The product drawing is for reference only.

BEFORE FIRST USE

1. For the first activation of the filter cartridge, immerse it in clean water for 10 minutes, rinse it, then install the filter cartridge. (Notice: After soaking and rinsing, for the first use, sip water from the bottle three times, spit it out directly, then it can be used for drinking.)
2. The amount of water poured should not be too full, so as not to overflow when closing and tightening the lid.
3. When drinking with this bottle, it is recommended not to exceed 140°F(60°C) to avoid scalding.
4. When cleaning the cup body, please use a soft sponge brush and detergent to clean.
5. According to different water quality, normal personal drinking water volume, please replace the filter every 3 months.
6. The product is in a sealed state at the factory, and it is normal that there will be a slight smell when it is opened for the first time.
8. For product maintenance or replacement of filter elements, please contact customer service.

- ⚠ Do not place in the freezer to avoid damaging the bottle.
- ⚠ Do not place acidic substances to avoid corroding the bottle.
- ⚠ Do not boil or microwave the bottle to avoid damaging and deforming the bottle.
- ⚠ Do not use steel wire balls, corrosive liquid cleaning products to avoid corrosion or scratches.
- ⚠ Do not use filter with any other beverage such as juice, coffee, etc. to avoid damaging the filter. If drinking other beverage, remove the filter.

STORING THE FILTER

If the bottle is not used for more than 72 hours after, the filter should be stored as follows:

Use plastic wrap or a sealed bag to pack the filter and place it in the refrigerator for storage.

You can also store the filter after completely drying

Do not expose the wet filter directly in the bottle for more than 72 hours, so as not to pollute the filter in the air inside or outside the bottle.

TROUBLE SHOOTING

The bottle is leaking: Check if the bottle cap has been tightened and closed properly.

No filtering effect:

1. Check if the filter cartridge is installed correctly according to the manual.
2. If the filter cartridge has been used for an extended period, it needs to be replaced.

The bottle smells and has an odor:

You can prepare a mild saline solution, pour it into the bottle (without the filter cartridge) shake it, let it sit for 10 minutes, then pour it out and rinse thoroughly with clean water.
