STEP 8

Installation steps

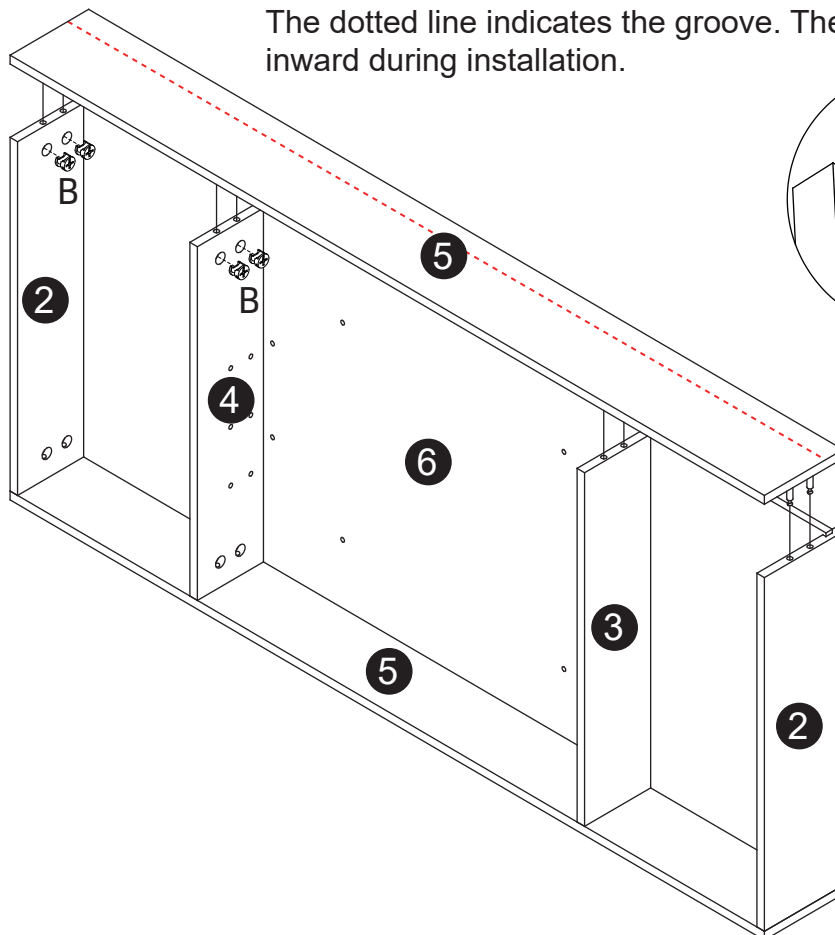

STEP 9

The side with multiple holes faces downward.

STEP 10

The dotted line indicates the groove. The groove must face inward during installation.

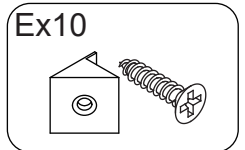

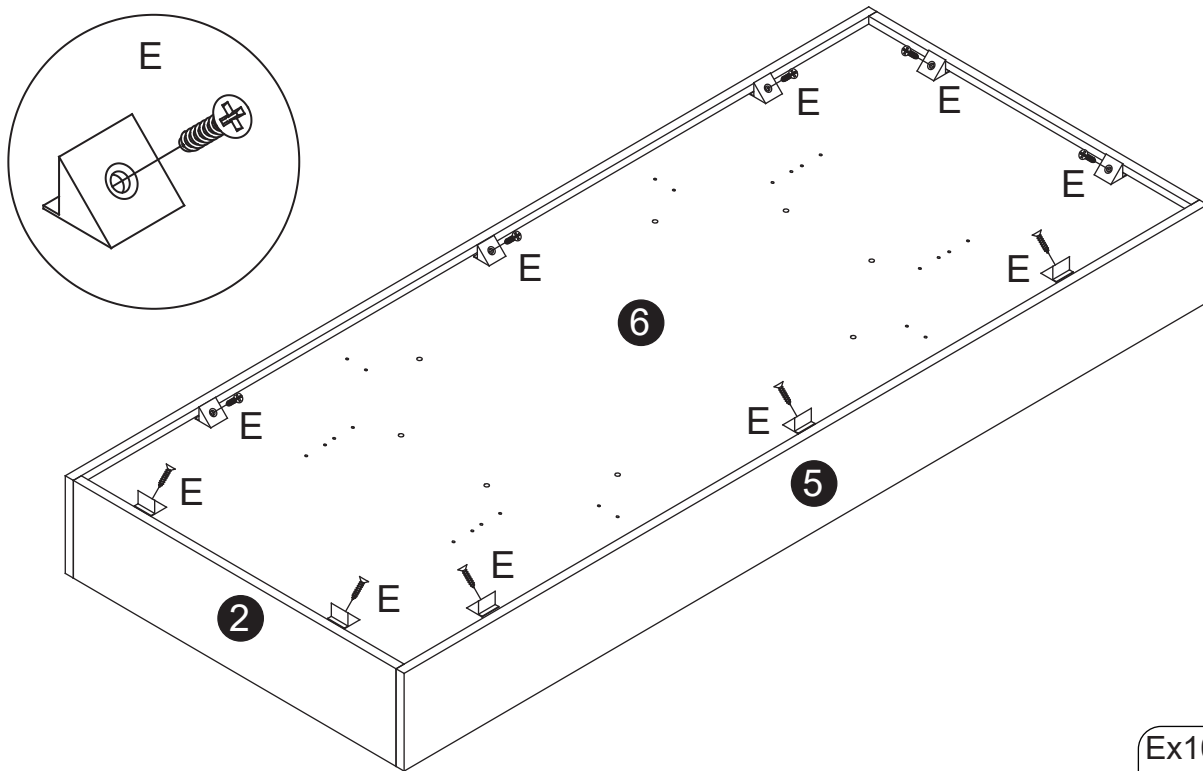

Bx8

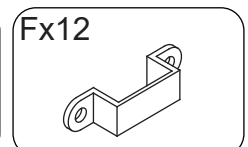

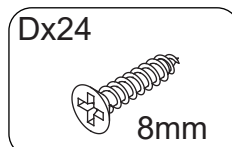

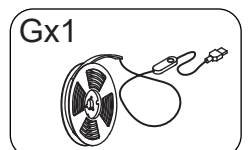

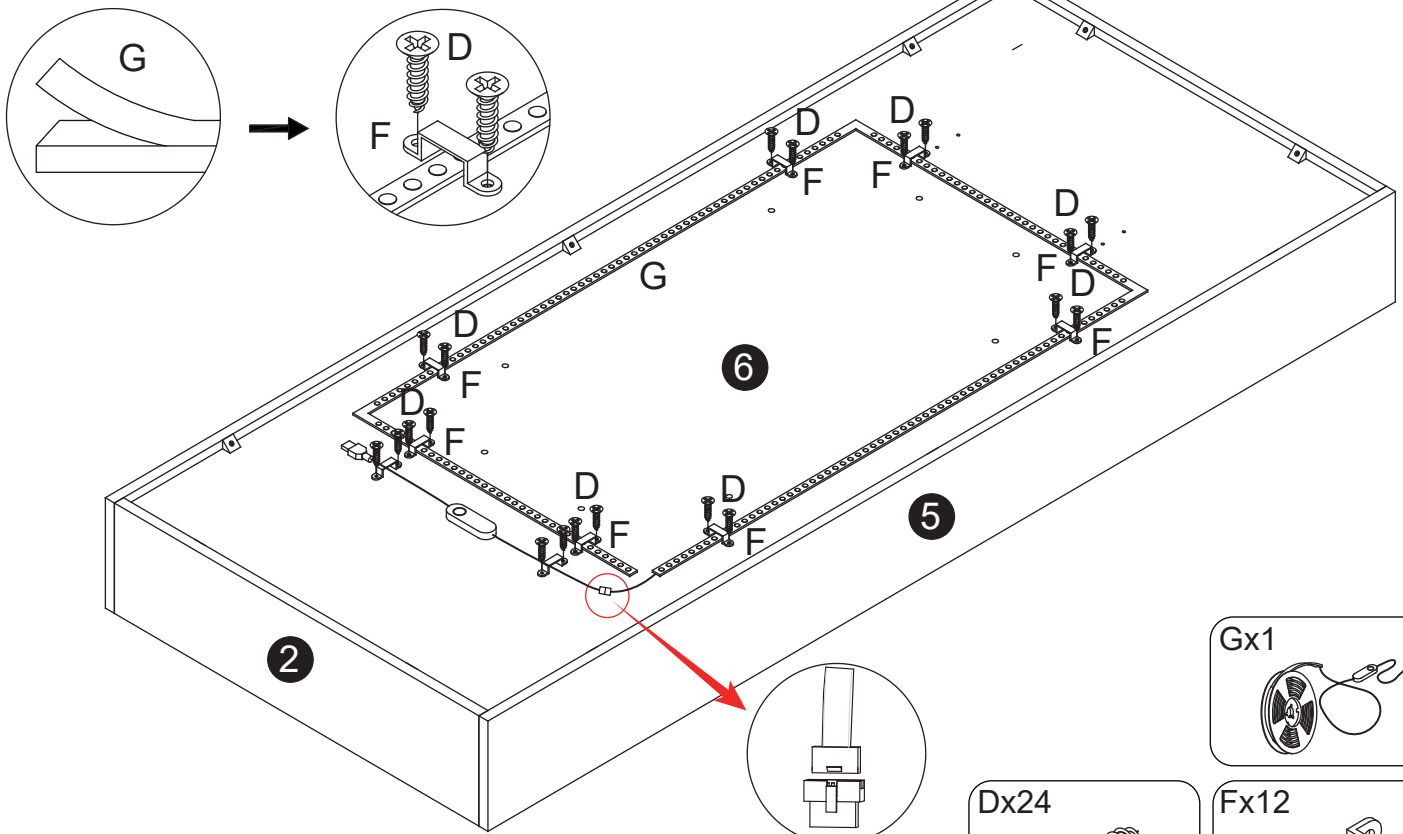

Installation steps

STEP 11

STEP 12

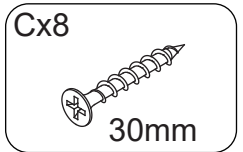

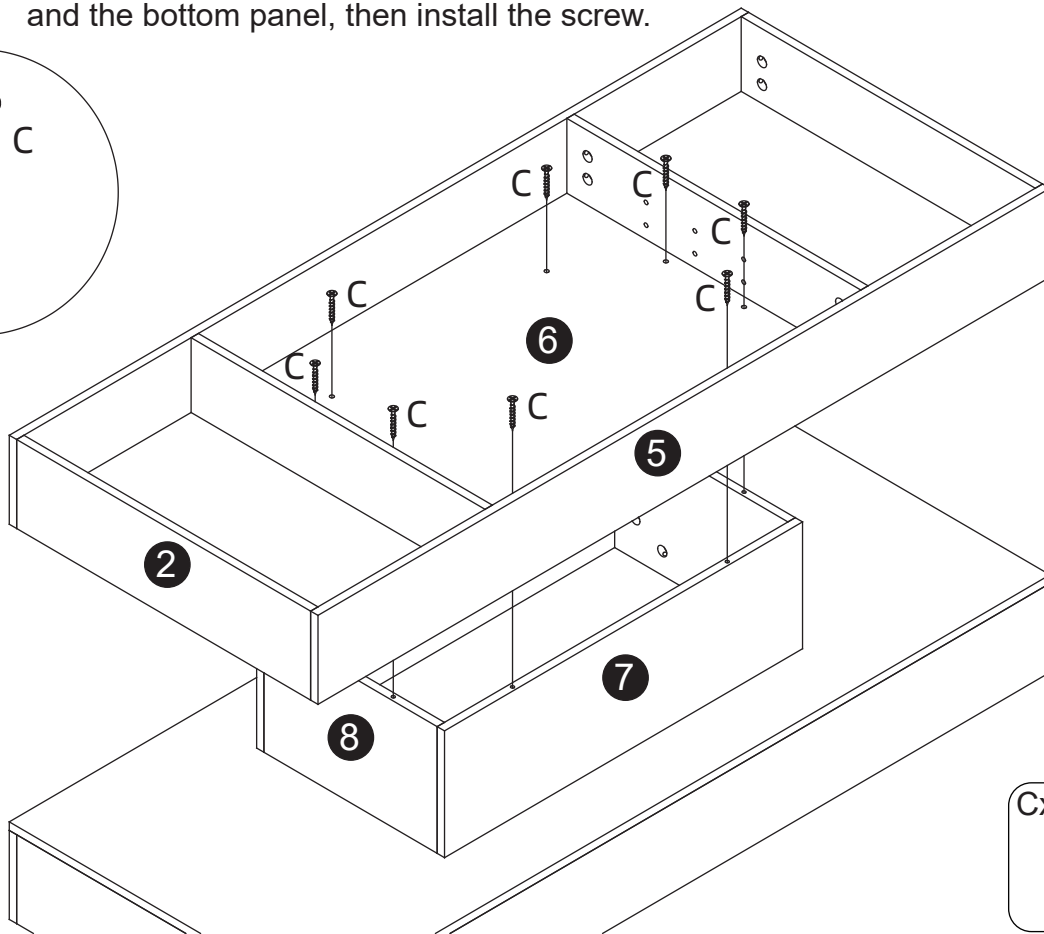

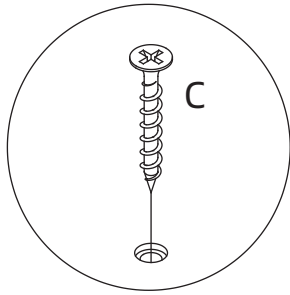

Install the clip as shown, paying attention to the correct orientation.

Installation steps

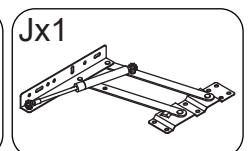

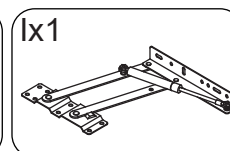

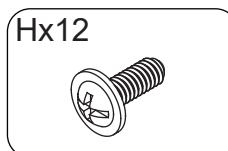

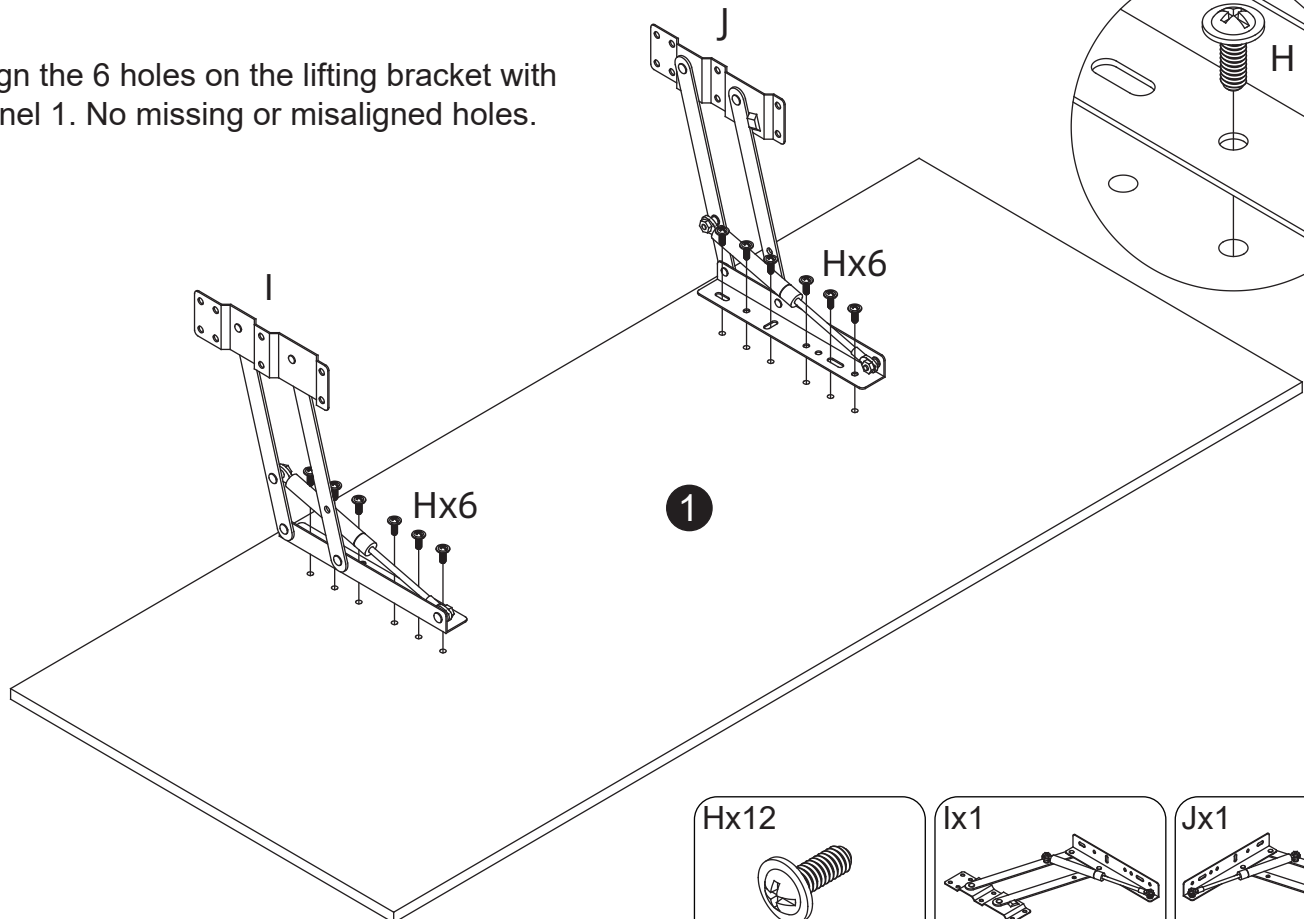

STEP 13

When installing screw C, first align the holes of Panel 6 and the bottom panel, then install the screw.

STEP 14

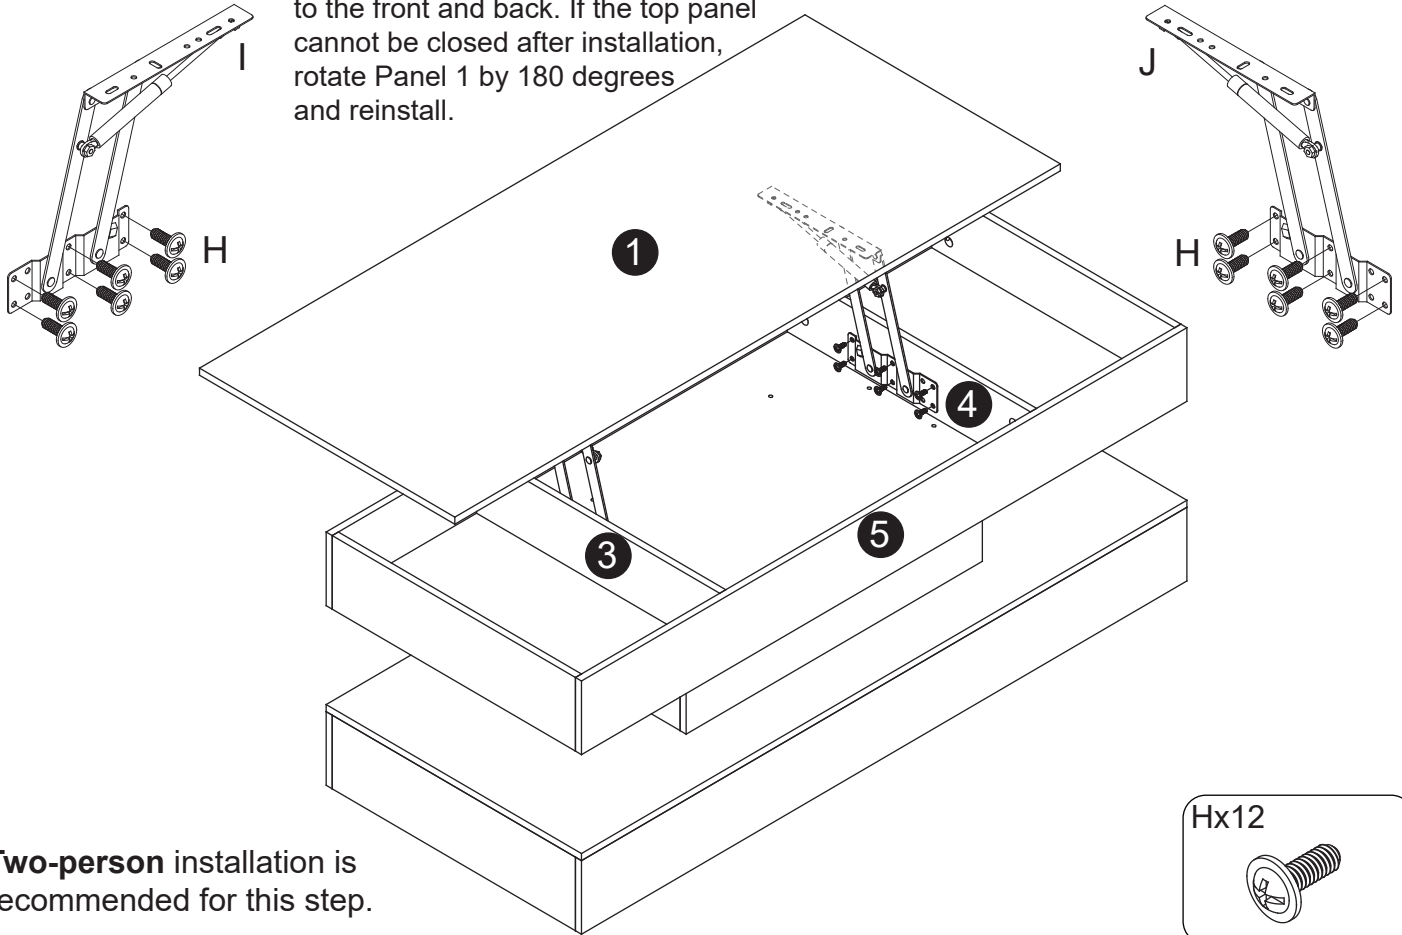

Align the 6 holes on the lifting bracket with Panel 1. No missing or misaligned holes.

Installation steps

STEP 15

When installing Panel 1, pay attention to the front and back. If the top panel cannot be closed after installation, rotate Panel 1 by 180 degrees and reinstall.

Two-person installation is recommended for this step.
