

Elevated Pet Feeder – 14 Inches Tall

14 inches tall

36 inches wide

*14.25 inches
deep*

Two 2-quart and one 3-quart stainless steel bowls are included

Is a 14 inch tall elevated feeder the right size for my large dog?

Determine the correct position for your dog's food bowl by measuring your standing dog from the floor under the front paws to the top of the shoulders and then subtract about 5 inches. Your dog should be able to eat without lowering her neck or stretching upwards.

Benefits of an elevated feeder for large breeds:

Improved Posture

Easier Digestion

Comfort for Large Breeds

Reduced Joint Strain

Prevents Neck and Spinal Issues
