

Assembly Instructions

Thank you for purchasing 1 of our beds,

Step 1, Check you have the complete bed, your bed should be delivered in 4 packages, Headboard, Footboard, Side rails and Slats. Please open carefully to avoid damaging the fabric/upholstery.

Step 2 Lean the headboard against a wall as it will be easier to assemble this way, Loosen the nuts on the brackets at the base of the headboard and footboard.

Step 3 Hook a side rail to each of the protruding bolts on the headboard bracket with the hook on the side rails facing down. The slat rail should be towards the top of the side rail. Once hooked on tighten the 2 14mm nuts on each side of the headboard.

Step 4 Now bring the footboard towards the end of the side rails opposite the headboard, hook on the side rail brackets to the protruding bolts on the brackets of the footboard and tighten the 14mm nuts. If the bed ordered is a King size then there will be a central support beam with the side rails and this will sit into the bracket at the middle of the headboard and footboard and will need to be secured with screws to the bracket.

Step 5, Please ensure the bed is squared (the internal corner angles are 90 degrees, now evenly place the slats onto the slat rail on both side rails, please note the slats should have a snug fit and don't require any additional fixings to secure them. Once done place your mattress on top and have a great night's sleep.

Step 6 , if you are happy with your new bed then please tell others by leaving us a review, if in the unlikely event you are not satisfied with this bed please let us know so we can help to resolve any issues and to be able to improve our products and services.
