

Installation & Assembly

Sofa Cushion Care Instructions

1. Fluffing Newly Unpacked Cushions

New sofa cushions are tightly compressed during sealed packaging and long-distance transportation. It is normal for cushions to look flattened and compact right after unpacking, which is not a product quality defect.

After taking out the cushions, pat the surface and edges of seat & back cushions repeatedly, and knead the inner filling gently. You may also hold the four corners of the cushions and shake them up and down a few times. The inner filler will distribute evenly, allowing cushions to regain their original plump shape with softer seating comfort.

2. Daily Maintenance Tips

If cushions turn slightly flat after long-term use, restore fullness by patting and shaking regularly. Rotate seat cushions periodically to ensure even stress distribution and prevent local sagging. Keep fabric upholstery away from sharp objects to avoid snags. Remove surface dust with a lint roller or vacuum cleaner regularly.

3. Warm Reminders

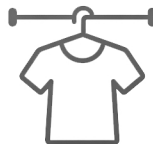

Do not machine wash or hand wash the inner cushion inserts. The outer fabric covers can be cleaned in accordance with the fabric care labels. Proper maintenance can greatly extend the service life and comfort of the sofa.
