This guide will help you install your new light effortlessly. If you need further assistance, our customer support team is here to help.

You can reach us via email at info@ozarke.com or via phone at +1-(800) 604-7271

BEFORE YOU GET STARTED

Your safety is our priority. To prevent injury or damage, please follow these essential precautions when working with electrical wiring:

1. **Turn off the power:** Always switch off power to the area before starting any electrical work.
2. **Use the right tools:** Only use tools designed for electrical work, ensuring they are in good condition.
3. **Wear protective gear:** Safety glasses, gloves, and appropriate protective equipment are recommended.
4. **Check for live wires:** Before handling the wiring, use a non-contact voltage tester to confirm that the power is off.
5. **Avoid wet conditions:** Never work on electrical wiring in damp or wet environments.
6. **Maintain a safe distance:** Stay clear of exposed wires and electrical components.
7. **Consult a professional:** If unsure about any step, seek assistance from a qualified electrician.

WARNING!

For your safety, please follow these precautions when installing and using this light:

1. Use only the specified power supply (100V, 240Hz).
2. Handle with care and avoid scratching the surface or damaging the wires during installation.
3. This light is not designed for outdoor installation.
4. Keep away from corrosive substances and do not place near chemicals or gases that may cause damage.
5. Do not wash with water; clean only with a dry, soft cloth.

PENDANT LAMP,NATURAL

(DE) Montageanleitung

(EN) Mounting instructions

(BiH/HR/SR/CG) Upute za montiranje

(EN) Safety directions / Please read this information carefully before installing or using this product.

1. According to the valid electrical installation regulations, the lamps may only be installed by authorized and qualified technicians.
2. The manufacturer does not accept any responsibility for injuries or damage resulting from improper use of the light.
3. Maintenance of the lights is limited to the surfaces. When doing this, no moisture must come into contact with any areas of the terminal connections or mains voltage control parts.
4. Attention! Before starting the installation work, make sure that the mains power line is voltage-free – turn off safety cutout or unscrew the protection fuse. The switch must be “OFF”.
5. The light has the protection degree IP20, covered design in accordance with IEC 529 and is only suitable for use in living areas.
6. Safety class I . This light must be connected to the earthed conductor-terminal with the earthed conductor (green-yellow wire) .
7. Description of the supply terminals: L = Phase N = Neutral conductor  = Earthed conductor.
8. Only the included individual parts may be used; otherwise any and all guarantee claims will expire.
9. Please make sure that no cables get damaged during the installation work.
10. Attention! During operation, lamp parts and illuminants can reach temperatures of more than 350°C. Do not touch during operation!
11. Faulty illuminants may only be replaced by lamps of the same type, output and voltage.
12. The maximum wattage indicated of each lighting unit must not be exceeded.
13. The lamp may only be adjusted and positioned after having cooled down.
14.  0.5m  Minimum distance from the edge of the spotlight to the illuminated surface ≥ 0.5 m.
15. Do not touch halogen lamps     with bare fingers.
16.  Only use halogen illuminants with a covering pane or in low-pressure technology.
17.  With this symbol, no “cool beam” illuminant must be used.
18.   Broken protective glass must be replaced immediately.
