

LED BENEFITS

SAVINGS

Energy savings - With an 80% reduction in energy usage (vs incandescent), LED fixtures reduce lifespan energy costs by up to \$750 per replaced fixture.

Household cooling savings - LED bulbs produce very little heat, reducing summertime cooling costs.

ECO-FRIENDLY

Low CO₂ - LED fixtures reduce lifespan greenhouse gases by up to 10,350 pounds per replaced fixture. That's significant!

Mercury Free - Unlike compact fluorescent bulbs, LED bulbs do not contain mercury, and are not considered hazardous.
