

The PETMAKER Bi-fold Pet Ramp is an easy and convenient way to provide your dog or cat with access to cars, trucks, SUVs and more!

The durable plastic construction of the ramp is both strong and lightweight.

A high traction walking surface provides a non-slip tread that is easy on pets' paws while providing sure footing.

We have added four feet for safety and stability and the raised rails, on either side, provide pets with confidence as they walk up and down the ramp.

The Bi-fold Pet Ramp is perfect for older pets, smaller pets or pets recovering from illness or injury.
