

# ASSEMBLY INSTRUCTION

**NOTE:** • Before assembly, please put on the white gloves inside the box.

- During the second step, please pay attention to the direction of Part H (Seat Cushion) and Part G (Mechanism), which you can judge by the "Front" tags. The tilt tension knob should be in the front and the height control lever on your right when sitting down.
- Do not tighten the screws one by one. Try to align them first and tighten a few screws slightly. Then align the rest again and tighten them all.
- Because of the weight of the seat and backrest, sometimes it might be easier to assemble when putting one side of the chair on the ground.
- If you have any problems during the assembly that you can't solve on your own, please contact us immediately and we will get back to you as soon as possible.
