

ASSEMBLY

1. Prepare your wiring and junction box (not incl.) for your new lamp.
2. Assemble the frame (H) using its bolts (G) as shown. Add the covers (F).
3. Connect the Frame and canopy (D) with bolts (E).
4. Take the wall bracket (A) off the canopy. Connect the bracket to your junction box using its bolts (B).
5. Make electrical connections using the wire nuts (I), being careful that no wiring is left exposed.
6. Place the canopy against the bracket and reattach them with their bolts (C).
7. Install your bulbs into their sockets. This fixture has been rated for up to 2 E26 40-watt maximum bulbs (not included).
