Precautions ④

Correct: Mount a place that can be exposed to sunlight for 5-6hours; Before the first use, it is recommended to charge in the sunlight for one day.

Error: Mount it indoors or in a place out of sunlight (no charging) .

Error: Mount it in a strong light (it won't turn off under strong light due to solar panel light control).

Error: dismantle the light by oneself (Malfunctions are likely to occur due to improper operation).

Friendly Reminder: Pls keep the product away from fire or any other heat source.

Charged by device as below:
