

CUSTOMER ASSEMBLY INSTRUCTION

It is advisable to place a clean blanket on the floor before assembly to protect the item during assembly.

Do not try to assemble this item on your own, you will need one or two persons to assist you lifting the heavier components.

1. Check that all the parts are present first.

2. Locate the tenons at each end of the bottom stretcher into the mortises of each of the pedestal and secure them in place using the wedges provided. A rubber mallet may be used help fit the wedges tightly in place

3. Take the top stretcher and locate the dovetails at each end into the matching spaces provided in the tops of each pedestal. If the dovetails will not push into place use a rubber mallet and lightly tap the dovetails until they sit fully in place.

6. Once the tabletop is securely fastened in place pull out one side until it is fully extended revealing one self-storing extension leaf.

7. Repeat this at the other end revealing the second self-storing leaf. Fold out the leaves individually by **holding both halves** of the leaf and lifting it out of the storage

4. Each pedestal has a locator pin on the top to assist in aligning the tabletop. Study the underside of the tabletop before you lift it into place to be familiar of the positioning of the corresponding holes.

5. Lift the tabletop into place and attach it to the two pedestals using the four butterfly bolts provided. Make sure you put the washer on first.

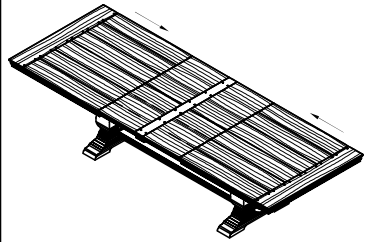

9. Repeat the operation for the second leaf.

8. Once clear of the storage area, unfold the leaf so that it extends over the width of the table and each end sits on the table runner.

10. Push both ends of the tabletop into the center of the table locking each leaf into place.

11. To store the leaves, pull out each end of the table releasing the leaves.

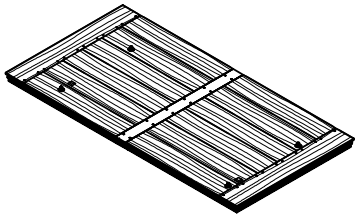

12. Fold each leaf and slide back into the storage area. Close the table by pushing each end towards the center until they lock.
