How to use the cam lock system

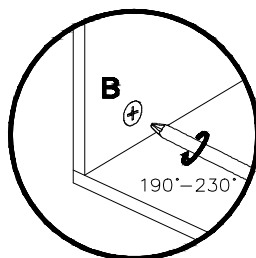

1. Screw cam bolt into panel

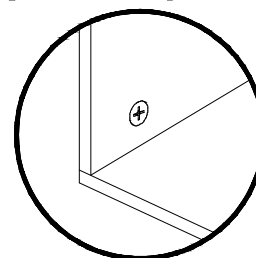

2. Push cam into panel - arrow feature on cam top points to panel edge

3. Align cam bolt(s) with cam(s) and insert all the way into cross-bored hole(s)

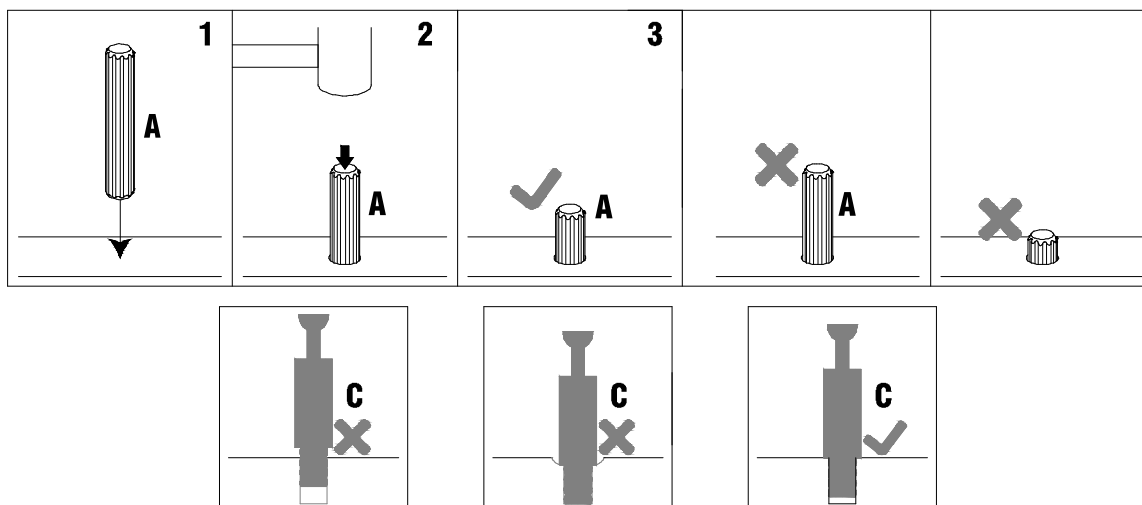

4. Rotate cam(s) clockwise 190°-230° to lock panels together

5. Panels should be tight against each other and connection should be rigid

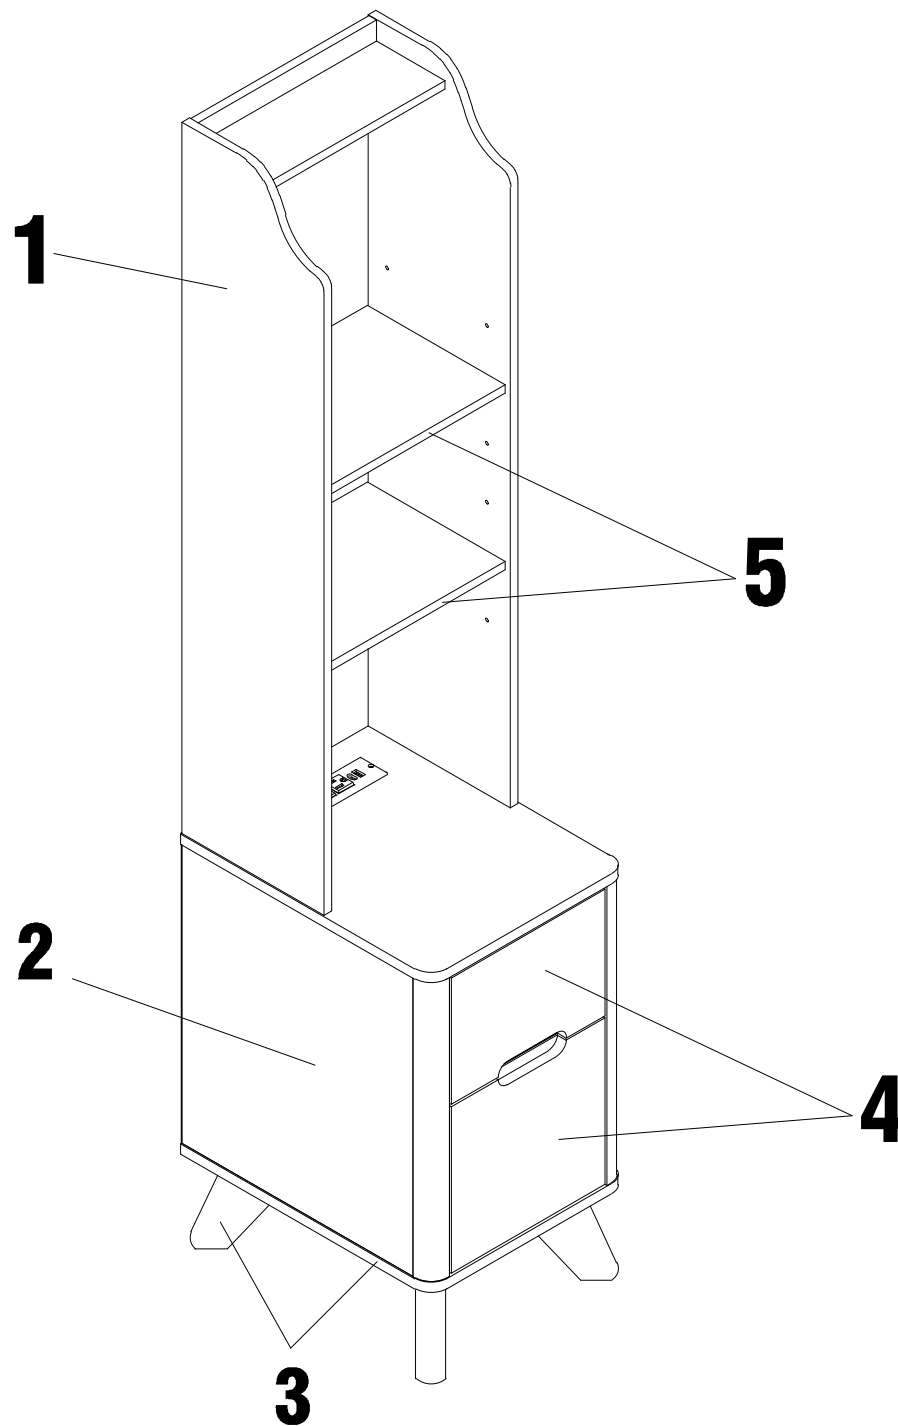

Insert the wood dowel (A) at least half way by tapping lightly with a rubber mallet, IF NECESSARY

⚠ WARNING

- Unit must be placed on a level surface or leveled with included hardware (when applicable).
- Do not sit or stand on or allow children to climb, sit or stand on the assembled product.
- For safety reasons, it is imperative that this unit be mounted to the wall.
- Do not use without installing the tip restraint.
- Unit can tip over causing severe injury or death.
- Do not exceed the recommended weight limits.
- Evenly distribute the weight on each level and always keep the heavier loads on the bottom.
- Before cutting, drilling or hammering into any wall or floor surface, verify the location of electrical, plumbing and gas lines. Cutting may cause serious injury.

Now you can assemble the item.

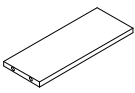

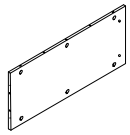

The installation process is divided into three parts:

1. Install the TOP part of the cabinet
2. Install the MIDDLE part of the cabinet
3. Install the BOTTOM part of the cabinet
4. Install the DRAWERS
5. Install the SHELVES

Tip:

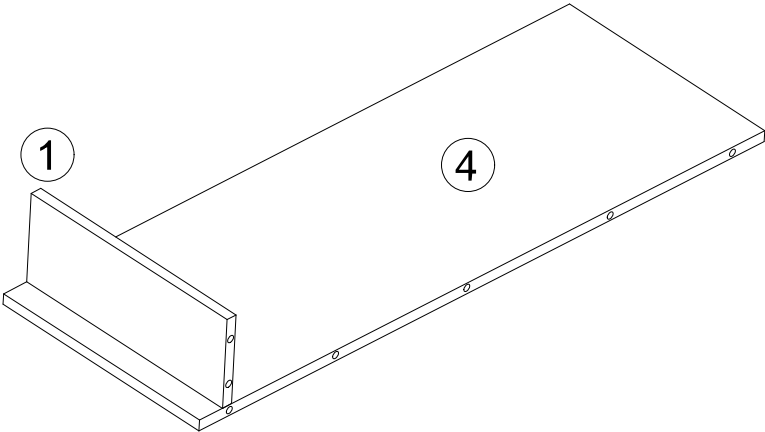

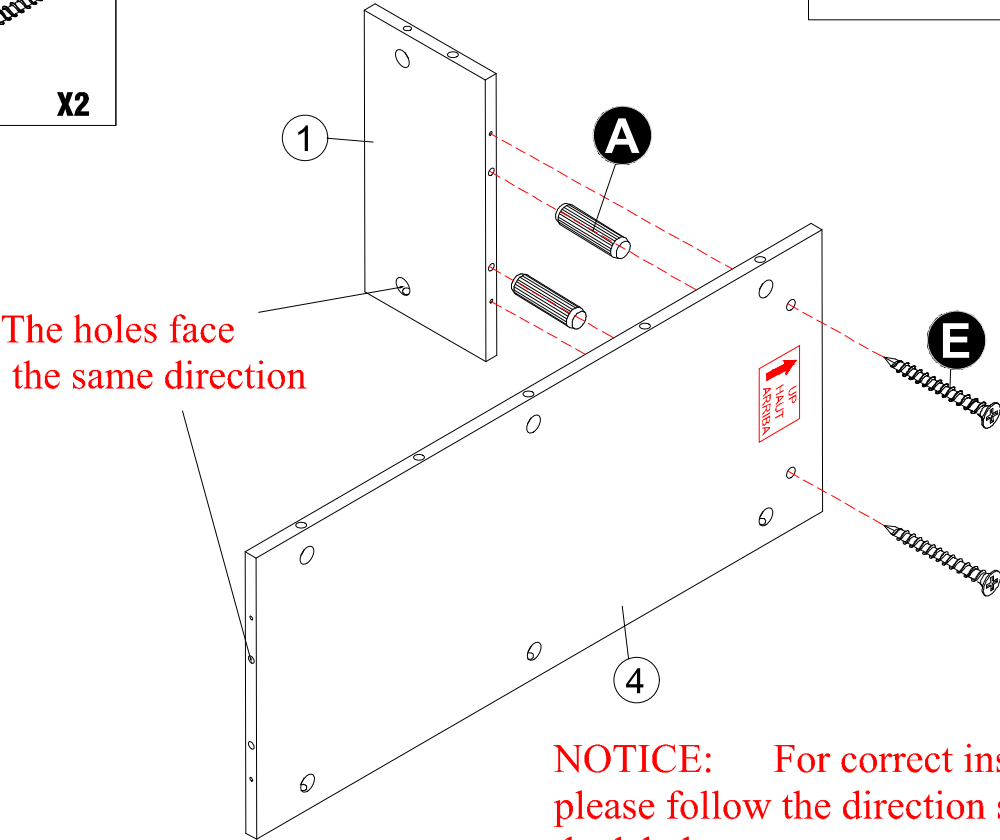

Using an electric screwdriver will make assembly easier.

STEP 1 Assemble The Top Panel And Back Panel

facing the same direction

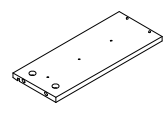

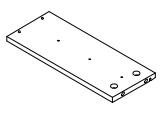

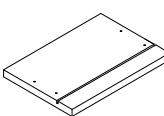

STEP 16 Assemble The Upper (Small) Drawer

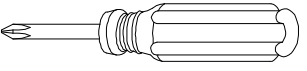

STEP 17 Assemble The Upper (Small) Drawer

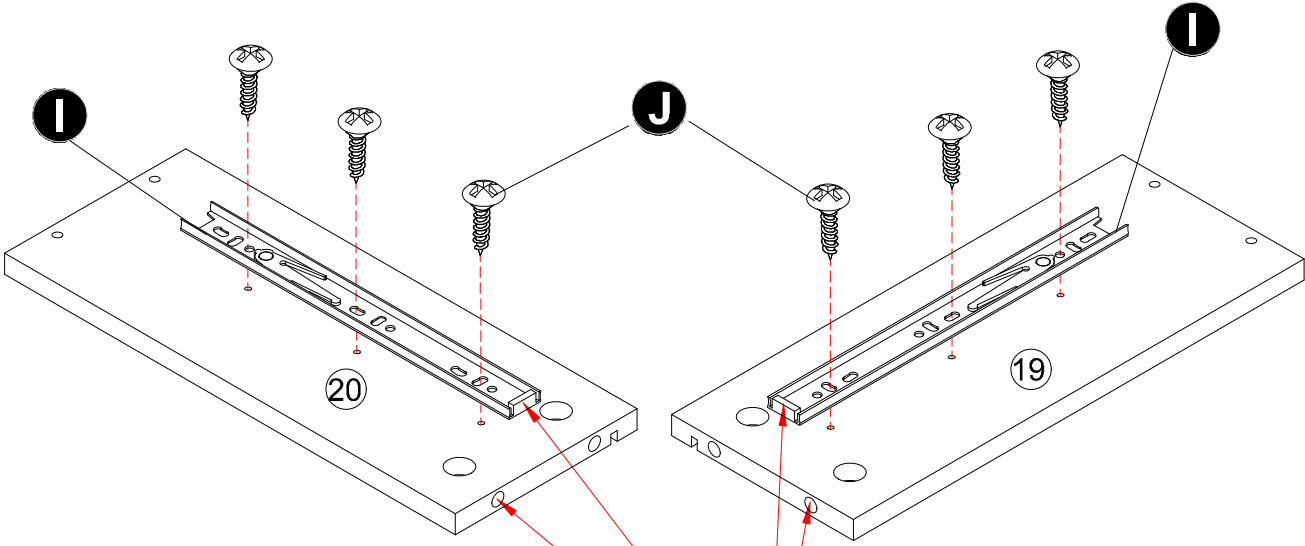

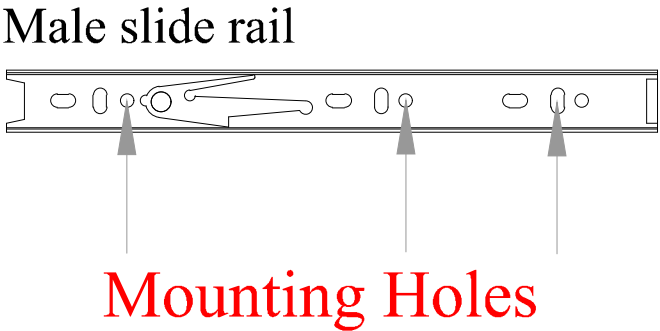

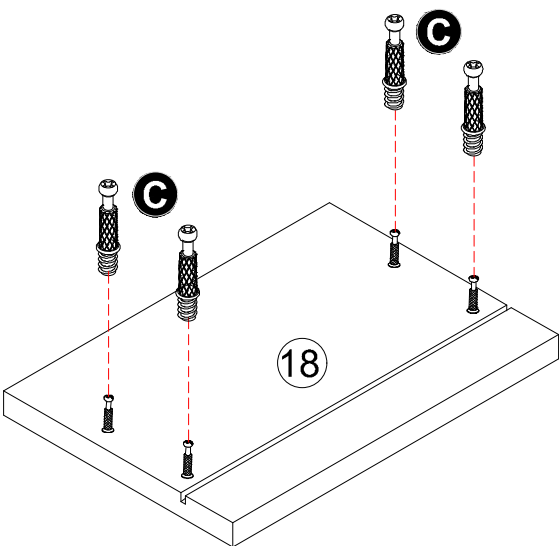

STEP 18 Assemble the lower drawer

 19 X1	 20 X1	 18 X1	 C X4
 I X2	 J X6		

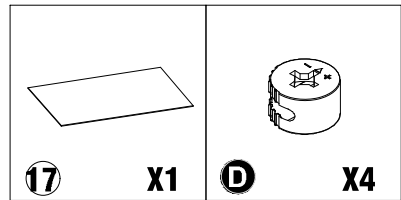

Philips
Screwdriver
(Not Included)

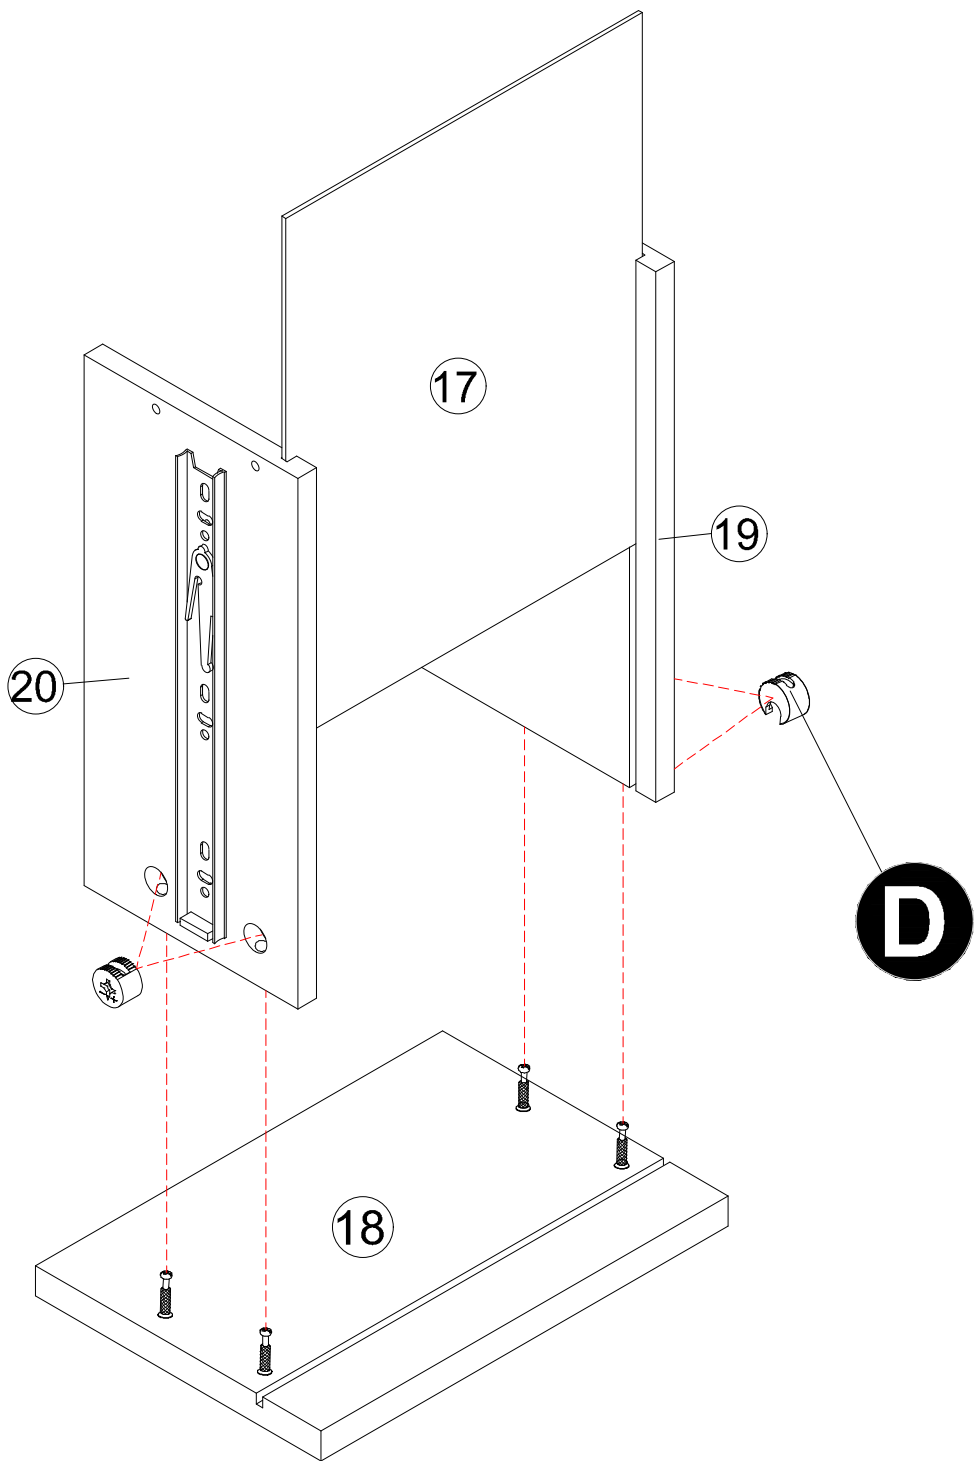

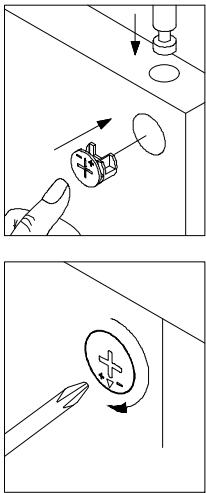

The end and the cam bolt holes
facing the same direction

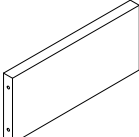

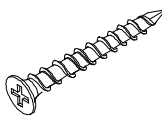

STEP 19 Assemble the lower drawer

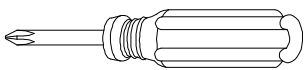

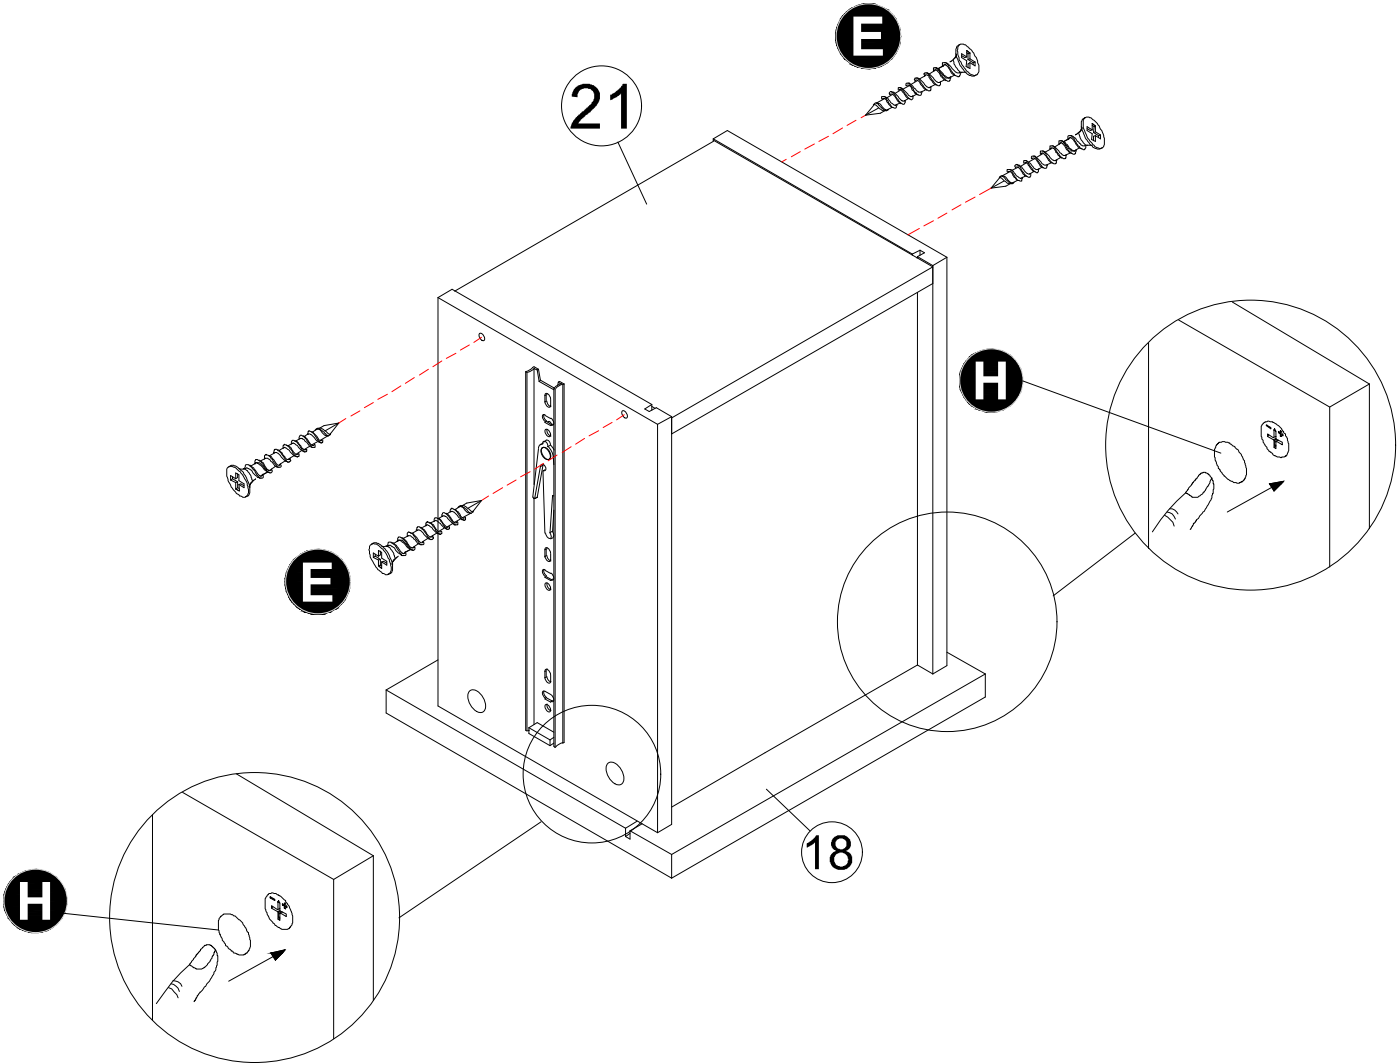

This drawer has a large surface area and is relatively heavy. It is recommended to place it in the lower part of the cabinet, which can improve the stability of the unit and make it safer and more convenient to use.

STEP 20 Assemble the lower drawer

		
21 X1	H X4	E X4

Philips
Screwdriver
(Not Included)

STEP 21 Drawer Installation Steps

Drawer Installation Steps

Step 1: Pull Out Inner Ball Bearing Slides

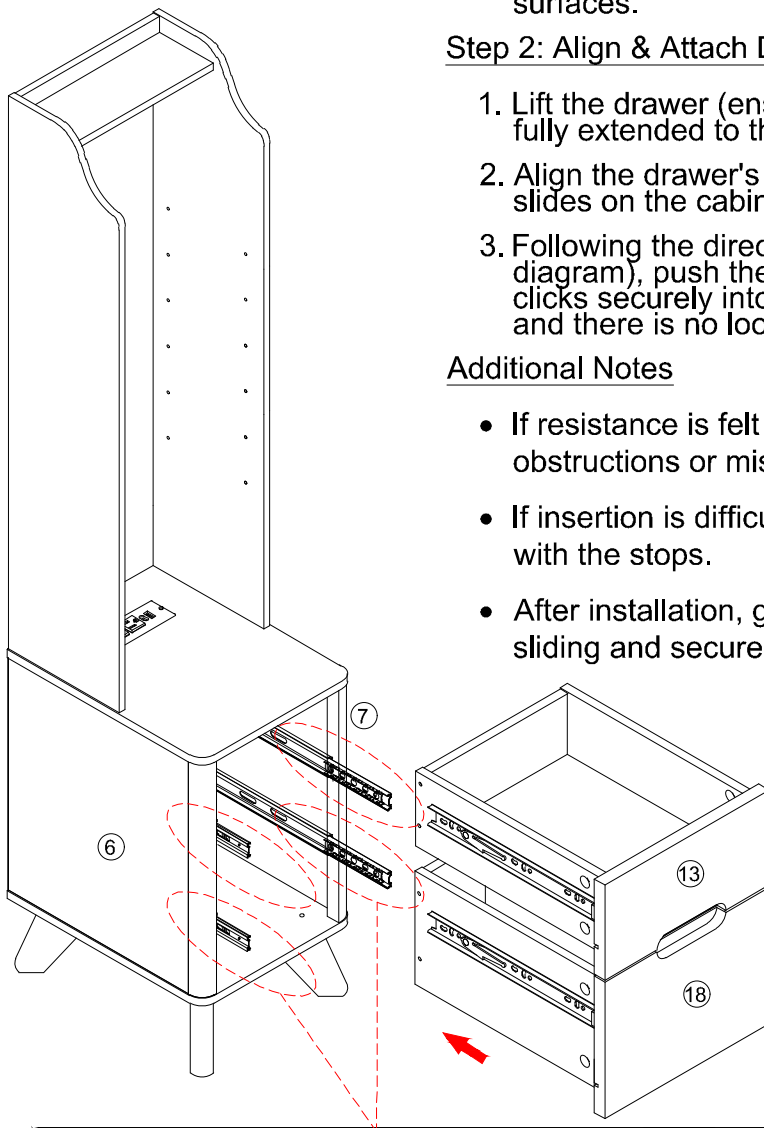

1. Locate the inner ball bearing slides on both sides of the drawer (or at the corresponding positions).
2. Grasp the slides and pull out slowly and steadily until they reach the stops (the point where they can no longer be extended).
3. **⚠Note:** The slide surfaces may be slightly greasy. Handle with care to avoid slippage or soiling clothing/work surfaces.

Step 2: Align & Attach Drawer to Cabinet Slides

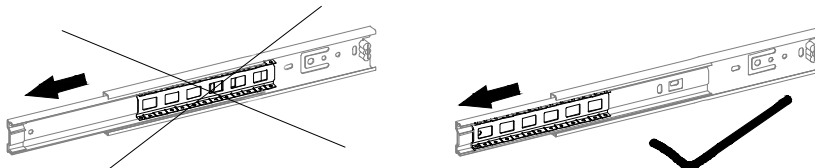

1. Lift the drawer (ensuring its inner ball bearing slides are fully extended to the stops).
2. Align the drawer's inner slides with the corresponding outer slides on the cabinet (or brackets).
3. Following the direction of the arrows (black arrows in the diagram), push the drawer smoothly into the cabinet until it clicks securely into the slides. Ensure movement is smooth and there is no looseness.

Additional Notes

- If resistance is felt while pulling the slides, check for obstructions or misalignment.
- If insertion is difficult, verify that the slides are fully aligned with the stops.
- After installation, gently pull the drawer to confirm smooth sliding and secure locking.

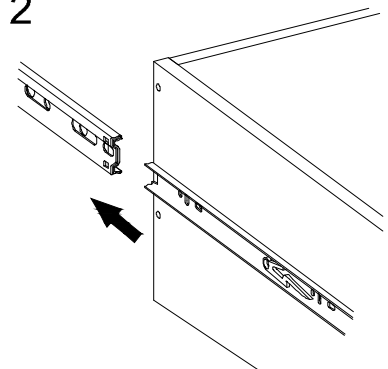

1

NOTE: Pull the inner ball bearing slides on each side all the way out till it stops.(may be slightly greasy).

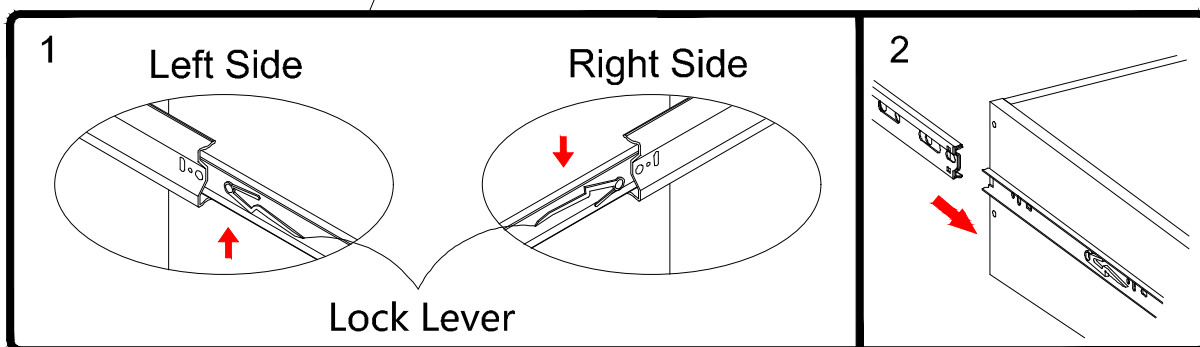

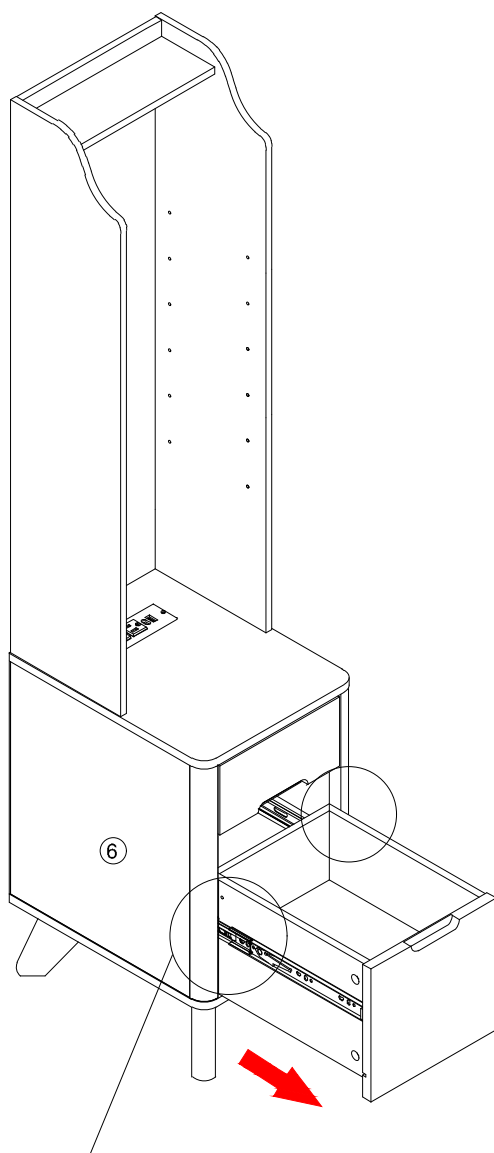

2

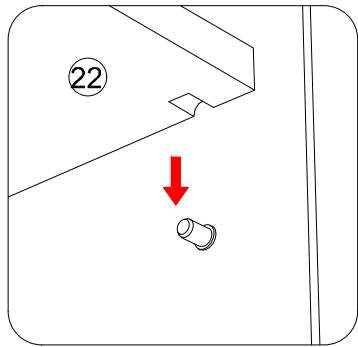

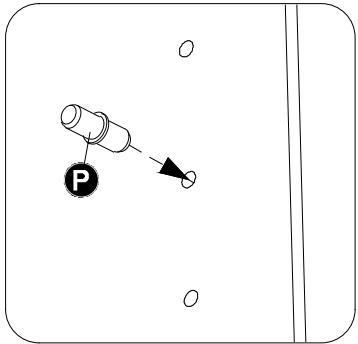

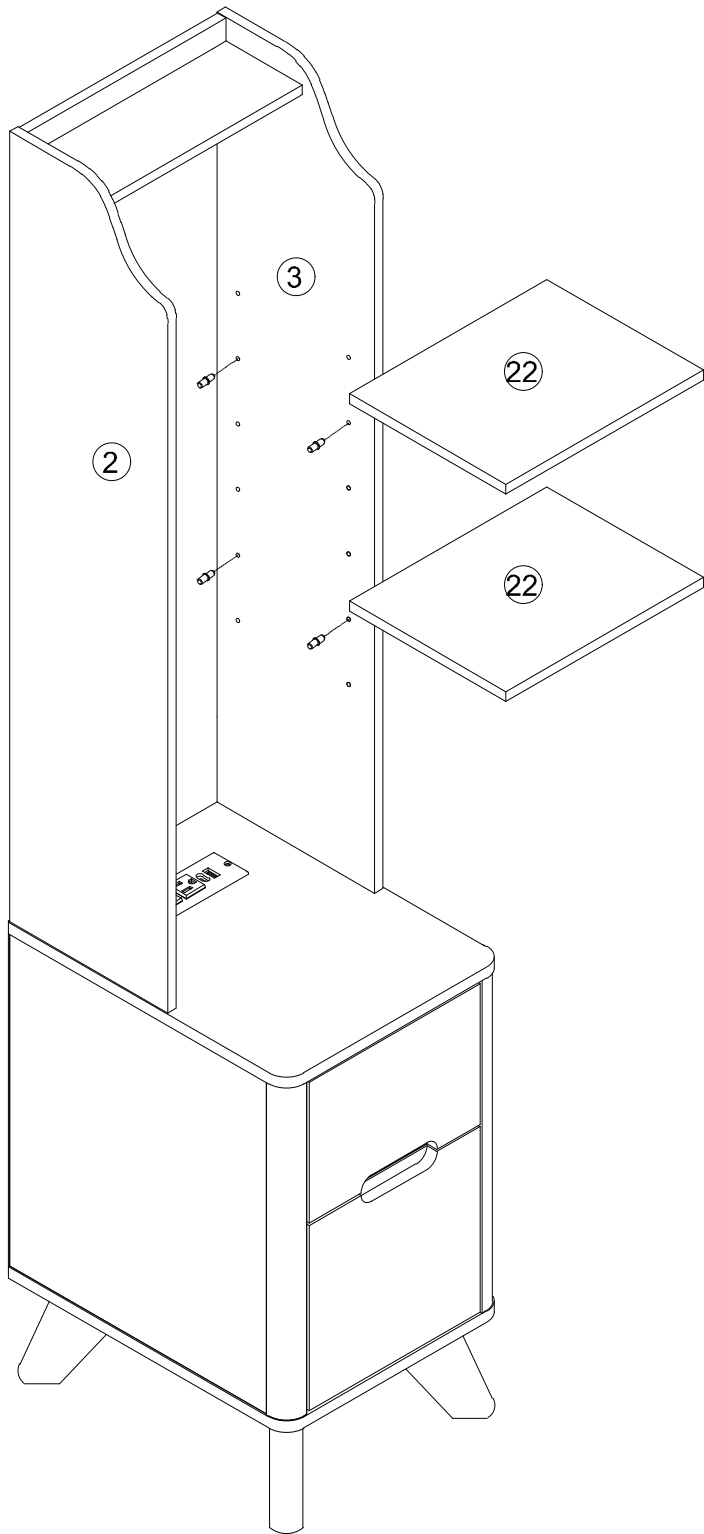

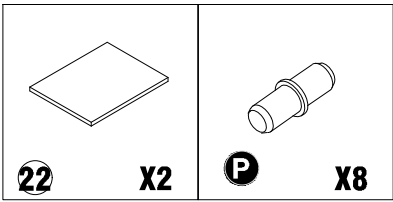

STEP 22 Remove Drawer

To Remove Drawer, If Needed

- Pull the drawer fully open so levers are visible.
- Push up on left side lever and down on right side lever.
- Holding levers in place, pull drawer toward you.

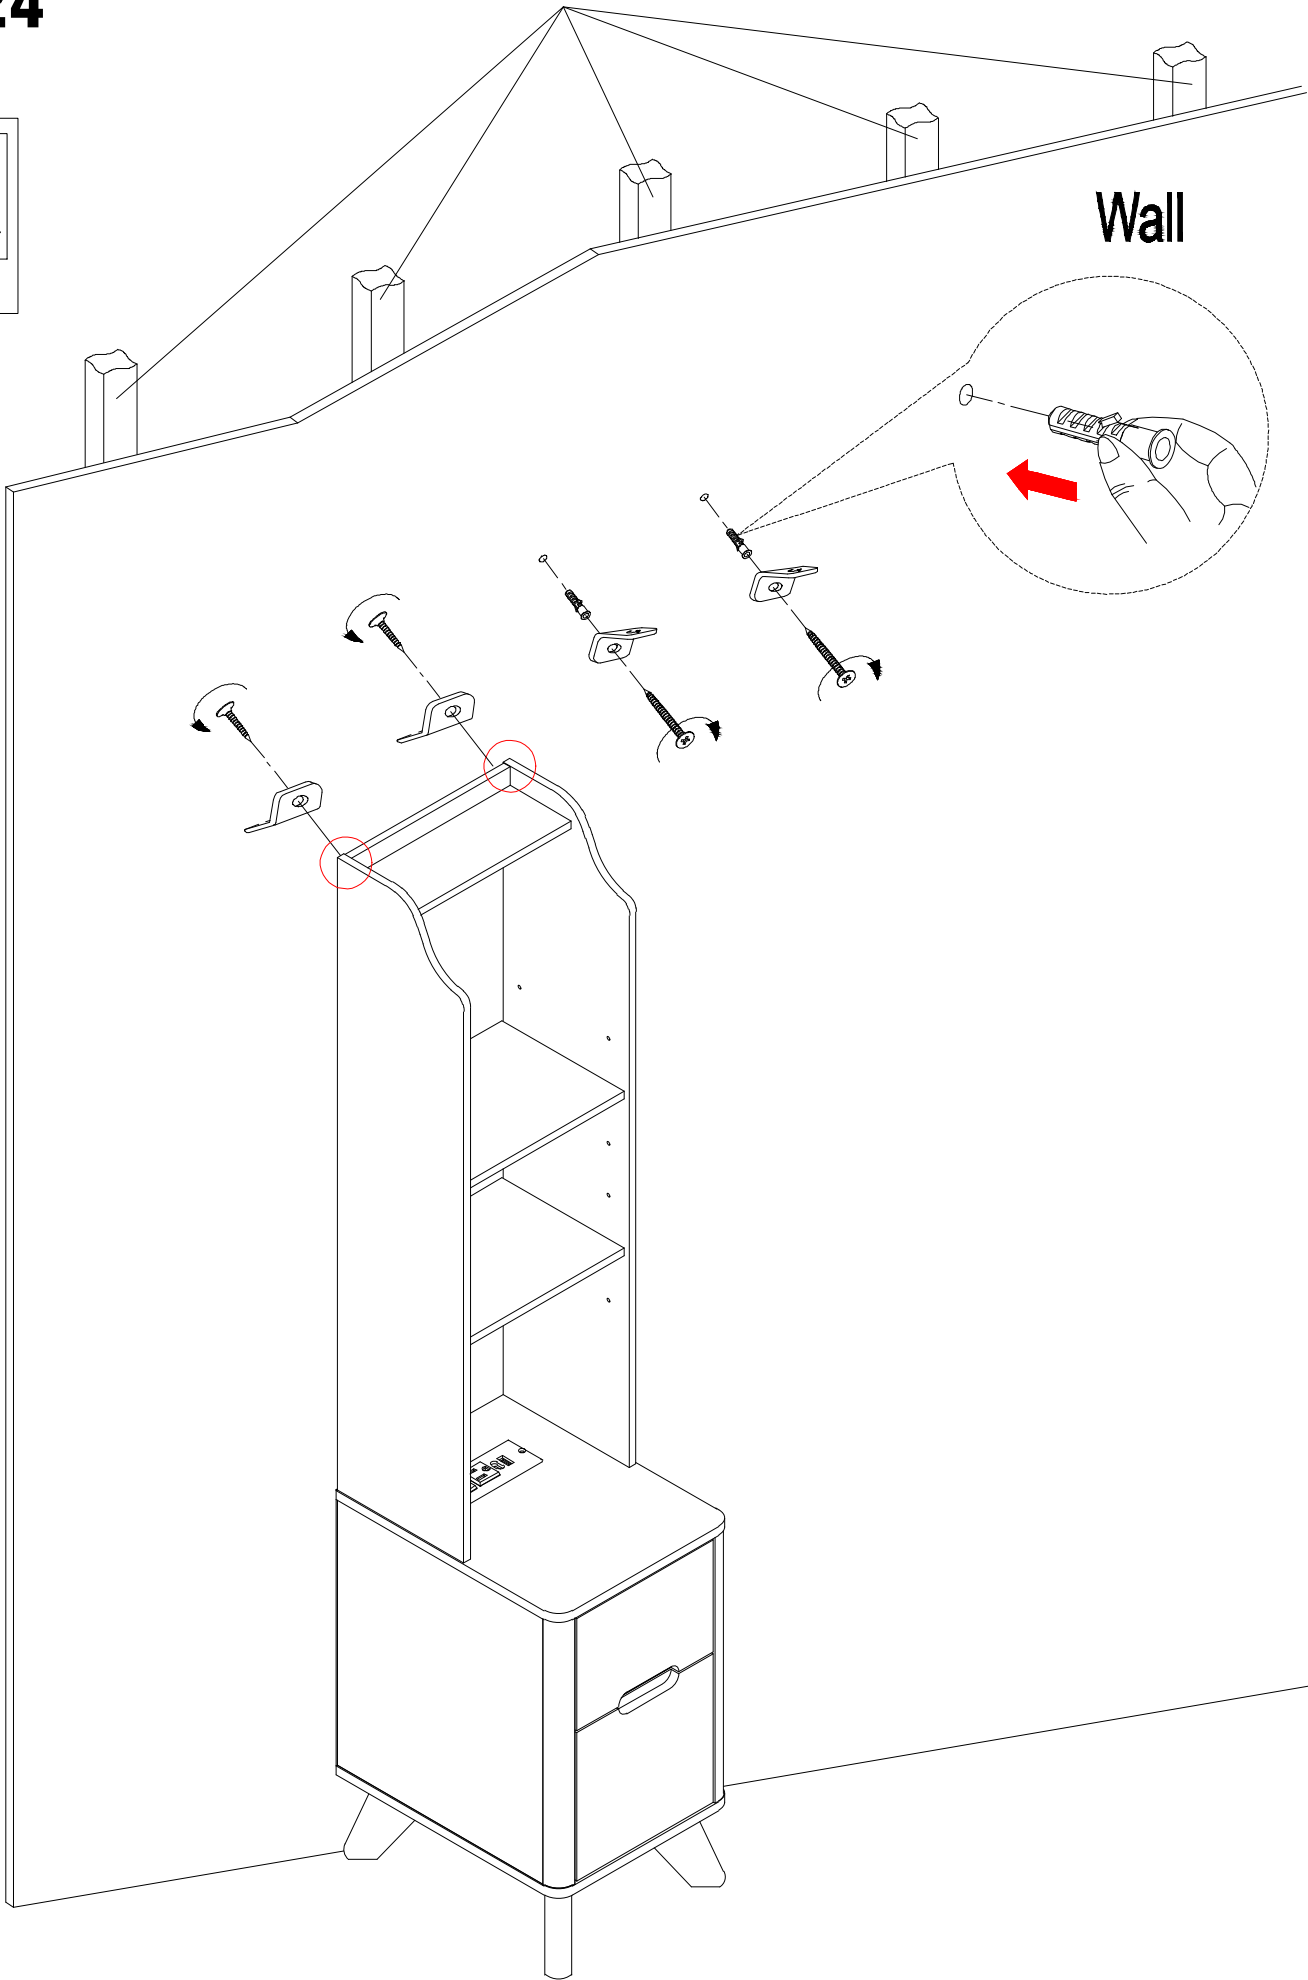

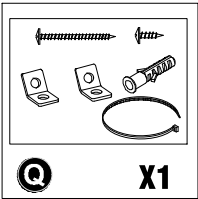

STEP 23 Assemble the adjustable shelf
