Fabric Down Sofa Care Guide

Air-Drying Care: Refresh with Moderate Sunlight

· If the sofa is consistently exposed to humid conditions, it may develop mold or odors. On sunny days, air-dry it outdoors once a month (or every 2-3 months in dry climates). Avoid excessive sun exposure to prevent fabric fading and down fiber damage.

· Limit sun exposure to 2-3 hours. Gently pat the surface during air-drying to help fluff the down. Avoid prolonged exposure (over 4 hours), which may cause fabric stiffness or down clumping.

Cleaning Care: Keep Your Sofa Fresh

· If the sofa cover is removable (check product specifications-some designs are non-removable), machine wash it on a gentle cycle using a mild detergent in cold water (below 86°F). Do not spin-dry; however, a short dehydration cycle of 1-2 minutes is acceptable. Reattach the cover promptly after drying to prevent fabric shrinkage.

By following these care instructions, your down-filled sofa will remain soft and comfortable for years to come.
