

Meaning of LED Lights

State of LED Light	Meaning
White Light ON	Function is Working
Blue Light ON	Function Standby
Light OFF	Power OFF

Troubleshooting

LED doesn't turn on / Defogging doesn't work	Open the cover of the power supply on the back of the mirror to test the power cables, tighten the cables if they are loose. (Please cut off the power firstly before testing the power supply and cables)
Part of light strip is fault	Firstly, please pull the outer silicone strip away and press the inner light strip inward. If it still doesn't work, need replace the strip light.
After using for a few month, the light doesn't work.	Please contact us to replace the power supply.

RGB LED Bathroom Mirror User Manual

Before Installation

Please Note Before Installation:

1. Please read all instructions carefully before assembling the item.
2. After opening the package, first check if there is transit damage or missing parts.
3. Please power the mirror with plug to test the mirror and each functions before installation.
4. Assembly by two or more adults is highly recommended.
5. Disconnect power before installing, adding or changing any components.
6. Ensure that the fixing location is able to take the weight of the complete fitting.
7. Keep the voltages between 110V and 120V. If the voltage exceeds 120V, please use transformer.
8. To connect the wires to electrical junction box, a qualified technician or electrician is highly recommended.
9. Before cleaning the mirror, make sure that the power supply is disconnected.

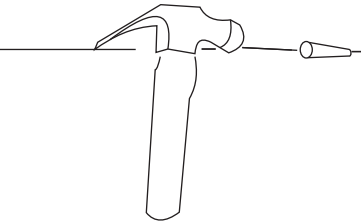

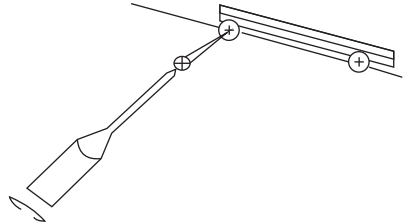

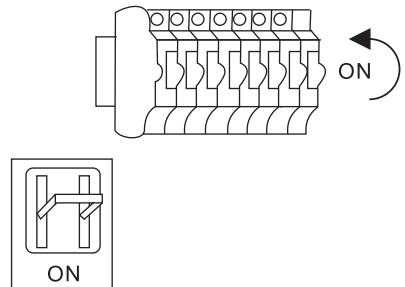

Please Notes:

Due to the workmanship production process of the items, the size error does not exceed 1-2 inches.
