

PRECAUTIONS

INSTRUCTIONS FOR USE

When rotating the mop to dehydrate at a high speed,do not put your finger in the top hookbecause the top is rotating synchronously with the mop.In order to avoid finger stuck and human injury.

This prduct has rapid dehydration action.When the product is in use,please do not allow minors to play,especially take good care about children.

This product is a plastic product.please do not leave the product in open flame, extremely hot or cold environment,the consequences will lead to product deformation,damage,burning,embrittlement,etc.That will reduce product performance and even destroy the product.

The metal basket is specially designed for mop head,do not dehydrate other items.

When the mop head is rapidly rotating,do not allow minors to play in order to avoid the danger of hand stuck.Do not insert other objects during dehydration. Do not let minors play it alone,especially taking good care of children.

Q&A

Q:How to connect the pole wiht the mop plate?/why couldn't the plate be hold?

A:Screw the top 3 rods first,and then remove the white plastic ring on the mop plate and put it on the pole.Insert the pole into white connector on the mop plate.Be sure to insert it in the end!Then tighten the white plastic ring to the white connector,(as long as they're tighteneden,it's ok if there are some gaps)

Q:How to keep the mop pole upright?/How to dehydrate the mop when mop pole couldn't be upright?

A:Connect the pole and plate by the white connector,and then put the plate on the ground, lightly step on the plate,holding the pole and push it straight,done.New product will always be a little tight,after a period time of using,it will just be fine.If disconnect the white connector,the mop head will shake while using.

Q:How to install mop head?/How to change it?

A:Installation Of the Mop Head:Connect the 4 rods together first,and then connect the pole and the plate.Flatly put the mop head on the ground,align the mop plate with the plastic hoop on mop head and press in,lightly step on the plate around the edge.When you hear a"pop"sound,it's well installed.

Replacing the Mop Head:Put the attached mop head on the floor,with one foot on the mop hair,holding the pole in one hand and lifting the edge of plate in the other hand,the mop head will be removed!
