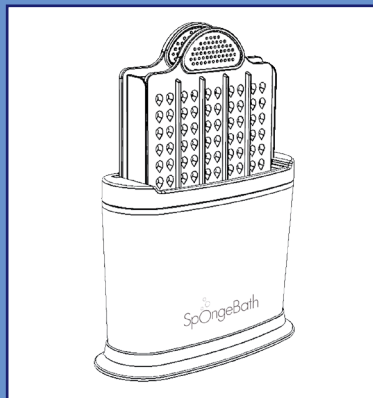

✱ Squeezing and raising slowly will avoid any splashes.

3. INSERT the sponge between paddles, then SQUEEZE paddles firmly together.

✱ Squeeze paddles together to compress the sponge before you lower into the tub.

4. LOWER paddles and RELEASE paddles at bottom into the lower locked position.

✱ Squeezing first and then lowering paddles will draw the cleaning solution into the sponge for deeper cleaning!

DIRECTIONS FOR USE (continued)

5. STORE your sponge in SpongeBath when not in use and you will have a fresh, clean sponge when you need it.

SpongeBath is a sponge cleaner & sponge holder!

- * Keep your sponge covered with the cleaning solution inside the tub. Just add some water from time to time, as necessary.
- * SpongeBath may not be effective against an old, super grimy sponge. Remember - start with a new, clean sponge and then stay clean!
- * When used as directed, SpongeBath kills 99.99% of odor-causing bacteria within 10 minutes.
- * The longer your sponge soaks, the cleaner it will be!
- * For stubborn stains, a longer soak time will be needed.

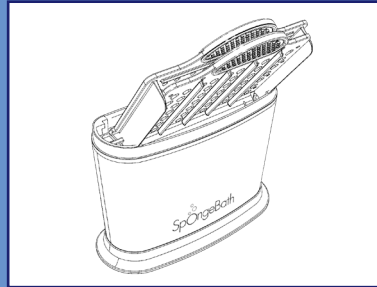

CLEANING SPONGBATH

Wash SpongeBath regularly in your dishwasher, or with hot soapy water.

1. To open: REMOVE the cap, then SQUEEZE and raise paddles to the top.

2. To remove paddles: At the top, TILT paddles slightly forward, then pull out at an angle and paddles will slide out easily.

3. To re-insert paddles, TILT paddles slightly forward first and then INSERT the back paddle's steel rod into the back guide track. TILT paddles back to vertical position and paddles will glide down easily. Release paddles at the bottom into the lower locked position.

WARNING: KEEP OUT OF REACH OF CHILDREN.

PRECAUTIONARY STATEMENTS: Avoid contact with eyes and skin. Wash hands after handling. Wear eye protection and gloves when handling concentrated product. Use only as directed. FIRST AID - IF IN EYES: Flush with water for 15 - 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. If irritation persists, seek medical attention. IF ON SKIN: Rinse skin thoroughly with soap and water. STORAGE AND DISPOSAL: Store out of reach of children and pets in original container in a cool area. Do not reuse empty container. Recycle empty container if available or discard in trash.

Sink Mounting Bracket

SpongeBath can also be
positioned within your sink
using SpongeBath's sink
mounting bracket. The sink
mounting bracket attaches
securely to most undermount
and overmount sinks. It has
strong suction cups so it won't
slip or slide.
